TELWIN T-Charge 20 8a Evo Multifunction Battery Charger

Model: 807596

1. INTRODUCTION

The TELWIN T-Charge 20 8a Evo is a versatile electronic battery charger, charge maintainer, and tester designed for a wide range of 12V / 24V batteries, including WET, GEL, AGM, MF, PbCa, EFB, and Lithium types. It features an intuitive LCD display for easy parameter viewing and operation. This device incorporates advanced Pulse Tronic technology for optimized charging and maintenance, ensuring battery efficiency and longevity. It is equipped with various functions such as quick charge (BOOST), low-temperature charging (COLD), sulfated battery recovery (RECOVERY), and vehicle alternator/battery testing. Additionally, it can serve as a continuous power supply during battery changes to prevent loss of vehicle memory settings. Safety is paramount, with built-in protections against overload, short-circuit, and reverse polarity.

2. SAFETY INFORMATION

WARNING: Read all safety warnings and instructions before using this product. Failure to follow the warnings and instructions may result in electric shock, fire, and/or serious injury.

- Always wear eye protection and protective clothing when working with batteries.
- Ensure adequate ventilation when charging batteries, as they can emit explosive gases.
- Do not expose the charger to rain or wet conditions.
- Disconnect the power supply before making or breaking connections to the battery.
- Never charge a frozen battery.
- Keep out of reach of children.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

3. PRODUCT OVERVIEW

Figure 3.1: Front view of the TELWIN T-Charge 20 8a Evo charger, showing the main unit, red and black battery clamps, and eyelet terminal cables.

Figure 3.2: Close-up view of the charger's LCD display, indicating battery type, voltage (12V/24V), and charging status with numbered steps (1-8).

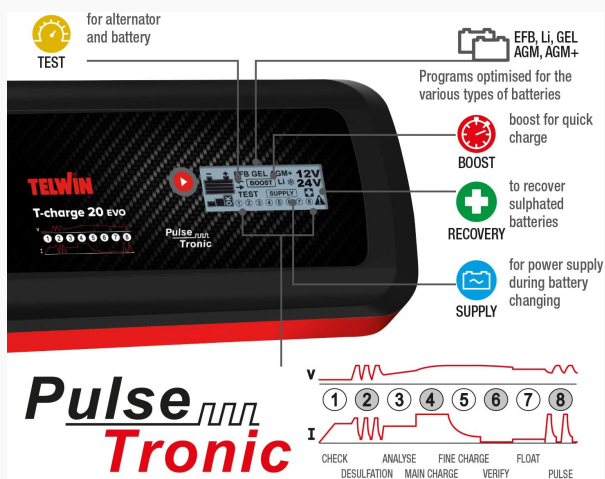

Figure 3.3: Diagram highlighting key features: BOOST for quick charge, RECOVERY for sulfated batteries, SUPPLY for power during battery changes, and TEST for alternator/battery checks. Also shows Pulse Tronic charging stages.

Figure 3.4: The included battery connection cables: one set with red and black clamps, and another set with eyelet terminals for permanent connection.

3.1. Components

- **Main Unit:** The charger body with LCD display and control button.
- **LCD Display:** Shows battery type, voltage, charging mode, and progress.
- **Control Button:** Used to select modes and confirm settings.
- **Battery Clamps (Red/Black):** For temporary connection to battery terminals.
- **Eyelet Terminals:** For semi-permanent connection to battery terminals.
- **Power Cable:** Connects the charger to the mains power supply.

4. SETUP

4.1. Initial Inspection

Before first use, inspect the charger and all accessories for any signs of damage. Do not use the device if any part is damaged.

4.2. Connecting to the Battery

1. Ensure the charger is disconnected from the mains power supply.
2. Identify the positive (+) and negative (-) terminals on your battery.
3. Connect the red (positive) clamp or eyelet terminal to the positive (+) battery terminal.
4. Connect the black (negative) clamp or eyelet terminal to the negative (-) battery terminal.
5. For vehicle batteries, connect the negative clamp to the vehicle chassis away from the battery and fuel line if the battery is still in the vehicle and the negative terminal is grounded. Consult your vehicle's manual for specific instructions.
6. Ensure connections are secure and free from corrosion.

4.3. Connecting to Power Supply

Once the battery connections are secure, plug the charger's power cable into a suitable 230V AC mains outlet.

5. OPERATING INSTRUCTIONS

5.1. Automatic Charging (Pulse Tronic)

The charger automatically detects the connected battery type and voltage (12V/24V) and initiates the appropriate Pulse Tronic charging program. The LCD display will show the selected battery type and the current charging stage (1-8).

