Tommee Tippee Closer to Nature 3 in 1 Convertible Glass Baby Bottles User Manual

Model: 52281505

INTRODUCTION

The Tommee Tippee Closer to Nature 3 in 1 Convertible Glass Baby Bottles are designed to simplify the transition between breast and bottle feeding. These bottles feature a breast-like nipple and a built-in anti-colic valve, aiming for high acceptance rates among infants. Crafted from premium 100% medical-grade glass, the versatile 3-in-1 design allows for continued use as a baby bottle, food jar, or open cup as your child grows.

SAFETY INFORMATION

Always ensure proper hygiene before and after each use. Inspect all components before feeding. Do not heat glass bottles directly on a stovetop or in a microwave with liquid inside, as this can create hot spots and cause injury. Always check the temperature of the milk or food before feeding your baby. Glass bottles, while durable, can break if dropped or subjected to extreme temperature changes. Supervise children during feeding. Keep all components out of reach of children when not in use.

PRODUCT OVERVIEW

The Tommee Tippee Closer to Nature 3 in 1 Convertible Glass Baby Bottles set includes:

- Three 9-ounce medical-grade borosilicate glass bottles
- Three breast-like silicone nipples with anti-colic valves
- Three screw rings
- Three nipple caps
- Three travel jar lids (for converting to food jars)
- Three cup rings (for converting to open cups)

Image: A single bottle highlighting its 9 fl oz capacity, glass material, and that it comes in a 3-count pack.

SETUP AND ASSEMBLY

1. **Initial Cleaning:** Before first use, disassemble all components (bottle, nipple, screw ring, cap). Wash thoroughly in warm soapy water or on the top rack of a dishwasher. Sterilize all parts using a sterilizer, boiling water, or a cold water sterilization solution.
2. **Assembling for Feeding:** Insert the nipple into the screw ring until it clicks into place. Ensure the anti-colic valve is properly aligned. Fill the glass bottle with desired liquid (milk, formula). Screw the assembled nipple and screw ring onto the bottle until secure. Place the nipple cap over the nipple for hygiene if not using immediately.
3. **Converting to Food Jar:** Remove the nipple and screw ring. Ensure the bottle is clean and dry. Place the travel jar lid securely onto the bottle. This allows for convenient storage of purees or snacks.
4. **Converting to Open Cup:** Remove the nipple and screw ring. Place the cup ring onto the bottle. This provides a stable rim for toddlers learning to drink from an open cup.

Feeding Your Baby

- **Preparation:** Always prepare formula according to manufacturer's instructions. If using breast milk, ensure it is stored and thawed correctly.
- **Temperature Check:** Before feeding, always check the temperature of the milk by shaking a few drops onto the inside of your wrist. It should feel lukewarm, not hot.
- **Feeding Position:** Hold your baby in a comfortable, semi-upright position. Ensure the nipple is full of milk to minimize air intake.
- **Nipple Flow:** Tommee Tippee Closer to Nature nipples are available in various flow rates (slow, medium, fast, vari-flow) to suit your baby's needs as they grow. Select the appropriate flow for your baby's age and feeding style.

Breast-like nipple

The soft silicone nipple feels closer to skin and flexes like mom for a comfortable feed.

Image: Demonstrates the breast-like nipple design, which flexes like a mother's breast for a comfortable feed.

Natural latch

The most easily accepted and breast-like nipple, ever! 95% of moms reported baby accepted our nipple. *

Image: Illustrates the natural latch promoted by the nipple design, highlighting high acceptance rates among babies.

MAINTENANCE AND CARE

Cleaning

For hygiene, always wash the product immediately after use. Disassemble all parts before cleaning.

- **Hand Washing:** Wash all components in warm soapy water using a bottle brush for thorough cleaning. Rinse thoroughly with clean water.
- **Dishwasher:** All components are safe for the top rack of a dishwasher. Avoid placing them near heating elements.
- **Sterilization:** The glass bottles and silicone nipples can be sterilized using a steam sterilizer, boiling water (for 5 minutes), or a cold water sterilization solution. Ensure all parts are completely dry before storing.

Image: Illustrates the ease of cleaning the bottle with a brush, ensuring no milk residue or scent remains.

Storage

Store all clean and dry components in a clean, dry place away from direct sunlight or heat. Do not store with solvents or harsh chemicals.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Leaking from bottle	Nipple not seated correctly in screw ring; screw ring not tightened sufficiently; damaged nipple or screw ring.	Ensure nipple is pulled through the screw ring until fully seated. Tighten screw ring firmly but do not overtighten. Inspect nipple and screw ring for damage and replace if necessary.
Baby struggling to feed / slow flow	Nipple flow rate too slow for baby's age; anti-colic valve blocked; nipple collapsed.	Consider using a nipple with a faster flow rate. Check anti-colic valve for blockages and clear if needed. Ensure nipple is not collapsed during feeding; check for proper air circulation.
Baby showing signs of colic / excessive gas	Air intake during feeding; anti-colic valve not functioning correctly.	Ensure nipple is always full of milk during feeding. Check anti-colic valve for proper function and cleanliness. Consult a healthcare professional if symptoms persist.
Bottle appears stained or retains odor	Residue buildup from milk/food.	Glass bottles are naturally stain-resistant. Ensure thorough cleaning immediately after each use. Use a bottle brush and warm soapy water. Sterilize regularly.

SPECIFICATIONS

- **Model Number:** 52281505
- **Capacity:** 9 ounces (260ml) per bottle
- **Material:** Medical-grade borosilicate glass (bottle), Silicone (nipple)
- **Material Free:** BPA Free, BPS Free, Phthalate Free
- **Product Dimensions:** Approximately 3.23 x 9.37 x 6.77 inches (packaging)
- **Item Weight:** Approximately 1.76 pounds (total for 3 count)
- **Care Instructions:** Hand wash, dishwasher safe (top rack), sterilizer safe, bottle warmer safe.
- **Nipple Type:** Smooth silicone anti-colic nipple
