## REVLON RVDR5222TEAL

# REVLON One Step Hair Dryer And Volumizer Hot Air Brush

Model: RVDR5222TEAL | Brand: REVLON

## INTRODUCTION

---

The Revlon One-Step Volumizer 1.0 Original is a designed hair dryer + Hot Air Brush to deliver gorgeous volume and brilliant shine in a single step. The unique non detachable oval brush design smooths hair while the rounded edges quickly create volume at the root for beautifully full-bodied bends at the ends in a single pass. The brush is designed with Nylon Pin and Tufted Bristles for detangling, improve volume and control. Styling flexibility is guaranteed with 3 Heat/Speed Settings and a Cool Option. Built to provide just the right amount of heat. Unlike conventional hair dryers, this volumizer can be placed closer to the scalp for lift. Boosted by Ionic Technology hair dries fast and helps reduce heat damage. The One Step Unit is designed for 120V USA outlets only, we do not recommend use of a voltage adapter or converter, as it will damage the unit. Note wattage will vary depending on the location of use.

## OPERATING INSTRUCTIONS

Follow these steps for optimal styling results:

1. Plug the dryer into an electrical outlet and adjust the switch to the selected setting.
2. Use the **LOW** setting on fine or thin hair and the **HIGH** setting on thick and coarse hair.
3. Use the **COOL** setting to lock in the style.
4. Separate hair into manageable sections.
5. For smooth blowouts, place the dryer close to the roots and brush down toward the ends.
6. For voluminous blowouts, place the dryer under the hair close to the roots and roll outward to the ends.
7. To curl ends **IN**, place the dryer **UNDER** the ends and hold for 2 to 3 seconds before rotating inward.
8. To curl ends **OUT**, place the dryer **OVER** the ends and hold for 2 to 3 seconds before rotating outward.
9. Repeat on remaining sections until hair has been dried into luxurious, voluminous styles.

10. When drying is complete, wait for the dryer to cool before storing. Do not wrap the cord around the dryer.

## MAINTENANCE

---

Proper maintenance ensures the longevity and performance of your Revlon One-Step Volumizer.

- **Clean Air Inlet:** Regularly clean the air inlet to prevent dust and hair buildup, which can affect performance.
- **Remove Hair from Brush:** After each use, carefully remove any tangled hair from the bristles to maintain optimal detangling and styling capabilities.
- **Cord Storage:** Do not wrap the power cord tightly around the unit. This can damage the cord over time. Instead, loosely coil the cord.
- **Cool Down Before Storing:** Always allow the unit to cool completely before storing it to protect the bristles and internal components.

## TROUBLESHOOTING

---

If you encounter any issues with your Revlon One-Step Hair Dryer and Volumizer, please refer to the following common solutions:

- **Unit Not Turning On:** Ensure the appliance is securely plugged into a functional 120V USA electrical outlet. Check if the outlet itself is working by plugging in another device.
- **Reduced Airflow/Performance:** Clean the air inlet filter to remove any lint or hair buildup that may be obstructing airflow. Ensure the brush bristles are free of tangled hair.
- **Unusual Noise or Smell:** Discontinue use immediately and unplug the unit. Contact customer support if the issue persists after cleaning and inspection.
- **Overheating:** If the unit feels excessively hot, unplug it and allow it to cool down completely. Ensure the air vents are not blocked during use.

For issues not covered here, please contact Revlon customer support.
