New Direction Tackle P6 Rod Stabilizer Instruction Manual

Model: KGIW -GW A-198

INTRODUCTION

The New Direction Tackle P6 Rod Stabilizer is designed to enhance the stability of your fishing rod pod or bank sticks, particularly on soft ground. It prevents unwanted rotation, ensuring your setup remains secure during use. This stabilizer is compatible with most standard rod and bank stick brands.

SETUP

To install the P6 Rod Stabilizer:

1. Identify the desired position on your rod pod leg or bank stick where additional stability is needed.
2. Place the stabilizer around the rod pod leg or bank stick.
3. Tighten the integrated thumb screw until the stabilizer is securely fastened. Ensure it is firm but do not overtighten.
4. Adjust the stabilizer's orientation if necessary to provide optimal ground contact and prevent rotation.

The image shows the P6 Rod Stabilizer securely fastened to a rod pod leg, demonstrating its position close to the ground for stability.

OPERATING INSTRUCTIONS

Once installed, the P6 Rod Stabilizer operates passively by providing a wider base of support and increased friction with the ground. No further adjustments are typically required during normal use. Periodically check the tightness of the thumb screw to ensure continued stability, especially after moving your setup.

MAINTENANCE

The P6 Rod Stabilizer is constructed from durable aluminum and requires minimal maintenance.

- After each use, wipe down the stabilizer with a damp cloth to remove dirt, mud, or debris.
- Ensure the thumb screw mechanism is free of grit to allow for smooth operation.
- Store in a dry place to prevent any potential corrosion, although aluminum is highly resistant.

- Inspect for any signs of wear or damage before each use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Rod pod still rotates or feels unstable.	Stabilizer not tightened sufficiently or improperly positioned.	Ensure the thumb screw is firmly tightened. Reposition the stabilizer for better ground contact. Consider using both stabilizers if only one is currently in use.
Thumb screw is difficult to turn.	Dirt or debris in the screw threads.	Clean the screw threads thoroughly. Apply a small amount of silicone lubricant if necessary.

SPECIFICATIONS

Feature	Detail
Brand	New Direction Tackle
Model Number	KGIW -GW A-198
Material	Aluminum
Color	Black
Item Weight	240 g
Product Dimensions	4 x 4 x 6 cm
Special Feature	Rod Pod Stabilizer
Assembly Required	No
Batteries Included	No
Batteries Required	No
First Available Date	August 17, 2021

WARRANTY INFORMATION

This product is covered by the manufacturer's standard warranty. For specific details regarding warranty terms, duration, and claims process, please refer to the documentation provided with your purchase or contact New Direction Tackle directly.

SUPPORT

For additional support, product information, or inquiries, please visit the official New Direction Tackle website or search for "New Direction Tackle" on major search engines like Google or video platforms like YouTube for instructional content and demonstrations.

You can often find helpful resources and contact information directly from the manufacturer's online presence.
