SETUP AND ASSEMBLY

Follow these steps carefully to assemble your CubiCubi desk. It is recommended to have a clear, spacious area for assembly. A Phillips head screwdriver (not included) may be helpful in addition to the provided Allen wrench.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a soft, clean surface to prevent scratches.
2. **Assemble Frame:** Attach the metal frame components using the provided screws and Allen wrench. Ensure all connections are secure but do not overtighten until the desk is fully assembled.
3. **Attach Adjustable Leg Pads:** Screw the adjustable leg pads into the bottom of the desk legs. These can be adjusted later to level the desk on uneven floors.
4. **Install Shelves:** The 2-tier open shelves can be installed on either the left or right side of the desk. Secure them to the frame using the designated hardware. The middle shelf can be removed if more space is needed for a larger computer tower.
5. **Attach Tabletop:** Carefully place the main tabletop and the splice board onto the assembled frame. Align the pre-drilled holes and secure them with screws.
6. **Final Tightening:** Once all components are in place and aligned, fully tighten all screws.
