4. PRODUCT OVERVIEW

The image displays the Merten MEG5935-0000 Wiser Radiator Thermostat. It is a compact, cylindrical device, primarily light grey with a darker grey base. The top section is a rotatable cap for manual temperature adjustment. A small green LED indicator is visible below the cap. The word 'Wiser' is printed vertically on the main body. Below this, '+' and '-' symbols indicate manual temperature adjustment buttons or areas. The base features a threaded connection for mounting onto a radiator valve.

The Merten MEG5935-0000 Wiser Radiator Thermostat features a sleek design with intuitive controls. It includes a rotatable cap for manual temperature adjustments, an LED indicator for status feedback, and integrated buttons for fine-tuning settings. Its primary function is to regulate the flow of hot water into your radiator, maintaining your desired room temperature.

5. SETUP

5.1. Physical Installation

- 1. Prepare the Radiator Valve:** Ensure your radiator valve is compatible with the thermostat. If necessary, use appropriate adapters from the included installation hardware.
- 2. Insert Batteries:** Open the battery compartment (usually located at the back or bottom of the device). Insert the required 3 Volt batteries, ensuring correct polarity. Close the compartment securely.
- 3. Mount the Thermostat:** Carefully screw the radiator thermostat onto the radiator valve. Tighten it firmly but do not overtighten.
- 4. Initial Calibration:** The thermostat may perform an initial calibration cycle after installation. Follow any on-screen prompts or LED indicators.

5.2. Initial Pairing and Connection

The Merten MEG5935-0000 uses Wi-Fi connectivity and app control for smart functionality. To pair your device:

- 1. Download the Wiser App:** Search for the 'Wiser' app on your Android or iOS device's app store and install it.
- 2. Create an Account:** Open the app and follow the instructions to create a new user account or log in to an existing one.
- 3. Add Device:** In the Wiser app, navigate to the 'Add Device' section. Select 'Radiator Thermostat' or a

similar option.

4. **Follow In-App Instructions:** The app will guide you through the pairing process, which typically involves putting the thermostat into pairing mode (refer to the device's LED indicators) and connecting it to your home Wi-Fi network.
5. **Name Your Device:** Assign a descriptive name to your thermostat (e.g., 'Living Room Radiator').

6. OPERATING

6.1. Manual Control

You can adjust the temperature directly on the thermostat:

- **Adjusting Temperature:** Rotate the top cap clockwise to increase the temperature or counter-clockwise to decrease it. Alternatively, use the '+' and '-' buttons/areas on the device body for fine adjustments.
- **LED Indicator:** Observe the LED indicator for feedback on the current status or temperature setting.

6.2. App Control

For advanced control and scheduling, use the Wiser app:

- **Remote Temperature Adjustment:** Change the temperature from anywhere using your smartphone.
- **Scheduling:** Set up heating schedules for different times of the day and week to optimize comfort and energy usage.
- **Modes:** Utilize various heating modes (e.g., Away, Eco, Boost) available in the app.
- **Zone Control:** If you have multiple Wiser devices, manage different heating zones independently.

7. MAINTENANCE

- **Cleaning:** Clean the exterior of the thermostat with a soft, dry cloth. Do not use abrasive cleaners, solvents, or excessive moisture.
- **Battery Replacement:** When the battery level is low (indicated by the app or a specific LED pattern on the device), replace the batteries promptly with new 3 Volt batteries. Follow the instructions for battery insertion carefully.
- **Firmware Updates:** Periodically check the Wiser app for available firmware updates for your thermostat to ensure optimal performance and access to new features.

8. TROUBLESHOOTING

- **Device Not Responding:** Check battery level. Ensure the device is properly mounted and not obstructed.
- **No App Connection:** Verify your home Wi-Fi network is active and the thermostat is within range. Restart your Wi-Fi router and the thermostat. Re-attempt the pairing process if necessary.
- **Incorrect Temperature Reading:** Ensure the thermostat is not exposed to direct heat sources (e.g., sunlight, other appliances) or drafts that could affect its sensor.
- **Radiator Not Heating/Cooling:** Check if the valve is fully open/closed. Ensure the thermostat is correctly calibrated. Verify the desired temperature setting in the app or on the device.
- **LED Indicator Issues:** Refer to the Wiser app or online support resources for specific LED pattern meanings.
