

## Magichome M-S-39

# Magichome Filter Shower Head User Manual

Model: M-S-39

## 1. PRODUCT OVERVIEW

The Magichome Filter Shower Head is designed to provide a superior showering experience by combining high-pressure water flow with advanced filtration. It features a multi-level ionic filtering system that helps to soften hard water and remove impurities, ensuring cleaner and healthier water for your skin and hair.

Figure 1: Magichome Filter Shower Head with included components, including the shower head, filter cartridges, and mineral beads.

## Key Features:

- **Updated 3-Level Filtration:** Softens hard water and helps remove chlorine, fluoride, heavy metals, toxins, bacteria, rust, and unpleasant odors.
- **Efficient PP Cotton Filter:** Equipped with a replaceable PP cotton filter made from bio and ecological coir fiber, designed to stop approximately 99% of harmful substances.
- **Turbo Pressure Water:** Features micro-hole technology for increased water pressure, ideal for low water pressure environments, while also conserving water.
- **Three Spray Modes:** Offers Rain, Jet, and Massage modes for a customizable shower experience.
- **Easy Installation:** Tool-free installation, compatible with standard shower hoses and handles.

## 2. SETUP AND INSTALLATION

The Magichome Filter Shower Head is designed for quick and easy installation without the need for

special tools. Follow these steps to set up your new shower head:

1. **Unpack Components:** Carefully remove all items from the packaging. Verify that all components listed in the "Package Contents" section are present.
2. **Remove Old Shower Head:** Unscrew your existing shower head from the shower hose. If it's difficult to remove, you may use a wrench, but protect the finish with a cloth.
3. **Prepare for Installation:** Ensure the shower hose connection is clean and free of debris.
4. **Attach New Shower Head:** Screw the Magichome Filter Shower Head onto your standard shower hose. Hand-tighten until secure. Do not overtighten.
5. **Check for Leaks:** Turn on the water supply and check for any leaks at the connection point. If leaks occur, tighten slightly more or ensure the washer is properly seated.

## PAKETLISTE

- |   |   |
|---|---|
| 1. 3-Lage-Filtration Duschkopf x 1              | 2. PP Baumwollefilter ersetzbar Part x 1    |
| 3. Infrarot-Minerale Kugeln ersetzbar Part x 1  | 4. Ionen Minerale Kugeln ersetzbar Part x 1 |
| 5. Anoden Aktivierungskugeln ersetzbar Part x 1 | 6. Gummi-Ersatzplatte x 1                   |
| 7. Ersatzführung x 1                            |   |

### 3. OPERATING INSTRUCTIONS

The Magichome Filter Shower Head offers three distinct spray modes to customize your showering experience. To switch between modes, use the integrated selector on the shower head.

## Spray Modes:

- **Rain Mode:** Provides a gentle, wide spray that mimics natural rainfall, ideal for a relaxing shower.
- **Jet Mode:** Delivers a focused, powerful stream of water, effective for rinsing soap quickly or for a more invigorating shower.
- **Massage Mode:** Offers a pulsating spray pattern, designed to provide a soothing massage sensation.

Figure 3: Visual representation of the three available spray modes: Rain, Massage, and Mixed (Jet).

To change the mode, simply rotate the switch located on the shower head's face or side, depending on the specific model variant.

## 4. MAINTENANCE

Regular maintenance ensures the optimal performance and longevity of your Magichome Filter Shower Head, especially its filtration capabilities.

### Filter Replacement:

The shower head is equipped with a replaceable PP cotton filter and mineral beads that contribute to water purification. The lifespan of the filter and beads depends on your water quality and usage frequency. It is recommended to inspect the filter and beads periodically (e.g., every 3-6 months) and replace them when you notice a decrease in filtration effectiveness, reduced water flow, or visible discoloration of the filter media.

