

VENMAR 04803

VENMAR Hepa Replacement Filter Instruction Manual

Models: HF3.0, HF3.1 | Filter Model: 04803

INTRODUCTION

This manual provides essential instructions for the proper installation, operation, and maintenance of your VENMAR Hepa Replacement Filter (Model 04803). This filter is specifically designed for use with VENMAR air purifiers, models HF3.0 and HF3.1, to ensure optimal air quality and system performance. Please read these instructions carefully before proceeding.

SETUP AND INSTALLATION

Follow these steps to correctly install the replacement Hepa filter into your VENMAR HF3.0 or HF3.1 air purifier.

- Power Off:** Before beginning, ensure your VENMAR air purifier is turned off and unplugged from the power outlet to prevent electrical hazards.
- Locate Filter Compartment:** Refer to your air purifier's main instruction manual to locate and open the filter access panel or compartment. This is typically found on the front, side, or rear of the unit.
- Remove Old Filter:** Carefully remove the used Hepa filter. Note its orientation to ensure the new filter is installed correctly. Dispose of the old filter according to local regulations.
- Unpack New Filter:** Remove the new VENMAR Hepa Replacement Filter (Model 04803) from its protective packaging. Avoid touching the filter media directly.
- Insert New Filter:** Insert the new filter into the compartment, ensuring it is oriented correctly (e.g., airflow direction arrows, if present, should match the unit's indication). The filter should fit snugly without forcing.
- Close Compartment:** Securely close the filter access panel or compartment.
- Restore Power:** Plug the air purifier back into the power outlet and turn it on.
- Reset Filter Indicator (if applicable):** If your air purifier has a filter replacement indicator light, consult your main air purifier manual for instructions on how to reset it. This typically involves pressing and holding a specific button for a few seconds.

This image displays the VENMAR Hepa Replacement Filter, model 04803. It features a rectangular frame enclosing the pleated filter media, designed for efficient air purification.

OPERATING INSTRUCTIONS

Once installed, the VENMAR Hepa Replacement Filter operates passively as part of your air purifier system. Ensure your air purifier is running according to its own operational guidelines to allow the filter to effectively clean the air. The filter's primary function is to capture airborne particles as air passes through it.

MAINTENANCE

Regular replacement of the Hepa filter is crucial for maintaining optimal air quality and the efficiency of your VENMAR air purifier.

- **Replacement Frequency:** The lifespan of a Hepa filter depends on usage, air quality, and environmental factors. As a general guideline, it is recommended to replace the VENMAR Hepa filter every 6 to 12 months. Refer to your air purifier's main manual for specific recommendations.
- **Filter Indicator:** Pay attention to your air purifier's filter replacement indicator light, if equipped. This light signals when a filter change is due.
- **Cleaning:** Hepa filters are not washable or reusable. Attempting to clean the filter can damage the media and reduce its effectiveness. Always replace with a new filter.

TROUBLESHOOTING

If you encounter issues after replacing your Hepa filter, consider the following:

- **Air Quality Not Improving:**
 - Ensure the new filter is installed correctly and the filter compartment is fully sealed.
 - Verify that the air purifier is operating at the correct settings.
 - Check if other filters (e.g., pre-filters, carbon filters) in your unit also require replacement or cleaning.
- **Filter Indicator Light Remains On:**
 - Confirm you have followed the specific instructions in your air purifier's manual to reset the filter indicator. This often

involves a button press and hold.

- If the light persists, there might be an issue with the sensor or the unit itself.

• **Unusual Noise:**

- Ensure the filter is seated properly and not obstructing any moving parts.
- Check for any loose components within the filter compartment.

For persistent issues, refer to your VENMAR air purifier's main instruction manual or contact VENMAR customer support.

SPECIFICATIONS

Feature	Detail
Brand	VENMAR
Model Number	04803
Compatible Devices	Venmar HF 3.0 and HF 3.1
Material	Polypropylene
MERV Rating	15
Item Weight	3.17 pounds (approx. 1.44 kg)
Product Dimensions	24 x 18 x 6 inches (approx. 61 x 46 x 15 cm)
UPC	772371073371

WARRANTY AND SUPPORT

This Hepa replacement filter is a consumable item. Specific warranty details for replacement filters are typically covered under the warranty of the main VENMAR air purifier unit or are provided at the point of purchase. For detailed warranty information or technical support, please refer to the documentation included with your VENMAR air purifier or visit the official VENMAR website. Ensure you have your air purifier model number and the filter model number (04803) ready when contacting support.
