OPERATING INSTRUCTIONS

The hand shower offers three distinct spray patterns, easily selectable via the GROHE SmartTip control located on the showerhead. The maximum flow rate is 1.75 gallons per minute (GPM).

- **Rain Spray:** A gentle and wide spray pattern designed for full body coverage and relaxation.
- **ActiveMassage Spray:** A vigorous, targeted spray that provides a pulsating massage effect.
- **Jet Spray:** A powerful, concentrated spray ideal for rinsing or a stimulating shower.

To switch between spray patterns, press the SmartTip button on the back of the showerhead. Each press cycles through the available spray options.

MAINTENANCE

To ensure the longevity and optimal performance of your GROHE Rainshower SmartActive Hand Shower, regular maintenance is recommended.

- **Cleaning the Finish:** The GROHE StarLight chrome finish can be cleaned with a soft cloth and mild soap. Avoid abrasive cleaners, scouring pads, or harsh chemicals, as these can damage the finish.
- **Limescale Removal:** The Speed Clean anti-lime system allows for easy removal of limescale from the nozzles. Simply wipe the silicone nozzles with your finger or a soft cloth to dislodge any mineral deposits.

TROUBLESHOOTING

If you encounter issues with your hand shower, consider the following common solutions:

- **Uneven or Weak Water Flow:** Check the nozzles for limescale buildup. Use the Speed Clean feature to clear any blockages. Ensure adequate water pressure to your shower system.
- **Difficulty Changing Spray Patterns:** Ensure the SmartTip button is pressed firmly and completely. If the mechanism feels stiff, gently clean around the button to remove any debris.
- **Whining Sound During Operation:** This could indicate an issue with water pressure or an internal component. Consult a qualified plumber or contact GROHE customer support for further assistance.
