Filter Everything CF2938

Filter Everything Carbon Range Filter Instruction Manual

Model: CF2938

Compatible with Rangeaire Models: 612017, C-6203, RCP0407

INTRODUCTION

This manual provides essential instructions for the proper use, installation, and maintenance of your Filter Everything Carbon Range Filter. Following these guidelines will ensure optimal performance and longevity of your filter.

PRODUCT OVERVIEW

The Filter Everything Carbon Range Filter is designed to capture odors, smoke, and harmful VOCs, enhancing air quality in your kitchen. It features high filtration efficiency for dust, pollen, and fine particles, and is engineered for durability and consistent performance.

Key Features:

- **Activated Carbon Layer:** Captures odors, smoke, and harmful VOCs.
- **High Filtration Efficiency:** Blocks dust, pollen, and fine particles.
- **Universal Fit:** Compatible with a wide range of models and systems.
- **Durable & Long-Lasting:** Engineered for consistent performance.

Compatibility:

This filter is compatible with Rangeaire models 612017, C-6203, and RCP0407. It is also suitable for various air purifiers, range hoods, and exhaust fans, working with leading brands such as GE, Broan, and Holmes.

MEASURING YOUR FILTER

Accurate measurement of your existing filter is crucial to ensure you purchase the correct replacement. Follow these steps to measure the length, width, and thickness of your filter.

How to Measure:

1. Obtain your existing filter.
2. Use a ruler or tape measure to determine the length and width of the filter from outside edge to outside edge.
3. Measure the thickness of the filter. Note that filters may be listed as 5/16 inch or 3/8 inch thick; these are generally interchangeable. Very thin filters might be 3/32 inch thick.

INSTALLATION

The Filter Everything Carbon Range Filter is designed for quick and easy installation into existing systems.

1. Ensure the appliance (e.g., range hood, air purifier) is turned off and unplugged before beginning installation.
2. Locate the existing filter compartment. This is typically found underneath the range hood or within the air purifier unit.
3. Remove the old filter by releasing any clips or latches holding it in place. Dispose of the old filter responsibly.
4. Insert the new Filter Everything Carbon Range Filter into the compartment. Ensure it sits securely and flush within the frame.
5. Secure the filter using the clips or latches.
6. Restore power to the appliance and test its operation.

ABOUT US

Filter Everything is based in Cleveland, OH and is committed to the highest level of customer satisfaction by providing quality filters at competitive pricing on accelerated lead times. By emphasizing value and integrity, we can meet your needs with quality products and short lead times while maintaining your budget restraints. We can provide the right solution for all your needs.

MAINTENANCE

Regular maintenance of your carbon filter is essential for maintaining air quality and appliance efficiency.

Replacement Schedule:

Carbon filters are not typically washable and should be replaced periodically. The replacement frequency depends on usage and environmental factors (e.g., cooking frequency, presence of pets, air pollution).

- For average household use, it is recommended to replace the filter every 3-6 months.
- In environments with heavy cooking or strong odors, more frequent replacement may be necessary.
- Refer to your appliance's specific instruction manual for recommended filter replacement intervals.

Signs of a Clogged Filter:

- Reduced airflow from the range hood or air purifier.
- Persistent odors in the kitchen or room.
- Visible accumulation of grease or debris on the filter surface.

Engineered for Superior Airflow

Optimized Performance for Clean, Uninterrupted Airflow

Optimized Design for Maximum Efficiency

- Maximizes airflow while filtering effectively
 - High filtration with low resistance
 - Consistent performance over time

Precision Engineering

Corrosion and Wear Resistance

Superior Filtration Technology

TROUBLESHOOTING

If you experience issues after installing your new filter, consider the following:

Reduced Airflow:

- **Check Installation:** Ensure the filter is correctly seated and secured in its compartment. A loose or improperly installed filter can restrict airflow.
- **Verify Filter Size:** Confirm that the filter dimensions match the requirements of your appliance. An incorrect size can impede airflow.
- **Appliance Issue:** If airflow issues persist, consult your appliance's manual for troubleshooting steps related to the fan or motor.

Persistent Odors:

- **Filter Type:** Ensure you have installed a carbon filter, as these are specifically designed for odor absorption.
- **Filter Age:** If the filter has been in use for an extended period, it may be saturated and require replacement.
- **Source of Odor:** Identify and address the source of the odor if it is not related to cooking or general air impurities.

SPECIFICATIONS

Feature	Detail
Brand	Filter Everything
Model Number	CF2938
Dimensions	4 7/8 x 23 15/32 x 3/8 inches
Filter Type	Carbon Range Filter
Compatibility	Rangeaire 612017, C-6203, RCP0407
Unit Count	1 Pack
UPC	653166003707
