Ravinte 5 Inch Length, 3 Inch Hole Center

Ravinte 5-Inch Matte Black Cabinet Pulls Instruction Manual

Model: 5 Inch Length, 3 Inch Hole Center

1. INTRODUCTION

Thank you for choosing Ravinte Matte Black Cabinet Pulls. These functional and elegant pulls are designed to enhance the aesthetic and usability of your cabinets, wardrobes, chests, and cupboards. Crafted from durable stainless steel with a classic matte black finish, they offer a clean and timeless look that complements various interior styles, including farmhouse, vintage, traditional, and transitional designs. This manual provides detailed instructions for installation, maintenance, and troubleshooting to ensure optimal performance and longevity of your cabinet pulls.

4. SETUP AND INSTALLATION

Installing your Ravinte cabinet pulls is a straightforward process. Follow these steps for a secure and professional installation:

Tools Required:

- Measuring Tape or Ruler
- Pencil
- Drill with appropriate drill bit (typically 3/16" or 5mm for cabinet hardware)
- Philips Head Screwdriver
- Pliers (for adjusting breakaway screws)

Installation Steps:

1. **Measure and Mark:** Determine the desired location for your pull on the cabinet door or drawer. Use a measuring tape and pencil to accurately mark the two hole centers (3 inches apart). For consistency, consider using a cabinet hardware jig or template.
2. **Drill Pilot Holes:** Carefully drill pilot holes at the marked locations. Ensure the drill bit is appropriate for your cabinet material and slightly smaller than the screw diameter to prevent splitting. Drill straight through the cabinet from the front.
3. **Prepare Screws:** Select the appropriate screw length for your cabinet thickness. The included 1-3/4-inch breakaway screws can be adjusted. If your cabinet material is thinner than 1-3/4 inches, use pliers to snap off the excess length from the breakaway screw at the desired score mark. The screws are suitable for cabinet thicknesses between 1/2 inch and 1-9/16 inches.
4. **Attach the Pull:** Align the pull with the drilled holes. Insert the screws from the inside of the cabinet door or drawer through the pilot holes and into the threaded posts of the pull.
5. **Tighten Screws:** Using a Philips head screwdriver, carefully tighten the screws until the pull is snug against the cabinet surface. Do not overtighten, as this can strip the screw threads or damage the cabinet material.

5. OPERATING

Once installed, your Ravinte cabinet pulls are ready for use. Simply grasp the pull firmly to open and close your cabinet doors and drawers. The sturdy stainless steel construction ensures a comfortable and reliable grip for daily use.

6. MAINTENANCE

To maintain the appearance and longevity of your matte black cabinet pulls, follow these simple maintenance guidelines:

- **Regular Cleaning:** Wipe the pulls regularly with a soft, damp cloth to remove dust, fingerprints, and smudges.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, ammonia-based products, or harsh chemicals, as these can damage the matte finish.
- **Gentle Drying:** After cleaning, dry the pulls immediately with a clean, soft cloth to prevent water spots.
- **Periodic Inspection:** Periodically check the tightness of the screws. If a pull feels loose, gently tighten the screws with a Philips head screwdriver.

7. TROUBLESHOOTING

Most issues with cabinet pulls are minor and can be resolved with simple adjustments:

Common Issues and Solutions:

- **Pull is Loose:**

Solution: Use a Philips head screwdriver to tighten the mounting screws from the inside of the cabinet door or drawer. Do not overtighten.

- **Pull is Crooked:**

Solution: Loosen the mounting screws slightly, adjust the pull to be straight, and then re-tighten the screws. Ensure your initial drill marks were accurate.

- **Screw Does Not Fit:**

Solution: Ensure you are using the correct screw length for your cabinet thickness. If using breakaway screws, ensure you have snapped off the correct segment. If the hole is too small, carefully re-drill with a slightly larger bit. If the hole is too large, you may need to use a wall anchor or wood filler to secure the screw.

- **Scratches or Finish Wear:**

Solution: While the matte black finish is durable, heavy impact or abrasive cleaning can cause wear. For minor scuffs, a black permanent marker can sometimes be used carefully to touch up small areas. For significant damage, replacement may be necessary.

8. WARRANTY AND SUPPORT

Ravinte stands behind the quality of its products. We offer a **365-Day Evaluation** period for your cabinet handles. If you find that they do not meet your needs within a full year of purchase, please contact us for assistance. Our customer support team is dedicated to ensuring your satisfaction.

For further assistance, product inquiries, or to report any issues, please visit the official Ravinte store on Amazon or contact Ravinte customer service directly through your purchase platform.
