Aipsun 9206

Aipsun Indoor Aluminum Modern LED Wall Sconce

Instruction Manual - Model 9206

1. Introduction

Thank you for purchasing the Aipsun Indoor Aluminum Modern LED Wall Sconce. This manual provides essential information for the safe and efficient installation, operation, and maintenance of your new lighting fixture. Please read this manual thoroughly before installation and retain it for future reference.

2. Product Overview

The Aipsun Modern LED Wall Sconce is designed to provide elegant and functional lighting for various indoor spaces. Its sleek, contemporary design and durable aluminum construction ensure both aesthetic appeal and longevity.

- **Soft and Homely Illumination:** Each wall sconce is supplied with an energy-saving, non-flickering 9W LED G9 bulb (6000K cool white). The bulb is replaceable, supporting a maximum of 40W. This fixture is hardwired and does not include a switch or operate on batteries.
- **Paintable Surface:** The white aluminum finish of the sconce can be painted to match your interior decor, allowing for seamless integration into any room.
- **Modern Design:** Crafted from high-quality aluminum, this fixture features high hardness and a refined, qualitative feel. Its modern aesthetic is ideal for living rooms, kitchens, dining rooms, bedrooms, stairwells, and hallways.

3. Safety Information

Please observe the following safety precautions to prevent injury or damage:

- Always disconnect power at the circuit breaker before installation, maintenance, or bulb replacement.
- This product is designed for indoor use only. Do not install in wet or damp locations.
- Ensure all wiring connections are secure and comply with local electrical codes. If unsure, consult a qualified electrician.
- Do not exceed the maximum wattage for the G9 bulb (40W).
- Wear appropriate personal protective equipment, such as gloves and eye protection, during installation.

4. Package Contents

Verify that all components are present before beginning installation:

- Wall Sconce Fixture(s)
- G9 LED Bulb(s)
- Mounting Hardware (circular mounting bracket, screws)

5. Installation

The modern wall sconces are designed for easy assembly and installation. Follow these steps for a complete installation:

1. **Step 1: Prepare for Installation.** Cut off the power supply at the main circuit breaker to the area where the light will be installed. It is recommended to wear protective gloves during this process.

Figure 5.1: Disconnect power before starting

2. **Step 2: Fix the Mounting Bracket.** Secure the circular mounting bracket onto the junction box using the provided screws. Ensure it is firmly attached.

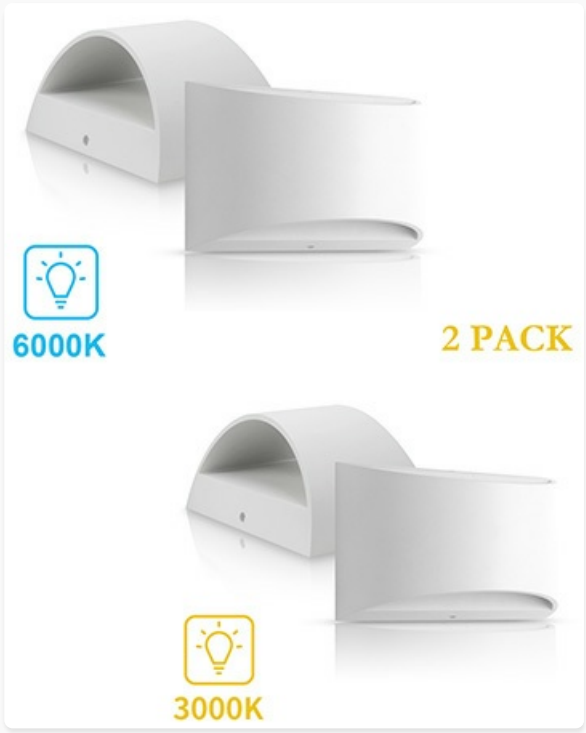

Figure 5.2: Attach mounting bracket

3. **Step 3: Connect Wiring and Insert Bulb.** Connect the correct wires from the fixture to your household circuit (standard 3-wire connection). Insert the G9 LED bulb into the lamp base.

Figure 5.3: Wire connections and bulb insertion

4. **Step 4: Mount the Fixture.** Carefully align the lamp fixture with the mounting bracket and secure it with the remaining screws. Once the fixture is securely in place, restore power at the circuit breaker.

6. Operation

Once properly installed and wired, the Aipsun LED Wall Sconce operates by controlling the power supply from your wall switch. There is no integrated switch on the fixture itself.

- Ensure the power is on at the circuit breaker.
- Use your existing wall switch to turn the light fixture ON or OFF.

7. Maintenance

Regular maintenance will help prolong the life and appearance of your wall sconce.

- **Cleaning:** To clean the fixture, ensure the power is off. Use a soft, dry cloth to wipe down the aluminum surface. Avoid abrasive cleaners or solvents that could damage the finish.
- **Bulb Replacement:** The G9 LED bulb is replaceable. If the bulb needs to be replaced, ensure power is off, carefully remove the old bulb, and insert a new G9 LED bulb (max 40W).

- **Painting:** The white aluminum surface can be painted to match your wall color. Ensure the fixture is clean and dry before applying paint. Follow paint manufacturer's instructions for application and drying times.

8. Troubleshooting

If you encounter issues with your Aipsun wall sconce, refer to the following common questions and solutions:

Problem	Possible Cause / Solution
Light does not turn on.	• Check if the power supply at the circuit breaker is ON. • Ensure all wiring connections are secure and correct. • Verify the G9 bulb is properly seated in its socket. • Test the G9 bulb with a known working fixture or replace it.
Light flickers.	• Ensure the G9 bulb is fully inserted and secure. • Check for loose wiring connections. • The provided bulb is non-flickering; if flickering persists, the bulb may be faulty and require replacement.
Fixture cannot be turned off/on via a switch on the unit.	This fixture is hardwired and does not include an integrated switch or plug. It is designed to be controlled by your existing wall switch. Ensure it is connected to a switched circuit.
Light output is too dim.	• Verify the installed G9 bulb's wattage and lumen output. • Ensure the bulb is not faulty.

9. Specifications
