Victor M070

Victor M070 Safe-Set Power Kill Mouse Trap Instruction Manual

Model: M070

1. INTRODUCTION

The Victor M070 Safe-Set Power Kill Mouse Trap is designed for effective and humane mouse control. This reusable trap features a unique Safe-Set mechanism to prevent accidental triggers, ensuring safety during setup. Its design promotes a 100% catch and kill rate, providing quick and clean rodent disposal. This manual provides comprehensive instructions for safe and efficient use.

2. SAFETY INFORMATION

Always handle the trap with care. While the Safe-Set design minimizes accidental triggers, it is crucial to follow all instructions to ensure safety for users, children, and pets.

- **Placement:** Place traps in areas inaccessible to children and pets, or use them in locations where children and pets cannot reach them.
- **Baiting:** Use gloves when baiting to avoid transferring human scent to the trap, which can deter mice.
- **Disposal:** Always dispose of captured rodents hygienically and according to local regulations.
- **Cleaning:** Clean traps thoroughly after each use to maintain effectiveness and hygiene.

Safe For Use Around Children And Pets When Used As Directed

3. PRODUCT COMPONENTS

The Victor M070 Safe-Set Power Kill Mouse Trap consists of a durable plastic body with a powerful spring mechanism. Key components include:

- **Bait Cup:** A small, refillable cup designed to hold bait securely.
- **Bait Hood:** A protective cover over the bait cup that must be lifted by the mouse to trigger the trap, preventing accidental triggers.
- **Setting Mechanism:** A simple, one-click lever for arming the trap.
- **Release Handle:** A mechanism for easy, no-touch disposal of captured rodents.

4. SETUP INSTRUCTIONS

Follow these steps to prepare your Victor M070 mouse trap for use:

1. **Bait the Trap:** Open the bait hood and place a small amount of high-protein bait (e.g., peanut butter, hazelnut spread, or pet food) into the refillable bait cup. Ensure the bait is securely placed within the cup.
2. **Set the Trap:** Press the setting lever down until it clicks into place. The trap is now armed. The Safe-Set design prevents accidental triggering during this step.
3. **Place the Trap:** Position the activated trap in areas of suspected rodent activity. Mice typically travel along walls, so placing the trap perpendicular to a wall with the bait end facing the wall is recommended.

Simple To Use Set And Release With Just One Click

5. OPERATING INSTRUCTIONS

Once set and placed, the trap operates automatically:

- Mice are attracted to the bait in the cup.
- As a mouse attempts to access the bait, it must lift the bait hood, which triggers the trap mechanism.
- The trap springs closed, ensuring a quick and effective kill.
- Regularly check traps for activity.

6. MAINTENANCE

The Victor M070 trap is designed for reusability with proper maintenance:

1. **Disposal:** To dispose of a captured rodent, hold the trap over a waste receptacle and press the release handle. The rodent will drop out without requiring direct contact.
2. **Cleaning:** After disposal, clean the trap with warm, soapy water. Rinse thoroughly and allow to air dry completely before re-baiting and resetting. This removes odors that might deter future mice.
3. **Storage:** Store clean, unset traps in a cool, dry place away from children and pets.

7. TROUBLESHOOTING

If you encounter issues with your Victor M070 mouse trap, consider the following:

- **Bait Theft:** If bait is being taken without the trap triggering, ensure the bait is firmly pressed into the bait cup. For very small mice, consider using a larger, solid bait (e.g., a small nut) that cannot be easily removed without lifting the bait hood.
- **No Catches:**
 - **Location:** Relocate the trap to a different area where signs of rodent activity (droppings, gnaw marks) are more prevalent.
 - **Bait Type:** Experiment with different high-protein baits.
 - **Scent:** Ensure traps are clean and free of human scent.
- **Trap Not Setting:** Check for any obstructions in the mechanism. Ensure the setting lever is pressed down firmly until a distinct click is heard, indicating it is armed.

8. SPECIFICATIONS

Feature	Detail
Brand	Victor
Model Number	M070
Material	Plastic
Color	Gray
Product Dimensions	4"L x 2"W x 1.63"H
Item Weight	3.73 ounces (0.11 Kilograms)
Target Species	Mouse
UPC	072868722875

9. WARRANTY AND SUPPORT

Information regarding specific warranty details or direct customer support contacts for the Victor M070 Safe-Set Power Kill Mouse Trap is not available in the provided product data.