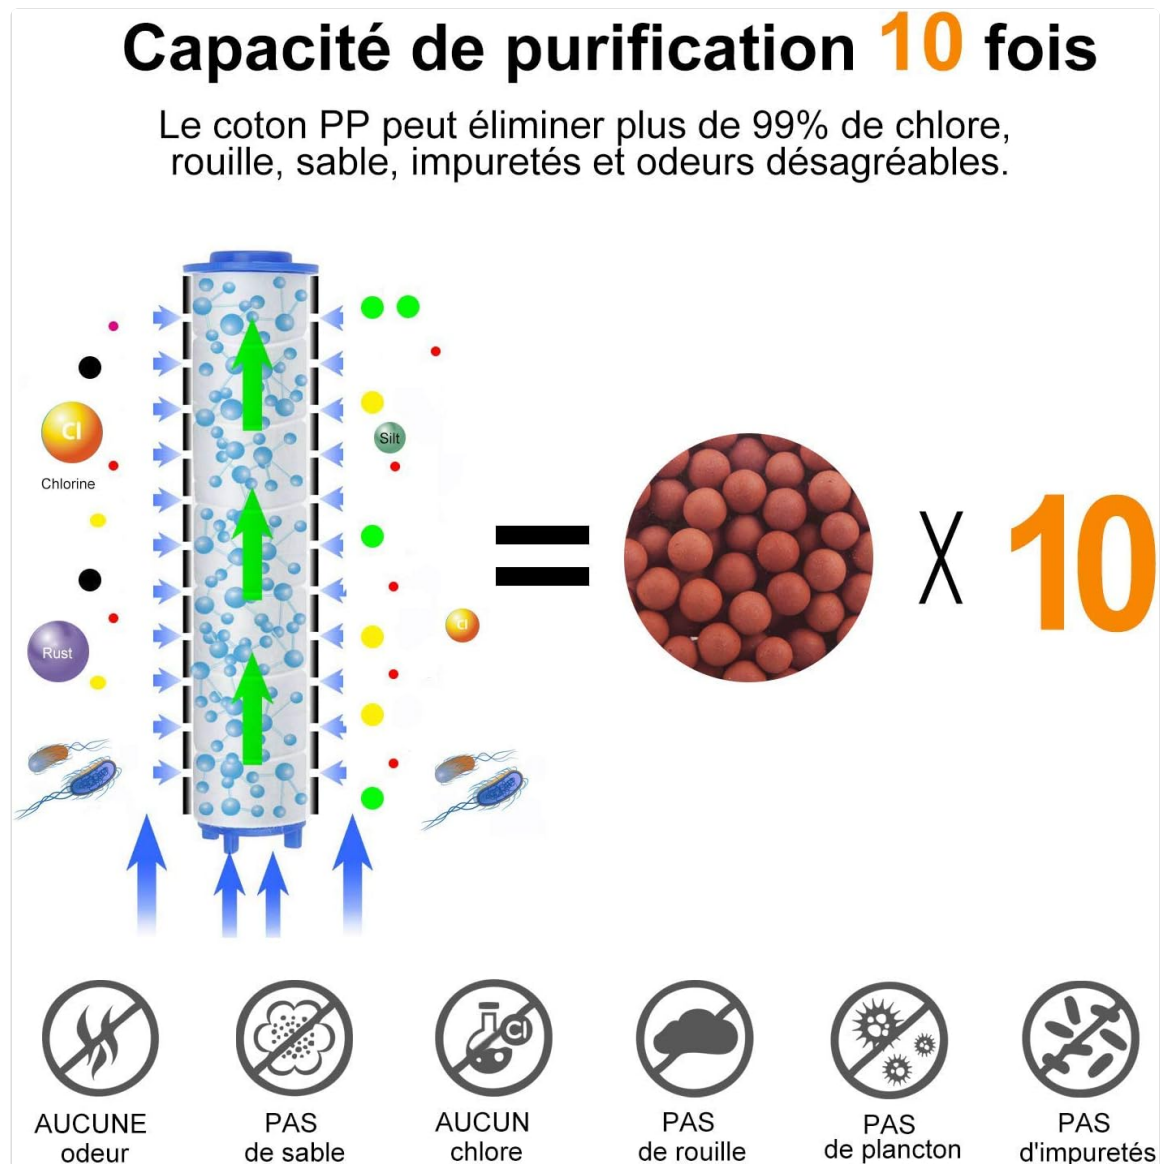

Figure 4: The PP cotton filter's purification capacity, showing its effectiveness in removing impurities.

### Cleaning the Shower Head:

To maintain consistent water flow and prevent mineral buildup, periodically clean the shower head nozzles. The shower head features a detachable design for easy cleaning.

1. **Detachment:** Gently twist or unscrew the shower head face or the entire head from the handle, as per the design.
2. **Nozzle Cleaning:** Use a soft brush (like an old toothbrush) to gently scrub the nozzles and remove any mineral deposits or debris. For stubborn limescale, you can soak the shower head face in a solution of white vinegar and water for about 30 minutes, then scrub and rinse thoroughly.
3. **Reassembly:** Reattach the shower head components, ensuring they are securely fastened.

Figure 5: The detachable design facilitates easy cleaning of the shower head's panels.

## 5. TROUBLESHOOTING

This section addresses common issues you might encounter with your Magichome Filter Shower Head.

Problem	Possible Cause	Solution
Reduced Water Pressure	Clogged nozzles due to mineral buildup. Filter cartridge is old or clogged. Low water pressure from the main supply (less common for this product).	Clean the shower head nozzles as described in the Maintenance section. Replace the PP cotton filter and inspect mineral beads. Note: This shower head is designed to enhance pressure in low-pressure environments. If the issue persists, check your home's water supply.
Water Leaks at Connection	Loose connection to the shower hose. Missing or improperly seated washer.	Ensure the shower head is hand-tightened securely to the hose. Check that the rubber washer is correctly placed inside the shower head's connection point. Replace if damaged.
Water Not Filtering Effectively	Filter cartridge or mineral beads are exhausted.	Replace the PP cotton filter and mineral beads.

## 6. SPECIFICATIONS

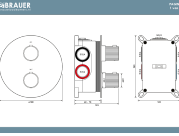

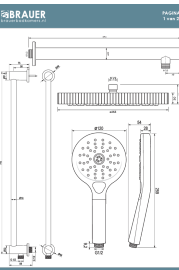

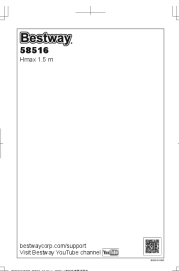

<b>Brand</b>	Magichome
<b>Model Number</b>	M-S-39
<b>Product Dimensions (L x W x H)</b>	25 x 12 x 12.7 cm
<b>Weight</b>	440 grams
<b>Size</b>	B-3 Filtration + PP Filter
<b>Color</b>	Steel
<b>Material</b>	Acrylonitrile Butadiene Styrene (ABS), Polycarbonate
<b>Shape</b>	Round
<b>Installation Method</b>	Screw-in
<b>Hose Length (Compatible)</b>	200 Centimeters (approx. 78.7 inches)
<b>Spray Modes</b>	3 (Rain, Jet, Massage)
<b>Special Features</b>	Detachable, Adjustable Height, Anti-Limescale, High Pressure
