Max & Lily 180214-121

Max & Lily Twin Over Twin Low Bunk Bed with Ladder, Model 180214-121 - Instruction Manual

GREY LOW BUNK

Introduction

This instruction manual provides essential information for the safe assembly, operation, and maintenance of your Max & Lily Twin Over Twin Low Bunk Bed with Ladder. Designed with solid New Zealand pine wood, this low-profile bunk bed features a grey finish, 14-inch safety guardrails, and an angled ladder. Please read this manual thoroughly before assembly and use to ensure proper installation and long-term enjoyment of your product.

Safety Information

To prevent serious injury, observe the following statements and warnings. Failure to follow these guidelines may result in serious or fatal injury.

- Do not use the ladder until it is properly installed and secured.
- Only one (1) user is permitted on the ladder at a time, with a maximum weight of 200 lbs.
- Always use two hands when climbing or descending the ladder.
- Always face the ladder when climbing or descending.
- Do not carry heavy loads while using the ladder.
- Keep your body centered between the sides of the ladder.
- Do not jump off or onto the ladder or bunk bed.
- Ensure all connections are tight and secure before each use.
- The top bunk is intended for children aged 6 years and older.
- Use only mattresses that meet the recommended dimensions and thickness to ensure proper guardrail height.

Setup and Assembly

The Max & Lily Twin Over Twin Low Bunk Bed is designed for straightforward assembly. All necessary hardware and a comprehensive instruction manual are included to guide you through the process. Two adults are recommended for assembly.

- **Unpacking:** Carefully unpack all components and verify against the parts list provided in the included manual.
- **Tools:** Basic tools for assembly are included. A power drill set to a low torque setting may expedite the process, but exercise caution to avoid overtightening.
- **Ladder Placement:** The angled ladder can be installed on either the left or right side of the bunk bed to best suit your room layout.
- **Hardware:** Ensure all flush, color-matched hardware is securely fastened.

This image highlights several features: the low-profile design suitable for young children, an angled ladder for easy climbing, and the use of 100% solid New Zealand pine wood. It also shows the 31.25 inches of headroom with a 5-inch mattress and the 400lb weight capacity.

This image displays the bunk bed frame without mattresses, revealing the sturdy wooden slats that support each sleeping surface and the attachment points for the ladder.

Upon completion of assembly, double-check all connections to ensure stability and safety. Disassembly for relocation is also designed to be straightforward.

Operating Instructions

This bunk bed is designed for safe and comfortable use by children. Please adhere to the following operational guidelines:

- **Weight Capacity:** Each sleeping surface (top and bottom bunk) is capable of supporting up to 400 lbs.
- **Mattress Requirements:** Use a standard twin-size mattress. The recommended mattress thickness is 5 inches, not exceeding 8 inches, to maintain adequate guardrail height on the top bunk.
- **Low-Profile Design:** The bed's 50-inch height and 2-inch underbed clearance make it suitable for younger children and rooms with lower ceilings, enhancing safety and accessibility.
- **Ladder Use:** Always use the angled ladder for access to the top bunk. Ensure the ladder is firmly attached before climbing.

A young child is shown safely climbing the angled ladder of the bunk bed, demonstrating its ease of use.

Maintenance

Regular maintenance will help prolong the life and safety of your bunk bed.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the non-toxic, low-VOC finish.
- **Hardware Check:** Periodically inspect all bolts, screws, and connections to ensure they remain tight. Retighten as necessary to maintain structural integrity.
- **Structural Integrity:** Check for any signs of wear, damage, or loose components. Address any issues promptly to prevent potential hazards.
- **Environmental Conditions:** Avoid placing the bed in direct sunlight or near heat sources, which can cause wood to dry out or warp. Maintain a stable room temperature and humidity.

