Fossil FTW1191

Fossil Hybrid Smartwatch FTW1191 User Manual

Model: FTW1191

INTRODUCTION

The Fossil Hybrid Smartwatch FTW1191 combines the classic aesthetics of a traditional timepiece with the functionality of a modern smartwatch. This device offers activity and sleep tracking, smartphone notifications, and customizable controls, all without the need for frequent charging. This manual provides essential information for setting up, operating, maintaining, and troubleshooting your new Fossil Hybrid Smartwatch.

SETUP

1. Unboxing and Initial Inspection

Carefully remove your Fossil Hybrid Smartwatch from its packaging. Inspect the watch for any visible damage. The package should include the smartwatch and this instruction manual.

2. App Installation

To utilize the full features of your hybrid smartwatch, you must download and install the official Fossil Smartwatches app on your smartphone. The app is compatible with both iOS and Android devices.

- For iOS devices, search for 'Fossil Smartwatches' in the Apple App Store.
- For Android devices, search for 'Fossil Smartwatches' in the Google Play Store.

3. Pairing with Your Smartphone

Ensure your smartphone's Bluetooth is enabled. Open the Fossil Smartwatches app and follow the on-screen instructions to pair your watch. The app will guide you through the process, which typically involves selecting your watch model and confirming a connection.

Image: Front view of the Fossil Hybrid Smartwatch FTW1191, showcasing its blue dial, silver-tone case, and brown leather strap. This image illustrates the watch's design and the integration of smart features with a traditional analog display.

1. Activity Tracking

Your smartwatch automatically tracks your daily activity, including steps taken, distance traveled, and calories burned. View your progress and detailed statistics within the Fossil Smartwatches app. You can set custom goals in the app to monitor your fitness journey.

2. Sleep Monitoring

Wear your watch to bed to track your sleep patterns. The app provides insights into your sleep quality, including light and deep sleep cycles. This feature helps you understand and improve your sleep habits.

3. Smartphone Notifications

Receive discreet notifications for calls, texts, and app alerts directly on your wrist. The watch uses subtle vibrations and hand movements to alert you. Customize which contacts and apps trigger notifications through the Fossil Smartwatches app.

4. Customizable Buttons

The side buttons on your smartwatch can be customized via the app to perform various functions, such as controlling music playback, ringing your phone to locate it, or taking a photo remotely.

Image: Side profile of the Fossil Hybrid Smartwatch FTW1191, highlighting the crown and two customizable pushers. These buttons allow for interaction with the watch's smart features.

5. Water Resistance

Your Fossil Hybrid Smartwatch is water resistant up to 50 meters (165 feet). This means it is suitable for short periods of recreational swimming, but not for diving or snorkeling. Avoid operating the buttons while the watch is submerged.

MAINTENANCE

1. Battery Replacement

The Fossil Hybrid Smartwatch FTW1191 uses an easy-to-change cell battery (Silver Oxide) that can last up to 12 months, eliminating the need for daily charging. When the battery is low, the app will notify you. To replace the battery, it is recommended to visit an authorized Fossil service center or a professional watch repair shop to ensure proper sealing and water resistance.

2. Cleaning Your Watch

To clean your watch, wipe the case and strap with a soft, damp cloth. For leather straps, avoid excessive moisture and harsh chemicals. For stainless steel components, a mild soap solution can be used, followed by thorough drying.

3. Strap Replacement

The watch features interchangeable 22mm straps, allowing you to customize its look. To replace the strap, locate the quick-release pins on the underside of the strap and gently slide them to detach. Attach a new 22mm Fossil-compatible strap by reversing the process.

Image: Rear view of the Fossil Hybrid Smartwatch FTW1191, displaying the brown leather strap with its buckle and the attachment mechanism, indicating its 22mm interchangeable design.

TROUBLESHOOTING

- **Watch Not Connecting to Phone:** Ensure Bluetooth is enabled on your phone and the watch is within range. Try restarting both your phone and the watch (if applicable, by holding down a button or removing/reinserting the battery). Re-open the Fossil Smartwatches app.
- **Notifications Not Working:** Check app settings on your phone to ensure notifications are enabled for the Fossil Smartwatches app. Verify that specific app notifications are enabled within the Fossil app itself.
- **Activity Tracking Inaccurate:** Ensure the watch is worn snugly on your wrist. Calibrate the watch through the app if an option is available.
- **Time is Incorrect:** The hybrid smartwatch syncs its time with your paired smartphone. Ensure your phone's time is correct and the watch is successfully connected to the app. Manual time setting is not available.
- **Battery Life Shorter Than Expected:** Excessive notifications or frequent use of customizable button functions can slightly reduce battery life. Ensure the battery is correctly installed.

For further assistance, refer to the support section of the Fossil Smartwatches app or visit the official Fossil support website.

SPECIFICATIONS

Feature	Detail
Model Number	FTW1191
