4. OPERATING INSTRUCTIONS

Follow these steps to operate your hair dryer effectively:

1. **Power On/Off:** Locate the main power switch on the handle. Slide it to the 'I' or 'II' position to turn on the hair dryer. Slide it to '0' to turn it off.
2. **Adjust Speed:** The power switch also controls the speed. Position 'I' is for medium speed, and 'II' is for turbo speed.
3. **Select Temperature:** Use the temperature control button, usually marked with '0', 'I', 'II', or symbols for cold,

medium, and hot. Press to cycle through the available temperature settings.

4. **Cold Air Function:** For a burst of cold air to set your hairstyle, press and hold the dedicated cold shot button (often marked with a snowflake icon). Release the button to return to the previous temperature setting.
5. **Using the Precision Nozzle:** This attachment directs airflow for precise styling and smoothing. Ideal for straightening hair sections.
6. **Using the Maxi Volume Diffuser:** This attachment distributes air gently, perfect for enhancing natural curls and adding volume at the roots. Hold the diffuser close to your scalp and move it in circular motions.

5. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and extends the lifespan of your hair dryer.

1. **Unplug:** Always ensure the hair dryer is unplugged from the power outlet and completely cooled down before cleaning.
2. **Clean the Exterior:** Wipe the exterior of the hair dryer with a soft, damp cloth. Do not use abrasive cleaners or solvents.
3. **Clean the Rear Grille:** The rear grille is removable for easy filter cleaning. Gently twist or pull the grille to detach it. Use a soft brush or a vacuum cleaner to remove any accumulated dust, lint, or hair from the filter. Reattach the grille securely after cleaning.
4. **Storage:** Store the hair dryer in a dry place, away from moisture and direct sunlight. Do not wrap the power cord tightly around the appliance, as this can damage the cord. Use the robust hanging ring for convenient storage.

6. TROUBLESHOOTING

If you encounter any issues with your hair dryer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Hair dryer does not turn on.	No power supply; ALCI safety plug tripped; damaged cord/plug.	Check if the plug is fully inserted. Press the 'RESET' button on the ALCI plug. Check the power outlet. If the cord or plug is damaged, do not use and contact support.
Low airflow or overheating.	Blocked air intake grille; internal overheating protection activated.	Unplug the hair dryer and allow it to cool down. Clean the rear air intake grille as described in the Maintenance section. Ensure there are no obstructions.
Hair dryer stops unexpectedly.	Overheating protection activated; ALCI safety plug tripped.	Unplug and let it cool down. Check and clean the air intake grille. Reset the ALCI plug.
Unusual noise or smell.	Internal malfunction; foreign object inside.	Immediately unplug the hair dryer. Do not use. Contact customer support for assistance.
