# SoleTek Cool Running No Show Wicking Sock

Instruction Manual

## INTRODUCTION

Welcome to the SoleTek Cool Running No Show Wicking Sock instruction manual. These socks are designed for optimal comfort and performance, featuring advanced wicking fibers and ventilation panels to keep your feet cool and dry. The engineered fit ensures they stay in place during any activity, while cushion panels provide impact absorption. This manual provides essential information on the proper use and care of your SoleTek socks to ensure their longevity and your satisfaction.

## SETUP: BEFORE FIRST USE

Before wearing your new SoleTek Cool Running No Show Wicking Socks for the first time, it is recommended to wash them. This helps to set the fibers and ensures maximum comfort and performance from the initial wear.

- Machine wash your socks in cold water with like colors.
- Do not use bleach or fabric softeners, as these can degrade the wicking properties of the fabric.
- Tumble dry on low heat or air dry to preserve elasticity and fit.

## OPERATING: WEARING YOUR SOCKS

SoleTek Cool Running No Show Wicking Socks are designed to provide superior comfort and support during various activities. Follow these guidelines for optimal experience:

- **Proper Fit:** Ensure the sock is pulled up fully and the heel cup is properly seated around your heel. The unique arch band is designed to support the plantar fascia and should feel snug but not restrictive.
- **Activity Use:** These socks are ideal for running, training, walking, and general athletic activities. The wicking fibers and ventilation panels work best when your feet are active, moving moisture away from your skin.
- **No-Show Design:** The low-cut design is intended to remain hidden within most athletic shoes, providing a sleek look while offering full foot protection.

## MAINTENANCE: CARE INSTRUCTIONS

Proper care will extend the life and performance of your SoleTek socks. Always follow these instructions:

- **Washing:** Machine wash in cold water. Using cold water helps preserve the fabric's integrity and color.
- **Detergent:** Use a mild detergent. Avoid harsh chemicals, bleach, or fabric softeners, as they can clog the wicking fibers and reduce the sock's breathability and moisture management properties.
- **Drying:** Tumble dry on low heat or, ideally, air dry. High heat can damage the elastic fibers and lead to shrinkage or loss of shape. Laying flat to dry is recommended for best results.
- **Storage:** Store socks in a cool, dry place away from direct sunlight.

## TROUBLESHOOTING

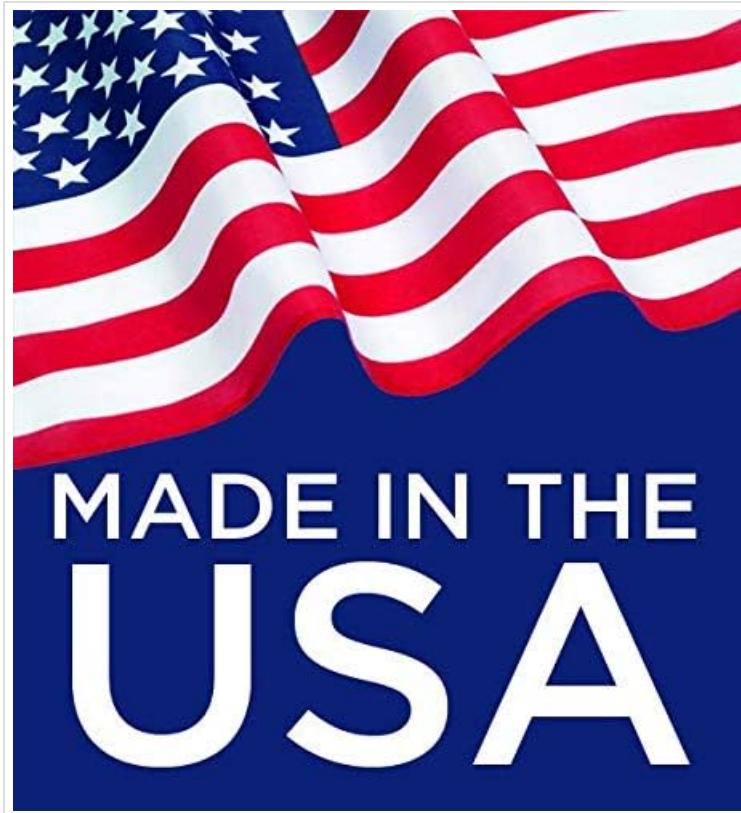

Here are some common concerns and their potential solutions:

| Problem                                    | Possible Cause / Solution   |
|--|---|
| Socks feel too tight or too loose.         | Ensure you have selected the correct size based on your shoe size. Refer to the size guide if available. Socks are designed to be snug for performance. |
| Socks appear to have shrunk after washing. | This can occur if washed in hot water or dried on high heat. Always follow the care instructions: machine wash cold and tumble dry low or air dry.      |
| Feet still feel sweaty or uncomfortable.   | Ensure socks are clean before each use. Avoid using fabric softeners, which can reduce wicking effectiveness. Ensure your footwear is also breathable.  |

## SPECIFICATIONS

| Feature | Detail |
|---------|--------|
|         |        |

| Feature            | Detail   |
|--------------------|--|
| Model Number       | STRN   |
| Fabric Composition | 51% Polyester, 42% Nylon, 7% Elastane  |
| Department         | Unisex-Adult   |
