COMPATIBILITY

The Spigen Tough Armor Tech Protective Case (Model: ACS00378) is specifically designed for the following Apple iPad models:

- **iPad 10.2-inch (8th Generation, 2020)**
- **iPad 10.2-inch (7th Generation, 2019)**

Please verify your iPad model before installation to ensure proper fit and protection.

INSTALLATION

1. **Prepare your iPad:** Ensure your iPad is clean and free of dust or debris. If you use a screen protector, ensure it is properly applied and aligned. This case is designed to be compatible with Spigen screen protectors.
2. **Separate the case components:** The Tough Armor Tech case consists of two main parts: a soft TPU inner layer and a rigid polycarbonate outer shell. Carefully separate these two components.
3. **Install the inner layer:** Gently place your iPad into the soft TPU inner layer, ensuring all edges and corners are securely seated.
4. **Attach the outer shell:** Align the rigid polycarbonate outer shell with the TPU inner layer and snap it into place. Ensure all clips are engaged and the case fits snugly around your iPad.
5. **Verify installation:** Check that all ports, buttons, and camera cutouts are correctly aligned and accessible.

FEATURES AND USAGE

Dual-Layer Protection

The case features a dual-layer design, combining a flexible TPU interior with a durable polycarbonate exterior. This construction provides enhanced shock absorption and protection against drops and impacts, meeting military-grade certified standards with Air Cushion Technology in all corners.

Integrated Kickstand

An integrated kickstand allows for convenient hands-free viewing. To use, simply pull out the kickstand from the back of the case until it locks into position. Push it back in to retract.

Slim Profile

Despite its robust protection, the case maintains a relatively slim profile, adding minimal bulk to your device. It adds approximately 0.2 inches of thickness.

Image: Detail view highlighting the slim design of the case.

Raised Edges

The case features raised edges around the screen and camera lens. This design helps protect these vulnerable areas from direct contact with surfaces when the device is laid flat.

Do you. We got you.
Durable protection
in a slim frame.

MAINTENANCE

To keep your Spigen Tough Armor Tech case clean and in good condition:

- **Cleaning:** Use a soft, damp cloth to wipe down the exterior of the case. For stubborn dirt, a mild soap solution can be used. Avoid harsh chemicals or abrasive cleaners, as these may damage the material.
- **Drying:** Allow the case to air dry completely before reattaching it to your iPad.
- **Inspection:** Periodically inspect the case for any signs of wear or damage. If the case is significantly damaged, consider replacing it to ensure continued protection for your device.

TROUBLESHOOTING

If you encounter any issues with your Spigen Tough Armor Tech case, consider the following:

- **Case does not fit:** Double-check the compatibility section to ensure your iPad model is supported. Ensure the iPad is correctly aligned within the inner TPU layer before attaching the outer shell.
- **Buttons are stiff:** New cases may have slightly stiff buttons. With regular use, they should become more responsive. Ensure the case is properly seated around the iPad's buttons.
- **Kickstand not working:** Ensure the kickstand is fully extended until it clicks into place. If it feels loose or damaged, avoid forcing it and contact customer support.

SPECIFICATIONS

Attribute	Detail
