## 2. SETUP

---

### 2.1 Unpacking and Initial Inspection

Carefully remove all components from the packaging. Inspect the television and accessories for any signs of damage. Retain the packaging for future transport or service needs.

### 2.2 Stand Installation (Tabletop)

If using the tabletop stand, attach the stand feet to the bottom of the television using the provided screws. Ensure the stand is securely fastened before placing the TV on a stable, flat surface.

### 2.3 Wall Mount Installation

For wall mounting, use the included wall mount bracket. Follow the instructions provided with the wall mount kit for proper and secure installation. Professional installation is recommended for wall mounting.

### 2.4 Power Connection

Connect the power cable to the TV's power input and then to a suitable electrical outlet. Ensure the power supply matches the TV's requirements.

### 2.5 Initial Power-On and Remote Pairing

Upon first power-on, the TV will guide you through the initial setup process. This includes language selection and remote pairing. If the remote does not pair automatically, press and hold the Home button on the remote for 15 seconds to initiate pairing.

## 3. OPERATING INSTRUCTIONS

---

### 3.1 Fire TV OS Navigation

The Onida 43FIF operates on the Fire TV OS, providing a user-friendly interface for accessing streaming content and applications. The home screen displays recommended content, recently used apps, and various input options.

## 8. MAINTENANCE

---

### 8.1 Cleaning the Screen

To clean the screen, gently wipe it with a soft, lint-free cloth. For stubborn marks, slightly dampen the cloth with water or a screen-cleaning solution specifically designed for electronics. Avoid using harsh chemicals or abrasive materials.

### 8.2 Cleaning the TV Body

Wipe the TV's body and stand with a soft, dry cloth. Do not use liquid cleaners directly on the TV.

### 8.3 Software Updates

Ensure your TV is connected to the internet to receive automatic software updates. These updates provide new features, performance improvements, and security enhancements. You can check for updates manually in the TV's settings menu.

## 9. TROUBLESHOOTING

---

### 9.1 No Signal Detected

If you see a "No Signal Detected" message, verify that the connected device (e.g., set-top box, gaming console) is powered on and properly connected to the correct HDMI port. Use the remote to cycle through input sources or use the voice command "Switch to HDMI [number]" to select the correct input.

### 9.2 Remote Not Responding

Check the batteries in the remote control and replace them if necessary. If the remote is still unresponsive, try re-pairing it by pressing and holding the Home button for 15 seconds.

### 9.3 Slow Performance or App Crashes

If the TV's interface feels slow or apps crash, try restarting the TV by unplugging it from the power outlet for a few minutes and then plugging it back in. Ensure your internet connection is stable and sufficient for streaming. Clearing app caches or reinstalling problematic apps may also help.

### 9.4 Picture or Sound Issues

For picture or sound quality issues, check the source device and its connections. Adjust the TV's picture and sound settings in the menu. If using external audio equipment, ensure it is correctly connected and configured.
