## 2. IMPORTANT SAFETY INSTRUCTIONS

**Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, or injury to persons.**

- Read all instructions before using the machine.
- Keep hands away from all moving parts. Never touch the needle, presser foot, or handwheel while the machine is operating.
- Always unplug the machine from the electrical outlet when removing covers, lubricating, or when making any other user servicing adjustments mentioned in the instruction manual.
- Do not operate the machine if the cord or plug is damaged, or if the machine is not working properly.
- Use only attachments recommended by the manufacturer as contained in this instruction manual.
- Never drop or insert any object into any opening.
- Do not use outdoors.
- Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
- To disconnect, turn all controls to the off position, then remove plug from outlet.

### 3. SETUP AND ASSEMBLY

---

The Jack Direct Drive Sewing Machine A5 typically comes with the main unit pre-assembled. However, some components, such as the thread stand and table, may require assembly. Refer to the included components list for verification.

#### 3.1 Unpacking

1. Carefully remove all packaging materials.
2. Verify all components listed in the 'Included Components' section are present. The product includes "One pices pack".
3. Place the machine on a stable, level surface.

### 3.2 Power Connection

- Ensure the machine's power switch is in the 'OFF' position.
- Connect the power cord securely to the machine and then to a suitable electrical outlet. The machine is electric.

### 3.3 Threading the Machine

Proper threading is crucial for consistent stitch quality. Follow the numbered guides on the machine for correct thread pathing from the spool to the needle.

## 5. MAINTENANCE

---

Regular maintenance ensures the longevity and optimal performance of your sewing machine.

### 5.1 Cleaning

- **Daily:** Remove lint and dust from the bobbin case area and feed dogs using a small brush.
- **Weekly:** Clean the tension discs and needle bar area.
- Always unplug the machine before cleaning.

### 5.2 Lubrication (Oiling)

The Jack A5, being a direct drive machine, may have specific oiling points. Refer to the machine's internal diagrams or consult a qualified technician for precise lubrication instructions. Use only high-quality sewing machine oil.

### 5.3 Needle Replacement

1. Turn off and unplug the machine.
2. Loosen the needle clamp screw.
3. Remove the old needle.
4. Insert a new needle with the flat side facing the back, pushing it up as far as it will go.
5. Tighten the needle clamp screw securely.

## 6. TROUBLESHOOTING COMMON ISSUES

---

This section provides solutions for common problems you might encounter.

Problem	Possible Cause	Solution
Skipped Stitches	Incorrect needle, bent needle, improper threading.	Change needle, re-thread machine correctly.
Thread Breakage	Incorrect tension, poor quality thread, burrs on needle plate.	Adjust tension, use good quality thread, check for burrs.
Machine Not Starting	Power not connected, safety switch engaged.	Check power cord, ensure safety features are disengaged.
Uneven Stitches	Incorrect tension, worn needle, inconsistent fabric feeding.	Adjust tension, replace needle, ensure smooth fabric guidance.

If problems persist after attempting these solutions, please contact customer support or a qualified service technician.
