SereneLife PRTSLSUPB0608PDL

SereneLife Adjustable Stand Up Paddle-Board Paddle User Manual

Model: PRTSLSUPB0608PDL

INTRODUCTION

This manual provides instructions for the assembly, operation, and maintenance of your SereneLife Adjustable Stand Up Paddle-Board Paddle. This paddle is designed for use with SereneLife Free-Flow Inflatable SUP Stand Up Paddle-Boards models SLSUPB06 and SLSUPB08, and is compatible with other SUP paddleboards.

SETUP: ASSEMBLY INSTRUCTIONS

The paddle comes in three pieces for convenient transport and storage. Follow these steps to assemble your paddle:

1. **Connect the Middle Section:** Take the middle section of the paddle and align it with the bottom section (the one with the blade). Hold down the small locking button on the middle section while sliding the two pieces together until the button clicks into place, securing the connection.
2. **Connect the Top Section:** Take the top section (the handle) and align it with the assembled middle and bottom sections. Hold down the small locking button on the top section while sliding it into the middle section until the button clicks into place.
3. **Adjust Height:** Once fully assembled, the last section (top) of the paddle is adjustable. Refer to the 'Operating Instructions' section for details on adjusting the paddle height.

OPERATING INSTRUCTIONS: ADJUSTING AND USING YOUR PADDLE

Proper paddle adjustment is key for comfort and efficiency.

- **Adjusting Paddle Height:** The handle shaft can be adjusted up or down to achieve a comfortable length. To adjust, locate the adjustable anti-twist clamp on the upper shaft. Open the clamp, slide the handle to your desired height (typically 6-10 inches taller than your height for general paddling, or shorter for competition riding), and then securely close the clamp to lock it in place. The paddle is adjustable from 69 to 85 inches.
- **Floating Feature:** The paddle is designed with foam stuffed into its tubes. When fully assembled, the paddle will float on water for approximately 40 minutes. This feature helps prevent immediate loss if dropped in the water.

MAINTENANCE: CARE AND STORAGE

To ensure the longevity and performance of your paddle, follow these maintenance guidelines:

- **Rinsing:** After each use, especially in saltwater, rinse the paddle thoroughly with fresh water to remove salt, sand, and debris.
- **Drying:** Allow the paddle to dry completely before disassembling and storing to prevent corrosion or mildew.
- **Storage:** Disassemble the paddle into its three pieces for easy and hassle-free storage. Store it in a cool, dry place away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect all connections, buttons, and clamps for wear or damage. Ensure the locking buttons engage properly.

TROUBLESHOOTING: COMMON ISSUES

- **Paddle Sinking:** While the fully assembled paddle is designed to float for up to 40 minutes, individual disassembled pieces may not float or may sink more quickly. Always ensure all three sections are securely assembled and locked into place before use. If a section becomes disengaged, retrieve it immediately.
- **Difficulty Adjusting Height:** If the paddle height is difficult to adjust, ensure the anti-twist clamp is fully open. Clean any sand or debris from the shaft and clamp mechanism. If the issue persists, check for any damage to the clamp.
- **Loose Connections:** If paddle sections feel loose after assembly, ensure the locking buttons have fully engaged and clicked into place. If the buttons are not engaging, inspect them for damage or obstruction.

PRODUCT SPECIFICATIONS

Brand	SereneLife
Model Number	PRTSLSUPB0608PDL
Material	Plastic
Color	Blue
Sport Type	SUP Paddling
Skill Level	All
Adjustable Length	69 - 85 inches
Unit Count	1 Count
UPC	068888006675
GTIN	00068888006675
