NORTHWEST ENTERPRISES 001

NORTHWEST ENTERPRISES Ultrasonic Jewelry Cleaner Solution

Model: 001 - 8 Fl Oz (Pack of 2)

INTRODUCTION

The NORTHWEST ENTERPRISES Ultrasonic Jewelry Cleaner Solution is a concentrated formula designed for effective cleaning of various non-porous precious and semi-precious jewelry. This solution is suitable for use with ultrasonic cleaning machines or for manual cleaning methods. It helps restore shine, reduce tarnish, and remove dirt and grime from items such as gold, silver, platinum, diamonds, rubies, sapphires, topaz, amethyst, aquamarine, garnet, eyeglasses, watches, bracelets, rings, and necklaces.

KEY FEATURES

- **UltraSonic Cleaner Solution:** Specifically formulated for sonic jewelry cleaning machines to safely clean and remove tarnish from gold, platinum, diamonds, rubies, sapphires, topaz, amethyst, aquamarine, garnet, and other non-porous precious and semi-precious gem jewelry.
- **Easy to Use Unique Formula:** A concentrated liquid that mixes with water to quickly and safely remove daily build-up, smudges, lotions, and fingerprints.
- **Multipurpose:** Also effective for cleaning eyeglasses, watches, bracelets, rings, necklaces, and earrings. Provides a deeper clean than wipes.
- **Gentle Yet Effective:** Specially formulated to deep clean without harming jewelry with abrasive chemicals. Can be used as a dip, in a machine, or in a spray bottle.
- **Biodegradable and Non-Toxic:** Environmentally friendly and safe for household use.

SETUP

Before using the NORTHWEST ENTERPRISES Ultrasonic Jewelry Cleaner Solution, ensure you have a clean ultrasonic cleaning machine or a suitable container for manual cleaning, along with distilled or deionized water.

Preparing the Solution

1. For ultrasonic machines, pour 1 ounce (30 ml) of the concentrated solution into the tank.

2. Add 5 ounces (147 ml) of distilled or deionized water to the concentrate. This creates the optimal cleaning mixture.
3. For manual cleaning, adjust the ratio as needed for your container size, maintaining a 1:5 solution to water ratio.

OPERATING INSTRUCTIONS

Using with an Ultrasonic Machine

1. Prepare the solution as described in the 'Setup' section.
2. Carefully place your jewelry into the ultrasonic cleaner's basket. Ensure items are fully submerged in the cleaning solution.
3. Close the lid of the ultrasonic cleaner.
4. Turn on the ultrasonic cleaner and set it for the recommended cleaning cycle, typically 3 minutes. Refer to your ultrasonic machine's manual for specific settings.
5. Once the cycle is complete, carefully remove the basket with the cleaned jewelry.
6. Rinse the jewelry thoroughly under clean running water.
7. Dry the jewelry with a soft, lint-free cloth. Repeat the process if necessary for heavily soiled items.

Manual Cleaning (Without an Ultrasonic Machine)

1. Prepare the solution in a suitable container (e.g., a bowl or cup) as described in the 'Setup' section.
2. Submerge your jewelry in the solution.
3. Use a soft brush (like a soft-bristled toothbrush) to gently remove any loosened deposits from gems and stone settings.
4. After cleaning, rinse the jewelry thoroughly under clean running water.

5. Carefully dry the jewelry with a clean, soft cloth. Repeat if needed.

CARE AND MAINTENANCE

- Store the concentrated solution in a cool, dry place away from direct sunlight.
- Keep the bottle tightly closed when not in use.
- Dispose of used solution responsibly according to local regulations. While biodegradable, avoid pouring large quantities directly into drains.
- Regular cleaning of your jewelry will help maintain its luster and prevent heavy build-up.

TROUBLESHOOTING

If your jewelry does not appear clean after the first cycle:

- Ensure the correct solution-to-water ratio was used.
- Increase the cleaning time or run an additional cycle.

- For heavily soiled items, a gentle scrub with a soft brush before or after the ultrasonic cycle can improve results.
- Ensure the ultrasonic cleaner is functioning correctly (if applicable).
- Verify that the jewelry material is suitable for ultrasonic cleaning and this solution (non-porous precious and semi-precious metals and stones).

SPECIFICATIONS

Attribute	Detail
Product Name	Ultrasonic Cleaner Solution for Jewelry Cleaning
Brand	NORTHWEST ENTERPRISES
Model Number	001
Item Form	Liquid (Concentrated)
Scent	Unscented
Unit Count	16.0 Fl Oz (8 Fl Oz per bottle, Pack of 2)
