## 2. SAFETY INFORMATION

---

Adherence to safety guidelines is crucial during assembly and use of this product. Failure to follow these instructions may result in injury or damage to the product.

- **Assembly Safety:** Always use appropriate safety gear, such as gloves, during assembly. It is recommended to have at least two people for assembly, especially when handling larger components.
- **Placement:** Place the storage cabinet on a stable, level surface to prevent tipping. Ensure the ground is firm and can support the weight of the cabinet and its contents.
- **Anchoring:** For enhanced stability, especially in windy conditions, secure the shed to a wall or fence using appropriate anchoring hardware (not included).
- **Weight Distribution:** Distribute items evenly inside the cabinet to maintain balance. Avoid placing excessively heavy items on upper shelves.
- **Children and Pets:** Keep children and pets away from the assembly area. Do not allow children to play inside or around the cabinet.
- **Tools:** Use the correct tools as specified in the assembly instructions. Avoid over-tightening

screws, which can split the wood.

### 3. PACKAGE CONTENTS

## 5. SETUP AND ASSEMBLY INSTRUCTIONS

Assembly is required for this product. All necessary tools are included. Please follow the pictorial instructions provided with your product packaging carefully. The following points highlight key aspects of the assembly process:

- Preparation:** Clear a spacious, level area for assembly. Lay out all parts and hardware, verifying against the parts list in your packaging.
- Tool Usage:** While a manual screwdriver can be used, a power drill on a low torque setting is recommended for efficiency. Exercise caution to avoid splitting the wood.
- Two-Person Assembly:** For ease and safety, especially when lifting and positioning larger panels, assembly with two people is advised.
- Stability Features:** During assembly, ensure the 4 metal brackets are securely installed to enhance the shed's stability. The 6 adjustable feet should be utilized to level the cabinet on uneven surfaces.

## 6. OPERATING INSTRUCTIONS

The MCombo Outdoor Storage Cabinet is designed for versatile storage of garden tools, pool chemicals, equipment, and other outdoor items.

- **Door Operation:** The cabinet features double doors with a latch for secure closure. Ensure the latch is properly engaged to keep the doors closed.
- **Removable Shelves:** The cabinet includes two removable shelves, allowing for customizable storage configurations. You can create up to four distinct storage spaces by adjusting or removing these shelves as needed.

## 7. MAINTENANCE

Proper maintenance will extend the lifespan and preserve the appearance of your MCombo Outdoor Storage Cabinet.

- **Wood Care:** The cabinet is constructed from fir wood. While durable, wood can benefit from periodic treatment with an oil-based wood stain or sealant to protect against weathering and maintain its natural finish. This is especially recommended for prolonged outdoor exposure.
- **Waterproof Roof:** The sloping asphalt roof is designed to prevent water accumulation. Regularly inspect the roof for any damage or debris that might impede water runoff.
- **Cleaning:** Clean the exterior with a soft cloth and mild soap solution. Avoid abrasive cleaners or harsh chemicals that could damage the wood finish.
- **Hardware:** Periodically check all screws and hardware for tightness and re-tighten as necessary. Lubricate hinges and latches if they become stiff.

## 8. TROUBLESHOOTING

---

If you encounter issues with your storage cabinet, refer to the following common problems and solutions:

- **Cabinet is Unstable/Wobbly:**
  - Ensure the cabinet is placed on a completely level surface.
  - Adjust the 6 adjustable feet at the base to compensate for uneven ground.
  - Verify that all assembly screws are tightened.
  - Consider anchoring the cabinet to a nearby wall or fence using appropriate hardware for added security, especially in areas prone to high winds.
- **Doors Do Not Close Properly or Appear Warped:**
  - Check if the cabinet is level. An unlevel base can cause door misalignment.
  - Inspect hinges for proper installation and tightness.
  - Ensure the latch mechanism is aligned and functioning correctly.
  - Wood can naturally expand or contract with humidity changes. Minor warping may occur but often self-corrects. Applying a wood sealant can help mitigate this.

- **Water Inside the Cabinet:**

- Verify that the roof components are correctly assembled and sealed.
- Check for any gaps or cracks in the wood panels. Apply a suitable outdoor sealant if necessary.
- Ensure the cabinet is not positioned in an area where water can pool around its base.
