Max & Lily 177209-131

Max & Lily Add-on Guard Rail Instruction Manual

Model: 177209-131

Important Safety Information

Please read all instructions carefully before assembly and use. Keep this manual for future reference. Failure to follow these warnings and instructions could result in serious injury or death.

- This add-on guard rail is designed for use with beds no higher than 30 inches off the ground. It is not intended for use on upper bunks or loft beds.
- For optimal safety, when using the bed with this guard rail, a mattress thickness of 5 inches is recommended. The mattress thickness should not exceed 8 inches to maintain the integrity and effectiveness of the guard rail.
- While this guard rail helps restrict access and provides an additional layer of protection, it does not prevent all accidents or injuries. Adult supervision is always recommended.
- This product is suitable for children aged 36 months and older.
- Ensure all hardware is securely tightened before use and periodically check for tightness.

Product Overview

The Max & Lily Add-on Guard Rail is constructed from solid New Zealand pine wood, featuring a durable, non-toxic, low VOC finish. It is designed to provide an extra layer of safety for children transitioning to a larger bed, helping to prevent accidental falls.

Package Contents

Verify that all components are present before beginning assembly:

- 1 x Max & Lily Add-on Guard Rail
- Required assembly hardware (screws)

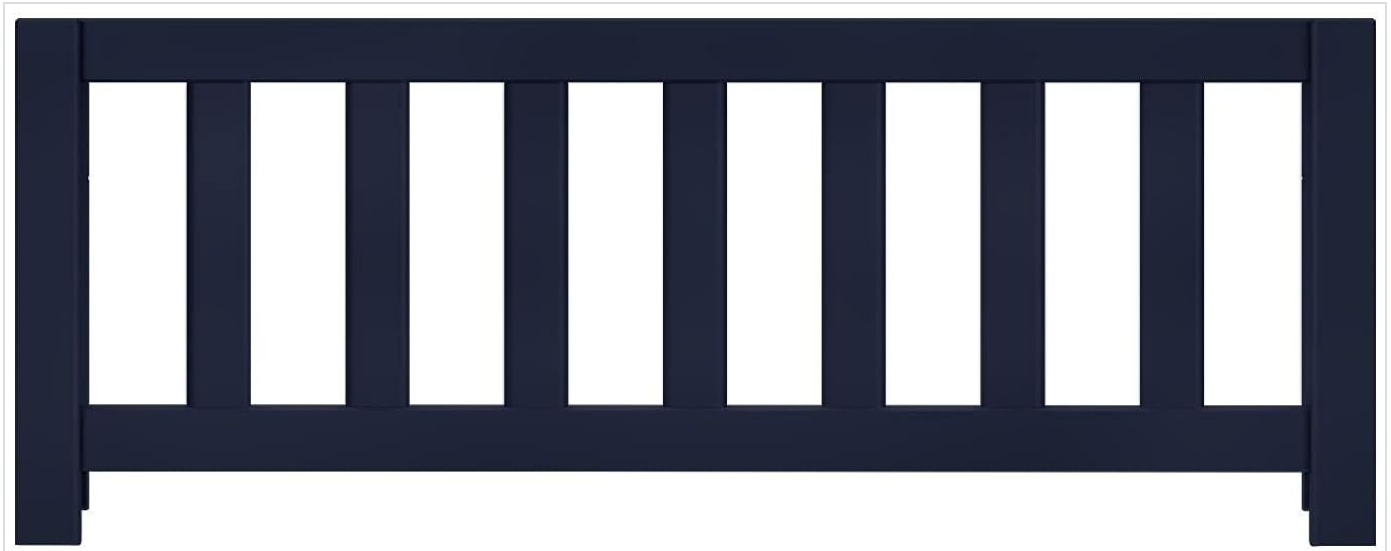

Setup and Installation

Follow these steps to securely attach the guard rail to your bed frame:

1. **Identify Mounting Location:** The guard rail is designed to attach to the bedside rail of your Max & Lily bottom bunk or single bed. Choose the desired position along the bedside rail.
2. **Align the Guard Rail:** Position the guard rail so that its U-shaped cut-out aligns with the top edge of the bedside rail. Ensure the guard rail sits flush against the bed frame.
3. **Secure with Screws:** Using the provided screws, fasten the guard rail to the bedside rail. It is essential to drill pilot holes if not already present to prevent wood splitting and ensure a secure attachment. Tighten all screws firmly but do not overtighten.
4. **Verify Stability:** Once installed, gently push and pull on the guard rail to ensure it is stable and does not wobble. Re-tighten screws if any movement is detected.

This image illustrates the U-shaped cut-out designed for secure attachment to the bedside rail, ensuring a stable fit.

Operating Instructions

The Max & Lily Add-on Guard Rail functions as a protective barrier to help prevent a child from rolling out of bed during sleep. Once installed, no further operation is required. The guard rail can be added, moved, or removed at any time as your needs change, provided it is properly secured each time.

Maintenance and Care

To ensure the longevity and appearance of your Max & Lily Add-on Guard Rail, follow these care instructions:

- **Cleaning:** Wipe the guard rail with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or furniture polish, as these can damage the finish.
- **Inspection:** Periodically inspect the guard rail for any signs of wear, damage, or loose hardware. Ensure all screws remain tight.
- **Finish:** The guard rail features a durable, non-toxic, low VOC finish. If minor scratches occur, touch-up paint may be available from the manufacturer.

Troubleshooting

If you encounter any issues with your guard rail, refer to the following common problems and solutions:

- **Guard rail feels loose:** Ensure all attachment screws are tightened securely. If the issue persists, check for any damage to the wood or hardware.
- **Difficulty attaching:** Verify that the U-shaped cut-out is correctly aligned with the bedside rail. Ensure you are using the correct hardware.
- **Guard rail does not fit:** Confirm that your bed frame is compatible with an add-on guard rail and that the dimensions of the guard rail match your bed's requirements. This guard rail is specifically designed for Max & Lily beds.
