iTouchless DZT08PL-3

iTouchless 8 Gallon Pet-Proof Sensor Trash Can User Manual

Model: DZT08PL-3

Introduction

Thank you for choosing the iTouchless 8 Gallon Pet-Proof Sensor Trash Can. This manual provides essential information for the proper setup, operation, and maintenance of your new appliance. Please read these instructions thoroughly before use and retain them for future reference.

This sensor trash can features a touchless lid, an AbsorbX odor filter system, and a PetGuard mechanism designed to prevent pets from accessing the contents. Its stainless steel construction offers durability and a modern aesthetic for your home or office.

What's in the Box

Carefully unpack all components and ensure you have the following items:

- 1 x Trash Can Lid
- 1 x Trash Can Body
- 1 x AbsorbX Odor Filter Kit
- 1 x Retainer Ring (for securing trash bags)

Setup

1. **Power Installation:**

   The trash can can be powered by 4 Size D batteries (not included) or an optional AC Adapter (sold separately). To install batteries, open the battery compartment located on the underside of the lid and insert the batteries according to the polarity indicators. If using the AC adapter, plug it into the designated port on the back of the lid and then into a wall outlet.

Image: Illustration of the two power options for the trash can: 4 D-size batteries and an AC adapter. The batteries are shown in a circular arrangement, and the AC adapter is depicted with its plug and cord.

2. **AbsorbX Odor Filter Installation:**

   Locate the filter compartment on the underside of the lid. Insert the AbsorbX odor filter into this compartment. The activated carbon filter helps absorb and neutralize trash odors.

3. **Trash Bag Installation:**

Place a trash bag into the trash can body. Secure the top edge of the trash bag by fitting it under the retainer ring. This keeps the bag neatly in place and prevents it from slipping.

4. **Placement:**

   Position the trash can in your desired location. Ensure there is adequate space around the sensor for proper operation and that the lid can open freely without obstruction.

Operating Instructions

1. **Motion Sensor Operation:**

   To open the lid automatically, simply wave your hand approximately 6 inches above the sensor located on the front of the lid. The lid will open instantly and remain open for a few seconds before closing automatically. This provides a hygienic, touch-free experience.

Image: A hand is shown waving over the sensor of the trash can, with blue waves indicating the sensor activation. The lid is open, illustrating the touchless operation.

2. **Manual Open/Close:**

   For extended use or specific situations, you can manually control the lid. Press the 'OPEN' button on the lid to keep it open. Press the 'CLOSE' button to close the lid.

3. **PetGuard Feature:**

   The PetGuard feature is designed to prevent pets from opening the lid. This mechanism ensures that the lid remains securely closed, protecting your pets from trash contents and maintaining a clean environment.

Maintenance

1. **Cleaning the Exterior:**

   The stainless steel exterior is fingerprint-proof and smudge-resistant. To clean, wipe with a soft, damp cloth. Avoid using abrasive cleaners or scouring pads, as these can damage the finish.

2. **AbsorbX Odor Filter Replacement:**

   For optimal odor control, replace the AbsorbX odor filter periodically. The frequency of replacement depends on usage and the type of waste disposed. Refer to the product packaging or iTouchless website for replacement filter availability.

3. **Battery Replacement:**

   When the batteries are low, the sensor's indicator light may flash or the lid may operate slowly. Replace all 4 Size D batteries simultaneously to ensure consistent performance.

Troubleshooting

- **Lid not opening or closing:**
  - Check if the batteries are correctly installed and have sufficient power. Replace if necessary.
  - Ensure the sensor area is clean and free from obstructions.
  - Verify that the power switch (if present) is in the 'ON' position.
- **Persistent odors:**
  - Replace the AbsorbX odor filter.

- Ensure the lid is closing completely to seal in odors.

- **Lid closing on hand:**
  - Ensure your hand is within the sensor's detection range. Some models feature 'Reflex Technology' to prevent premature closing.

If you encounter issues not covered here, please refer to the Warranty and Support section for assistance.

Specifications

Feature	Detail
Product Dimensions	12.8 x 10.8 x 19.25 inches
Weight	7 Pounds
Model Number	DZT08PL-3
