GLOBE Electric 66008 Vane 4-Light Flush Mount Ceiling Light Instruction Manual

Model: 66008 | Brand: Globe Electric

PRODUCT OVERVIEW

The Globe Electric Vane 4-Light Flush Mount Ceiling Light (Model 66008) features a matte black finish and a Sputnik-style design. This fixture is designed to provide ambient lighting and enhance the aesthetic of various indoor spaces.

Image: The Globe Electric Vane 4-Light Flush Mount Ceiling Light, matte black finish, with four exposed bulb sockets.

This light fixture is suitable for indoor use in areas such as dining rooms, entryways, and kitchens. Its open socket design allows for customization with various bulb types, including vintage Edison-style bulbs for a classic look or designer bulbs for a modern touch.

SAFETY INFORMATION

WARNING: RISK OF ELECTRIC SHOCK. Turn off power at the circuit breaker or fuse box before installation or servicing.

- Read all instructions carefully before beginning installation.

- Consult a qualified electrician if you are unsure about the installation process.
- Ensure all electrical connections comply with local codes and ordinances.
- Use only the specified bulb type and wattage to avoid overheating.
- Do not install this fixture in wet or damp locations. It is designed for indoor use only.
- Always handle bulbs with care.

PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Vane 4-Light Flush Mount Ceiling Light Fixture
- Mounting Hardware (screws, wire nuts, mounting plate)
- Instruction Sheet

Note: E26/Medium Base 60W Bulbs are sold separately and are not included in the package.

INSTALLATION INSTRUCTIONS

1. Before You Begin

- **Turn off power:** Locate the circuit breaker or fuse box and turn off the power to the junction box where the fixture will be installed.
- **Gather tools:** You will need a screwdriver, wire strippers, electrical tape, and possibly a ladder.
- **Unpack:** Carefully remove all components from the packaging.

2. Mounting the Fixture

1. Attach the mounting plate to the junction box using the provided screws. Ensure it is securely fastened.
2. Connect the fixture's ground wire (usually bare copper or green) to the ground wire from the junction box. If there is no ground wire from the junction box, connect it to the green ground screw on the mounting plate.
3. Connect the fixture's neutral wire (usually white or unmarked) to the white neutral wire from the junction box.
4. Connect the fixture's hot wire (usually black or with writing on the insulation) to the black hot wire from the junction box. Secure all wire connections with wire nuts and electrical tape.
5. Carefully tuck all wires into the junction box.
6. Align the fixture canopy with the mounting plate and secure it with the provided screws.

3. Installing Bulbs

1. Screw four E26/Medium Base 60W maximum bulbs (sold separately) into the sockets. Do not overtighten.
2. Ensure bulbs are fully seated in the sockets.

OPERATING INSTRUCTIONS

- **Power On:** Once installation is complete, restore power at the circuit breaker or fuse box.
- **Standard Operation:** Use your wall switch to turn the light fixture on and off.
- **Dimmable Functionality:** If you have installed a compatible dimmer switch (sold separately), you can adjust the light intensity by operating the dimmer control. Ensure that the bulbs you use are also dimmable.
- **Bulb Replacement:** Before replacing bulbs, turn off the power to the fixture at the circuit breaker. Allow

bulbs to cool completely before touching them. Unscrew old bulbs and screw in new E26/Medium Base 60W maximum bulbs.

MAINTENANCE

- **Cleaning:** To clean the fixture, turn off the power and allow it to cool. Wipe with a soft, dry cloth. Do not use abrasive cleaners or solvents, as these may damage the finish.
- **Inspection:** Periodically check all electrical connections and mounting hardware for tightness.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Light does not turn on.	<ul style="list-style-type: none">◦ Power is off at the circuit breaker.◦ Loose wire connections.◦ Faulty bulb(s).◦ Faulty wall switch.	<ul style="list-style-type: none">◦ Check the circuit breaker and ensure power is on.◦ Turn off power, then check and secure all wire connections.◦ Replace bulb(s) with new ones.◦ Consult a qualified electrician to inspect the switch.
Light flickers or dims unexpectedly.	<ul style="list-style-type: none">◦ Loose bulb(s).◦ Incompatible dimmer switch or bulbs.◦ Loose wire connections.	<ul style="list-style-type: none">◦ Turn off power, then tighten bulbs.◦ Ensure both dimmer and bulbs are compatible.◦ Turn off power, then check and secure all wire connections.
