Installation Instructions

The NPAUTO Interior Door Handle is designed for straightforward installation. Follow these general steps. For vehicle-specific details, consult your car's service manual or online resources.

Tools Required:

- Screwdriver set (Phillips and flathead)
- Plastic trim removal tools (recommended to prevent damage)
- Socket wrench set (if applicable)

General Installation Steps:

1. **Preparation:** Ensure the vehicle is off and the window is rolled down for easier access to the door panel.
2. **Remove Door Panel:** Carefully remove the interior door panel. This typically involves removing screws hidden under trim pieces, armrests, or door pulls, then gently prying the panel off. Refer to your vehicle's specific service manual for detailed door panel removal instructions.
3. **Disconnect Cables:** Once the door panel is loose, disconnect any electrical connectors (e.g., for

window switches, door locks) and the door handle cables/rods from the old handle assembly.

4. **Remove Old Handle:** Unscrew and remove the existing interior door handle from the door panel.
5. **Install New Handle:** Position the NPAUTO replacement handle (Model 80670-3TA0D) into the door panel opening. Secure it with the original screws.
6. **Reconnect Cables:** Reattach the door handle cables/rods and any electrical connectors to the new handle assembly. Test the handle's function before reassembling the door panel.
7. **Reassemble Door Panel:** Carefully align and reattach the door panel, ensuring all clips snap into place and screws are tightened.

Compatible With

2013-2017 Nissan Altima Sedan
2013-2017 Nissan Pathfinder
2014 Nissan Pathfinder (Hybrid)
2015 Nissan Titan
2017 Nissan Titan Regular Cab
2017 Nissan Titan Crew Cab (With Black Lock)
2016-2017 Nissan Titan XD
2015 Nissan Armada
2015-2017 Nissan Murano

Durable material for longevity

Easy to Install

Replace the old handles and fits perfect

If you are unsure about any step, it is recommended to seek professional assistance or consult a vehicle-specific repair guide.

Operating the Door Handle

To open the door from the inside, simply pull the interior door handle towards you. Ensure the door is unlocked before attempting to open it. The handle is designed for smooth and consistent operation.

Care and Maintenance

Proper care will extend the life and maintain the appearance of your door handle.

- **Cleaning:** Wipe the handle surface with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or solvents that may damage the finish or material.
- **Inspection:** Periodically check the handle for any signs of looseness, cracks, or damage. Ensure the mechanism operates smoothly without excessive force.
- **Lubrication:** If the handle mechanism feels stiff over time, a small amount of automotive-grade silicone lubricant can be applied to the moving parts. Be careful not to get lubricant on visible surfaces.

Troubleshooting Common Issues

| Problem | Possible Cause | Solution |
|--|--|--|
| Door handle feels loose | Mounting screws are loose or plastic tabs are damaged. | Remove door panel and tighten mounting screws. If tabs are damaged, replacement may be necessary. |
| Door does not open when handle is pulled | Door is locked; cable/rod disconnected or damaged; internal latch mechanism failure. | Ensure door is unlocked. Remove door panel to inspect and reattach/replace the cable or rod. If the latch is faulty, professional repair is advised. |

| | | |
|---------------------------|--|---|
| Handle is stiff or sticky | Lack of lubrication; debris in mechanism; internal component wear. | Clean the mechanism and apply a small amount of automotive lubricant. If the issue persists, internal wear may require replacement. |
