

Donner DLH-001 7-String Lyre Harp Instruction Manual

1. INTRODUCTION

The Donner DLH-001 Lyre Harp is a 7-string musical instrument crafted from solid mahogany, featuring a bone saddle and carbon steel strings. Designed for beginners and children, it produces a clear and gentle sound, making it an ideal instrument for learning and relaxation. Its ancient Greece-style design adds an elegant aesthetic.

2. PRODUCT OVERVIEW

The DLH-001 Lyre Harp features a 7-string pentatonic design, tuned to 1(D4), 2(E4), 3(G4), 4(A4), 5(B4), 6(D5), 7(E5). This classical folk pentatonic mode is particularly suitable for beginners, as all notes sound harmonious together. The instrument's construction includes carbon steel keys for durability and a bone saddle to ensure optimal vibration transmission and stable tuning.

4. SETUP & TUNING

The lyre harp is easy to tune using the included tuning wrench. Each string is wrapped around a corresponding metal sound column. To adjust the tone, use the wrench to tighten or loosen the string tension. You can tune to the required scale according to the needs of the song. For fine-tuning, you may gently tap the wrench. It is recommended to use a tuning software or a twelve-frequency tuner for accuracy. New strings may require frequent re-tuning for the first week until they settle.

Exquisite craftsmanship and beautiful tone Best gift for kids, adults, and beginners

5. OPERATING (PLAYING)

The 7-string pentatonic scale (D4, E4, G4, A4, B4, D5, E5) is designed to be intuitive and easy to play, making it perfect for beginners. You can pluck the strings with your fingers or use the provided picks to create continuous, melodious sounds. Experiment with different strumming and plucking techniques to discover the instrument's full sonic potential.

6. MAINTENANCE

To ensure the longevity and optimal performance of your lyre harp, it is important to maintain it properly. Always wipe down the strings with the provided cleaning cloth after each use to remove any sweat, oils, or debris that can cause corrosion. Store the instrument in its gig bag to protect it from dust, moisture, and physical damage.

7. TROUBLESHOOTING

Strings Not Staying in Tune

New strings often require a 'break-in' period. It is common for new lyre harp strings to go out of tune frequently during the first few days or even a week of use. This is because the strings need time to stretch and settle. Continue to tune your lyre harp daily, and the strings will gradually stabilize and hold their tune for longer periods.

8. SPECIFICATIONS

Feature	Detail
Model Number	DLH-001 (EC2008-DN-DE)
Number of Strings	7
Body Material	Mahogany
String Material	Carbon Steel
Saddle Material	Bone
Item Weight	1.96 pounds
Product Dimensions	14 x 6.7 x 1 inches

9. WARRANTY & SUPPORT
