

Hunter 50311

Hunter Hartland 52-inch Ceiling Fan with LED Light Kit

Model: 50311

1. INTRODUCTION

Thank you for purchasing the Hunter Hartland 52-inch Ceiling Fan. This fan is designed to provide both efficient air circulation and ambient lighting for indoor spaces. Featuring a Noble Bronze finish, five reversible blades, and a clear seeded glass light kit with LED bulbs, it combines classic aesthetics with modern functionality. This manual provides essential information for the safe installation, operation, and maintenance of your new ceiling fan.

2. SAFETY INFORMATION

Before beginning installation or operation, please read and understand all safety instructions. Failure to follow these instructions could result in electric shock, fire, or personal injury.

- Always disconnect power at the main circuit breaker before installing or servicing the fan.
- Ensure all electrical connections comply with local codes and ordinances, as well as the National Electrical Code (NEC). If you are unfamiliar with electrical wiring, consult a qualified electrician.
- The fan must be mounted to a structurally sound ceiling joist or outlet box capable of supporting the fan's weight (approximately 22.8 lbs).
- Maintain a minimum clearance of 7 feet from the floor to the bottom of the fan blades.
- Do not bend the blade brackets during installation or cleaning.
- Avoid placing objects in the path of the fan blades.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Fan Motor Assembly
- Five Reversible Blades
- Light Kit with Clear Seeded Glass Shades

- LED Bulbs (Edison style)
- Pull Chains for Fan Speed and Light Control
- Downrod (3-inch included for standard installation)
- Mounting Hardware and Brackets

4. SETUP AND INSTALLATION

Installation of the Hunter Hartland ceiling fan requires basic electrical knowledge and adherence to safety guidelines. For detailed, step-by-step instructions, please refer to the dedicated installation manual provided with your product. A general overview of the process includes:

1. Mounting the hanging bracket to the ceiling electrical box.
2. Assembling the downrod and hanging the fan motor.
3. Making electrical connections (ensure power is off).
4. Attaching the fan blades.
5. Installing the light kit and glass shades.
6. Installing the LED bulbs.

Professional installation by a licensed electrician is recommended for safety and compliance.

5. OPERATING INSTRUCTIONS

Your Hartland ceiling fan is controlled using two pull chains:

- **Fan Speed Control:** One pull chain controls the fan speed. Pull the chain repeatedly to cycle through High, Medium, Low, and Off settings. The fan features a 3-speed WhisperWind motor for quiet operation.
- **Light Control:** The second pull chain controls the integrated LED light kit. Pull the chain to turn the

lights On or Off.

- **Reversible Motor:** For year-round comfort, the fan motor is reversible. A switch on the motor housing allows you to change the direction of blade rotation. In warm weather, set the fan to rotate counter-clockwise to create a downdraft cooling effect. In cool weather, set it to rotate clockwise to create an updraft, circulating warm air near the ceiling.

6. MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your ceiling fan.

- **Cleaning:** Use a soft brush or lint-free cloth to clean the fan blades and motor housing. Do not use abrasive cleaners or solvents, as these can damage the finish.
- **Light Bulb Replacement:** The fan uses energy-efficient LED bulbs. When replacement is necessary, ensure the power is off before unscrewing the old bulb and installing a new one of the same type and wattage.
- **Tightening Fasteners:** Periodically check all screws and fasteners for tightness. Over time, vibrations can cause them to loosen.

7. TROUBLESHOOTING

If you experience issues with your fan, consult the following common troubleshooting steps:

Problem	Possible Cause	Solution
Fan does not start	No power to the fan; loose wire connections; motor switch in wrong position.	Check circuit breaker/fuse; ensure all connections are secure; verify motor reverse switch is fully engaged.
Fan wobbles	Loose blade screws; unbalanced blades; loose mounting bracket.	Tighten all blade screws; use a balancing kit (if provided); ensure mounting bracket is securely fastened.
Light does not work	Loose bulb; faulty bulb; loose wire connection in light kit.	Tighten bulb; replace bulb; check light kit wiring connections.

Problem	Possible Cause	Solution
Noisy operation	Loose screws; motor housing rubbing; blades hitting an obstruction.	Check and tighten all screws; ensure no wires are rubbing against the motor; verify blade clearance.
