

## Shark NV586

# Shark Navigator Powered Lift-Away Upright Vacuum

**MODEL: NV586**

User Instruction Manual

## Introduction

---

The Shark Navigator Powered Lift-Away Upright Vacuum, model NV586, offers powerful cleaning performance with enhanced maneuverability. Designed for both carpets and hard floors, this vacuum features a unique Lift-Away mode for portable cleaning, making it ideal for stairs, upholstery, and hard-to-reach areas. Its advanced filtration system captures allergens, providing a cleaner home environment.

## Key Features

---

- **Powered Lift-Away Technology:** Detach the canister to clean hard-to-reach areas while the brushroll continues to spin.
- **Strong Suction:** Provides powerful cleaning on all surfaces.
- **Multi-Surface Cleaning:** Seamlessly transitions between hard floors and carpets.
- **Advanced Swivel Steering:** Allows for excellent control when maneuvering around furniture.
- **LED Headlights:** Illuminate hidden debris for thorough cleaning.
- **Anti-Allergen Complete Seal Technology:** Captures 99.9% of dust and allergens inside the vacuum.

## Setup

---

Upon unboxing, assemble the main vacuum body by connecting the wand to the nozzle and then attaching the handle. Ensure all components click securely into place. The dust cup should be properly seated before operation.

Figure 1: Fully assembled Shark Navigator NV586 upright vacuum with various cleaning tools.

## Operating Modes

---

### 1. Upright Mode

For general floor cleaning, use the vacuum in its upright configuration. The powerful brushroll effectively cleans carpets and hard floors. Adjust the surface setting as needed using the controls on the handle.

### 2. Lift-Away Mode

To clean stairs, upholstery, or other above-floor areas, press the 'Lift-Away' button to detach the canister from the nozzle. This allows for portable cleaning while maintaining powerful suction.

Figure 2: Demonstrating the Lift-Away feature for cleaning stairs.

### 3. Wand Mode

Detach the handle from the wand or the wand from the nozzle to use with various accessories. This is ideal for reaching high areas,

tight spaces, or cleaning delicate surfaces.

## Suction Control

The vacuum features adjustable suction control, allowing you to reduce suction for delicate fabrics or increase it for stubborn debris. This control is typically located on the handle.

## Surface Settings

Toggle between hard floor and carpet settings using the controls on the handle. This optimizes the brushroll speed for effective cleaning on different surfaces.

## LED Headlights

The integrated LED headlights on the nozzle illuminate the cleaning path, making it easier to spot dust and debris under furniture or in dimly lit areas.

## Maintenance

---

### Emptying the Dust Cup

Empty the dust cup after each use or when debris reaches the MAX fill line. To empty, press the dust cup release latch and lift the dust cup away from the vacuum body. Hold the dust cup over a trash bin and press the bottom release latch to open the bottom flap and empty contents.

### Cleaning Filters

Regularly clean the foam and felt filters located above the dust cup. Rinse them with cold water until the water runs clear, then allow them to air dry completely for at least 24 hours before reinserting. The HEPA filter, located at the bottom of the vacuum, should be cleaned annually by rinsing with cold water and allowing it to air dry completely.

## Troubleshooting

---

- **Vacuum not picking up debris or no suction:** Check if the dust cup is full and empty it. Inspect filters for clogging and clean them. Check for blockages in the hose, wand, or nozzle.
- **Brushroll not spinning:** Ensure the vacuum is in the correct surface mode (carpet mode activates the brushroll). Check for blockages around the brushroll.
- **Vacuum tips over easily:** Ensure the canister is securely attached to the nozzle base in upright mode.

For more detailed troubleshooting, please refer to the full product manual or contact Shark customer support.

## Specifications

Feature	Detail
Brand	Shark
Special Feature	Bagless
Filter Type	Foam, HEPA Filter
Included Components	Canister, HEPA Filter, Brush
Is Cordless?	No
Capacity	2.4 Quarts
Form Factor	Upright
Color	Purple
Noise Level	80 dB
Item Weight	18.26 pounds
Item Model Number	NV586
Specific instructions for use	dual action, hard floor, carpet
