Eviva EVSH548CH

Eviva EVSH548CH Beverly Tub Faucet Set Instruction Manual

Model: EVSH548CH

Introduction

Thank you for choosing the Eviva EVSH548CH Beverly Tub Faucet Set. This manual provides detailed instructions for the safe installation, operation, and maintenance of your new tub and shower system. Please read this manual thoroughly before beginning installation or use, and retain it for future reference. This set features solid brass construction and a chrome finish, designed for durability and aesthetic appeal in your bathroom.

Safety Information

- Always turn off the main water supply before installing or performing any maintenance on the faucet.
- Wear appropriate personal protective equipment (PPE) such as safety glasses and gloves during installation.
- If you are unsure about any part of the installation process, consult a qualified plumber.
- Ensure all connections are secure to prevent leaks.
- Do not use harsh chemicals or abrasive cleaners on the chrome finish, as this may damage the surface.

Package Contents

Verify that all components are present before beginning installation:

- Bathroom shower head
- Tub faucet (spout)
- Hand shower with hose
- Single handle control valve
- Mounting hardware and seals

Installation Instructions

This faucet set is designed for wall-mounted installation. Professional installation is recommended to ensure proper function and compliance with local plumbing codes.

1. **Prepare the Installation Area:** Ensure the wall cavity is prepared according to standard plumbing practices for a wall-mounted shower and tub system. Turn off the main water supply.
2. **Install the Valve Body:** Secure the ceramic valve body within the wall cavity, ensuring it is level and at the correct depth for the finished wall surface. Connect the hot and cold water lines to the designated inlets on the valve body.
3. **Connect Outlets:** Connect the water lines from the valve body to the shower head, tub spout, and hand shower outlets. Ensure all connections are watertight.
4. **Install Trim Plate and Handle:** Once the wall surface is finished, install the decorative trim plate over the valve

body. Attach the single control handle.

Figure 2: Detail of the single-handle control for hot/cold water and flow diversion, featuring a sleek chrome finish and clear markings for operation.

5. **Install Shower Head and Tub Spout:** Attach the shower arm to the wall outlet and then secure the shower head. Install the tub spout onto its dedicated wall connection.

Figure 3: The square rain shower head delivering a consistent flow of water, showcasing the modern design and effective water distribution.

Figure 4: The minimalist tub spout with water flowing, demonstrating its clean lines and functional design for filling a bathtub.

6. **Install Hand Shower:** Connect the hand shower hose to its wall outlet and attach the hand shower to the hose. Secure the hand shower holder to the wall.

Figure 5: The sleek, square-shaped handheld shower, connected by a flexible hose, offering versatility and ease of use for targeted rinsing.

7. **Test for Leaks:** Slowly turn on the main water supply and check all connections for leaks. Tighten any leaking connections as necessary.

Operating Instructions

The Eviva EVSH548CH features a single-handle dual control for water temperature and flow diversion.

- **Water Flow and Temperature:** Rotate the single handle to control water temperature (typically left for hot, right for cold) and pull it outwards to increase water flow.
- **Diverter Function:** The handle also acts as a diverter. Push or pull the handle to switch water flow between the shower head, tub spout, and hand shower. Refer to the markings on the trim plate for specific positions.

Maintenance

- **Cleaning:** Clean the chrome finish regularly with a soft cloth and mild soap and water. Rinse thoroughly and dry to prevent water spots.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners, ammonia-based products, or strong chemical solvents, as these can damage the finish.
- **Aerator Maintenance:** Periodically unscrew and clean the aerator on the tub spout and shower heads to remove mineral buildup and maintain optimal water flow.
- **Ceramic Valve:** The ceramic disc valve is designed for long-lasting, drip-free performance. If leaks occur, consult a professional plumber for valve replacement.

Troubleshooting

Problem	Possible Cause	Solution
Low water flow	Clogged aerator or shower head nozzles; partially closed shut-off valve.	Clean aerators/nozzles. Ensure shut-off valves are fully open.
Leaking from spout/shower head	Loose connections; worn seals or O-rings; faulty valve cartridge.	Tighten connections. Replace seals/O-rings. Consult a plumber for valve cartridge replacement.
Water temperature issues	Incorrect hot/cold water supply connections; faulty thermostatic valve (if applicable).	Verify hot/cold connections. Consult a plumber.

Specifications

- **Brand:** Eviva
- **Model:** EVSH548CH
- **Color:** Chrome
- **Material:** Brass, Ceramic
- **Finish Type:** Brushed, Chrome
- **Number of Handles:** 1
- **Mounting Type:** Wall Mount
- **Valve Type:** Ceramic Valve
- **Product Dimensions:** Approximately 18.9 x 7.2 x 55 inches
- **Item Weight:** Approximately 30 pounds

Warranty and Support

Eviva products are manufactured to high-quality standards. For specific warranty details or technical support, please refer to the warranty card included with your purchase or visit the official Eviva website. Keep your proof of purchase for warranty claims.
For further assistance, you may contact Eviva customer support through their official channels. Always provide your model number (EVSH548CH) when seeking support.