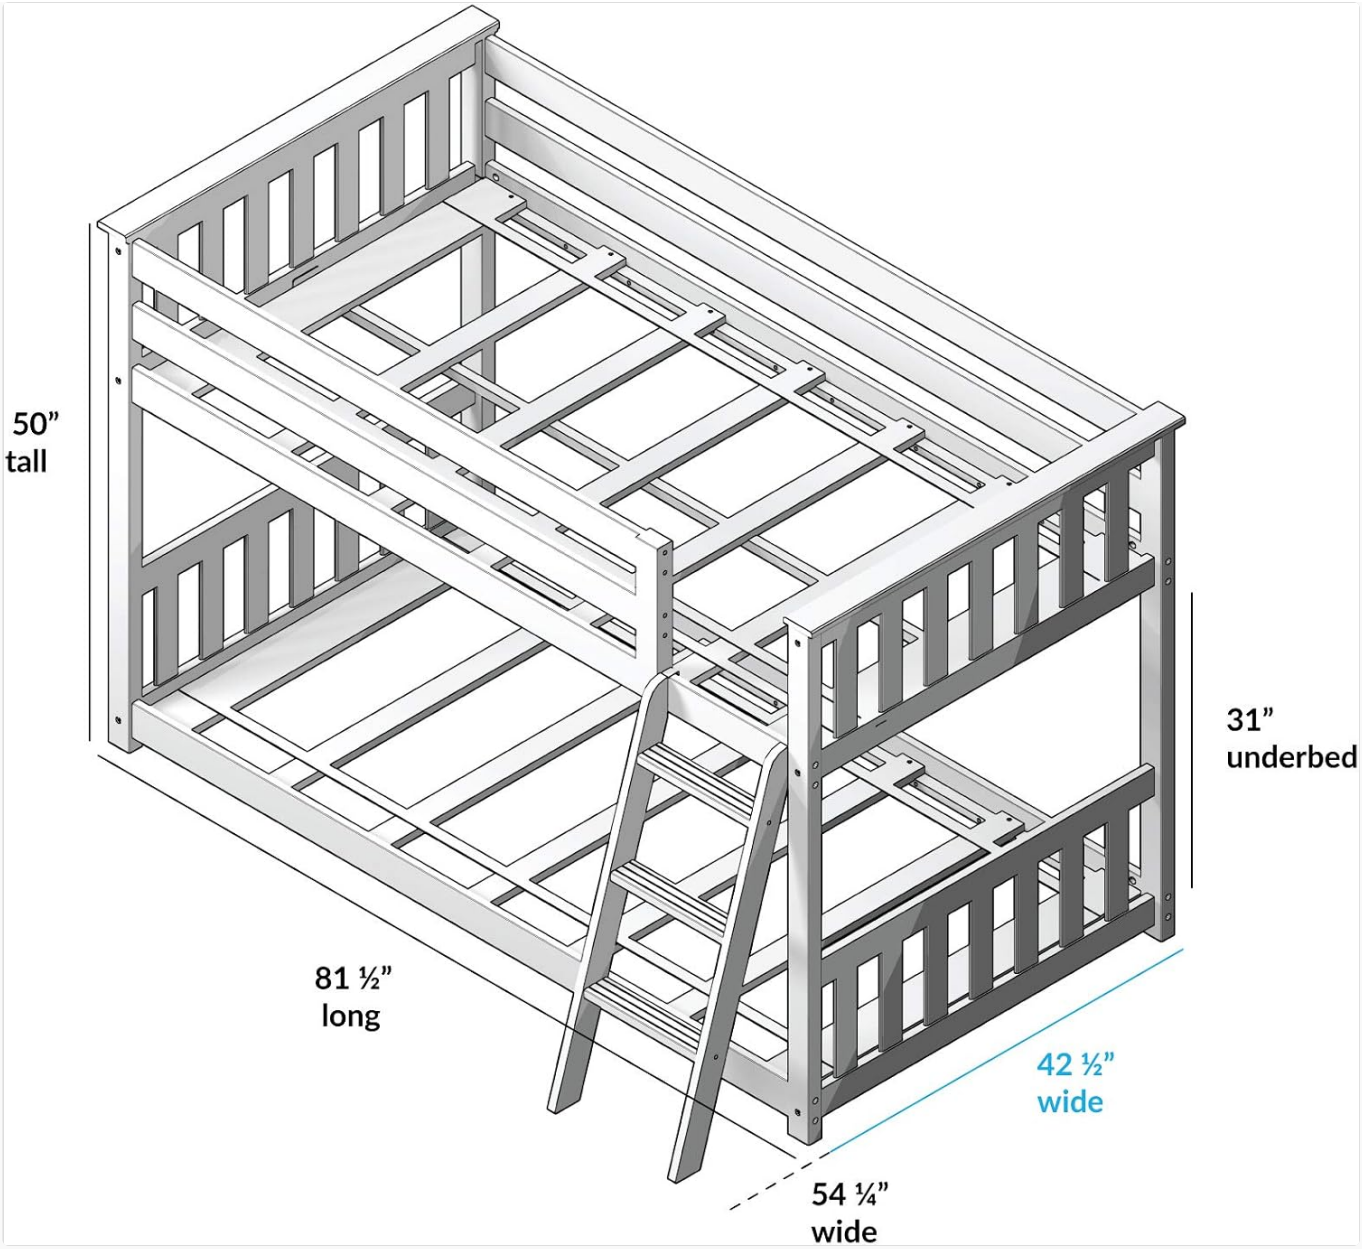

Troubleshooting

If you encounter any issues with your bunk bed, consider the following common solutions:

- **Wobbling or Instability:** This is typically caused by loose connections. Re-check and tighten all bolts and screws throughout the entire frame. Ensure the bed is on a level surface.
- **Ladder Issues:** If the ladder feels unstable or makes noise, verify that it is correctly hooked onto the bunk and that any securing screws are fully tightened. Ensure the ladder's feet are making proper contact with the floor.
- **Noise (Squeaking/Creaking):** Tighten all hardware. If noise persists, apply a small amount of lubricant (e.g., paraffin wax) to the joints where wood meets wood, or where metal hardware connects.
- **Metal Support Bar:** The bunk bed includes a metal support bar for added stability. Ensure this bar is correctly positioned and secured according to the assembly instructions. If there are concerns about exposed edges, consider adding padding for safety.

Specifications

Feature	Detail
Size	Twin/Twin
Product Dimensions (L x W x H)	81.5"L x 54.25"W x 50"H
Color	Grey
