- Utilize the side hooks for hanging smaller items such as hats, scarves, or bags.

Utilizing the Storage Shelves

- The two lower shelves are designed for storing shoes, folded clothing, storage boxes, or other accessories.
- Ensure items placed on the shelves do not exceed the individual shelf weight capacity (15 kg per shelf).

Moving the Rack

- To move the rack, unlock the two lockable wheels.
- Push or pull the rack gently to its desired location.
- Once in position, engage the locking mechanism on the wheels to secure the rack and prevent unintended movement.

MAINTENANCE

- **Cleaning:** Wipe the metal frame and engineered wood shelves with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as they may damage the finish.
- **Dusting:** Regularly dust the rack to maintain its appearance.
- **Inspection:** Periodically check all screws and connections to ensure they are tight. Retighten if necessary to maintain stability.
- **Avoid excessive moisture:** Do not expose the rack to excessive moisture or direct sunlight for prolonged periods, as this may cause damage to the materials.

TROUBLESHOOTING

- **Rack is wobbly:** Ensure all screws are fully tightened. Check that the rack is on a level surface. If on an uneven surface, adjust items or reposition the rack.
- **Wheels not rolling smoothly:** Check for any debris or hair caught in the wheels. Clean them if necessary. Ensure the locking mechanisms are fully disengaged.
- **Difficulty with assembly:** Review the assembly instructions carefully. Ensure you are using the correct parts for each step. Do not force components together; if parts do not fit, re-examine the instructions.
- **Rack tipping:** This usually indicates uneven weight distribution or exceeding the maximum load capacity. Redistribute items evenly across both hanging rails and shelves, and ensure the total weight does not exceed 100 kg. Lock the wheels when stationary.