- **Stage 1 (CHECK):** Initial battery analysis.
- **Stage 2 (DESULFATION):** Recovers sulfated batteries (RECOVERY function).
- **Stage 3 (ANALYSE):** Further battery condition assessment.
- **Stage 4 (MAIN CHARGE):** Bulk charging phase.
- **Stage 5 (FINE CHARGE):** Absorption charging phase.
- **Stage 6 (VERIFY):** Checks charge level.
- **Stage 7 (FLOAT):** Maintains full charge.
- **Stage 8 (PULSE):** Long-term maintenance charging.

5.2. Special Functions

Press the control button to cycle through available special functions:

- **BOOST Function:** For rapid charging. Select this mode for a quicker charge cycle.
- **COLD Function:** Optimizes charging for low-temperature environments. This ensures efficient charging even in cold conditions.
- **RECOVERY Function:** Specifically designed to restore sulfated batteries. The charger applies a pulsed current to break down sulfate crystals.
- **TEST Function:** Performs diagnostic tests on the vehicle's battery, starting system, and alternator. The display will show the test results.
- **SUPPLY Function:** Provides a stable power supply to the vehicle's electrical system during battery replacement. This prevents loss of vehicle memory settings (e.g., radio presets, ECU data).

To select a function, press the button until the desired function is highlighted on the LCD display, then release the button. The charger will automatically begin the selected operation.

5.3. Disconnecting the Charger

1. Disconnect the charger from the mains power supply first.
2. Disconnect the black (negative) clamp/eyelet from the battery or vehicle chassis.
3. Disconnect the red (positive) clamp/eyelet from the battery.

6. MAINTENANCE

6.1. Cleaning

Clean the charger's exterior with a soft, dry cloth. Do not use abrasive cleaners or solvents. Ensure the charger is unplugged before cleaning.

6.2. Storage

Store the charger in a cool, dry place, away from direct sunlight and extreme temperatures. Keep the cables neatly coiled to prevent damage.

6.3. Cable and Connector Care

Regularly inspect the cables and connectors for any signs of wear, cuts, or damage. Replace damaged cables immediately to prevent electrical hazards.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Charger does not turn on.	No power supply; faulty outlet; damaged cable.	Check power connection; try a different outlet; inspect power cable for damage.
Charger not charging battery.	Incorrect battery connection (reverse polarity); battery too deeply discharged; battery faulty.	Verify correct polarity (+ to +, - to -); allow charger to attempt recovery for deeply discharged batteries; test battery with another device or consult a professional.
Display shows error message.	Short circuit; reverse polarity; internal fault.	Disconnect from power and battery, then reconnect carefully; if error persists, contact support.
Charger gets warm during operation.	Normal operation; poor ventilation.	Some warmth is normal. Ensure adequate airflow around the charger. If excessively hot, disconnect and contact support.

8. SPECIFICATIONS

Feature	Detail
Brand	Telwin
Model Number	807596
Input Voltage	230 Volts AC
Output Voltage	12V / 24V DC (Automatic Selection)
Max Charging Current	8 A
Compatible Battery Types	WET, GEL, AGM, MF, PbCa, EFB, Lithium (Li)
Charging Technology	Pulse Tronic (8-stage automatic charging)
Special Functions	BOOST (quick charge), COLD (low temp charge), RECOVERY (desulfation), TEST (battery/alternator), SUPPLY (power supply)

Feature	Detail
Display	LCD
Protections	Overload, Short-circuit, Reverse Polarity
Item Weight	1 Kilogram
Color	Black, Red
Country of Origin	China

9. WARRANTY AND SUPPORT

This product is covered by a manufacturer's warranty. Please refer to the warranty card included in the product packaging for detailed terms and conditions. For technical support, troubleshooting assistance, or spare parts, please contact Telwin customer service or visit their official website. Keep your purchase receipt as proof of purchase for warranty claims.

Overview

T-CHARGE 20 EVO

cod. 807596

Multi-functional electronic battery charger, trickle charger and tester for WET, GEL, AGM, MF, PbCa, EFB, Li 12V/24V batteries with LCD display.

Charging and maintenance programs in Pulse Tronic dedicated to the technology of the selected battery. BOOST function for quick charge. Advanced function for charging and maintenance of batteries at low temperatures. Activation of the RECOVERY function enables recharging of sulphated batteries. Thaw the vehicle alternator and battery. Continuous and reliable power supply source during battery charging. Simplified use and immediate display of the parameters thanks to the LCD display.

Features:

- Automatic charge and maintenance in Pulse Tronic based on the technology of the selected battery.
- BOOST function for quick charge of the batteries.
- RECOVERY function to recover sulphated batteries.
- COLD function to charge and maintain batteries at low temperatures.
- TEST function for battery testing and diagnosis.
- SUPPLY function for stable power supply during battery charging.
- LCD display.
- Protection against overcharge, short circuit and polarity reversal.
- Complete with cable with clamps and cables with rings.
