

Nuvita NUALST1083

Nuvita Sterieasy 1083 Electric Steam Bottle Sterilizer

Model: NUALST1083

1. INTRODUCTION

The Nuvita Sterieasy 1083 Electric Steam Bottle Sterilizer provides a fast and efficient way to sterilize baby bottles, pacifiers, and other accessories. Utilizing natural steam, it eliminates 99.9% of germs and bacteria in just 6 minutes, keeping contents sterile for up to 24 hours if the lid remains unopened. This manual provides essential information for safe and effective use of your sterilizer.

2. IMPORTANT SAFETY INFORMATION

Please read all instructions carefully before using the appliance and retain them for future reference. Failure to follow these instructions may result in injury or damage.

- This appliance is intended for household use only. Do not use outdoors.
- Always place the sterilizer on a stable, heat-resistant surface, out of reach of children.
- Do not immerse the base unit, power cord, or plug in water or other liquids.
- Exercise extreme caution when handling hot steam and hot components. Always allow the unit to cool before cleaning or storing.
- Unplug the sterilizer from the electrical outlet when not in use and before cleaning.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Use only distilled water to minimize limescale buildup on the heating plate.
- Ensure the lid is properly closed during operation to prevent steam leakage.
- Keep children away from the sterilizer during operation and when it is cooling down.

3. PACKAGE CONTENTS

Carefully unpack all components and ensure you have the following items:

- 1 x Sterilizer Base with Heating Plate
- 1 x Lower Rack for Bottles
- 1 x Upper Rack for Small Parts (pacifiers, teats)
- 1 x Central Frame
- 1 x Lid with Steam Outlet

1. Coperchio con uscita di sicurezza per il vapore. 2. Contenitore di sterilizzazione con piastra di riscaldamento. 3. Supporto centrale. 4. Contenitore per piccoli accessori. 5. Vassoio porta biberon.

1. Cover with steam outlet. 2. Sterilisation base with heating plate. 3. Central frame. 4. Upper rack for small parts. 5. Lower rack for bottles.

5. SETUP

1. **Unpack:** Remove all packaging materials and components from the box.
2. **Initial Cleaning:** Before first use, wash all removable parts (racks, central frame, lid) in warm soapy water, rinse thoroughly, and dry. Wipe the sterilizer base with a damp cloth.
3. **Assemble:** Place the central frame onto the sterilization base. Then, place the lower rack over the central frame, followed by the upper rack.
4. **Position:** Place the assembled sterilizer on a flat, stable, and heat-resistant surface, away from the reach of children. Ensure there is adequate ventilation around the unit.

6. OPERATING INSTRUCTIONS

1. **Prepare Items:** Wash all bottles, teats, and accessories thoroughly before placing them in the sterilizer.
2. **Add Water:** Pour 90ml of distilled water onto the heating plate of the sterilizer base. Do not overfill.
3. **Load Items:** Place bottles upside down in the lower rack. Arrange smaller items like pacifiers, teats, and bottle caps in the upper rack. Ensure items are not touching the heating plate directly.
4. **Close Lid:** Place the lid securely on top of the sterilizer.
5. **Power On:** Plug the sterilizer into a suitable electrical outlet. Press the power button located on the front of the unit. The indicator light will illuminate, signaling that the sterilization cycle has begun.
6. **Cycle Completion:** The sterilization cycle will take approximately 6 minutes. Once complete, the sterilizer will automatically switch off, and the indicator light will extinguish.
7. **Cool Down & Unload:** Allow the sterilizer to cool down for several minutes before opening the lid. Use tongs to carefully remove the sterilized items. Be aware of residual hot steam and water.
8. **Maintain Sterility:** If the lid remains unopened, the contents will stay sterile for up to 24 hours.

7. CLEANING AND MAINTENANCE

Regular cleaning helps maintain the efficiency and longevity of your sterilizer.

1. **Unplug and Cool:** Always unplug the sterilizer and allow it to cool completely before cleaning.
2. **Heating Plate Descaling:** Over time, mineral deposits (limescale) may build up on the stainless-steel heating plate. To descale, mix 50ml of white vinegar with 100ml of water and pour it onto the heating plate. Let it stand for 30 minutes to 1 hour, then pour out the solution and wipe the plate clean with a damp cloth. Rinse thoroughly. Repeat if necessary. Do not use abrasive cleaners or scourers.
3. **Other Components:** Wash the racks, central frame, and lid in warm soapy water. Rinse thoroughly and allow to air dry. These parts are not dishwasher safe.
4. **Exterior:** Wipe the exterior of the sterilizer base with a damp cloth. Do not use abrasive cleaning agents or solvents.
5. **Storage:** Store the clean and dry sterilizer in a cool, dry place, away from direct sunlight.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Sterilizer does not turn on.	Not plugged in; power outlet fault; unit fault.	Ensure the power cord is securely plugged into a working outlet. Try a different outlet. If the problem persists, contact customer support.
Sterilization cycle is too short or too long.	Incorrect water amount; limescale buildup.	Ensure exactly 90ml of water is added. Descale the heating plate as per cleaning instructions.
White/brown residue on heating plate.	Limescale buildup from tap water.	Descale the heating plate regularly using vinegar solution. Always use distilled water for operation.
Items are not completely dry after sterilization.	This is a steam sterilizer, not a dryer.	Steam sterilization leaves items wet. Allow items to air dry or use a clean, sterile cloth to dry them.

9. SPECIFICATIONS

- **Model Number:** NUALST1083
- **Dimensions (L x W x H):** 20 x 19 x 39 cm (7.87 x 7.48 x 15.35 inches)
