Kircuit Kircuit Car DC Adapter

Kircuit Car DC Adapter User Manual

For HoMedics VC-100, VC-101, VC-100E Massage Cushions

INTRODUCTION

Thank you for choosing the Kircuit Car DC Adapter. This adapter is designed to provide reliable power to your HoMedics VC-100, VC-101, or VC-100E massage cushion directly from your vehicle's 12V DC power outlet. This manual will guide you through the proper use and care of your adapter to ensure optimal performance and safety.

SAFETY INFORMATION

Your Kircuit Car DC Adapter is engineered with multiple safety features to protect both the adapter and your connected device. Please read and follow all safety instructions carefully.

- The adapter includes a built-in Dynamic IC, Charger IC, and Power fuse for rapid charging and protection against overcharging.
- Always ensure the adapter is fully inserted into the vehicle's DC outlet and the massage cushion's power port.
- Do not expose the adapter to moisture or extreme temperatures.
- Disconnect the adapter from the power source when not in use.

PRODUCT OVERVIEW

The Kircuit Car DC Adapter is designed for durability and reliable performance. It features a robust cable and a secure plug connection.

Durable Cable Design

The power cable is constructed from high-quality materials with a thick insulation layer. This design protects against wear and tear and offers abrasion resistance to prevent damage from external factors. The cable is also designed to withstand high temperatures without melting or degrading, which is crucial for carrying current loads safely.

Durable design

Image: Detailed views of the adapter's durable cable, illustrating its robust construction and flexibility.

Secure Plug Connection

The plugs on the power cable are well-made to provide a secure and stable connection. They are designed to handle electrical loads without overheating or posing a fire hazard, adhering to safety standards for reliable operation.

SETUP

- 1. Locate the Vehicle's DC Outlet:** Identify the 12V DC power outlet (often labeled 'cigarette lighter' or with a power symbol) in your vehicle.
- 2. Connect the Adapter:** Insert the car plug end of the Kircuit DC Adapter firmly into your vehicle's 12V DC power outlet. Ensure it is fully seated.
- 3. Connect to Massage Cushion:** Plug the output connector of the Kircuit DC Adapter into the power input port of your HoMedics VC-100, VC-101, or VC-100E massage cushion.
- 4. Verify Connection:** Ensure both connections are secure before operating the massage cushion.

OPERATING INSTRUCTIONS

- 1. Start Vehicle (Optional):** For optimal performance and to avoid draining your vehicle's battery, it is recommended to operate the massage cushion with the vehicle's engine running.
- 2. Power On Massage Cushion:** Once the adapter is connected, use the power controls on your HoMedics massage cushion to turn it on and select your desired settings.
- 3. Monitor Operation:** Observe the massage cushion's operation. If any issues arise, refer to the Troubleshooting section.
- 4. Disconnect After Use:** After using the massage cushion, turn it off and disconnect the Kircuit DC Adapter from both the massage cushion and the vehicle's DC outlet.

MAINTENANCE

- Cleaning:** Disconnect the adapter from all power sources before cleaning. Use a soft, dry cloth to wipe the adapter. Do not use liquid cleaners or solvents.
- Storage:** Store the adapter in a cool, dry place away from direct sunlight and extreme temperatures. Avoid tightly coiling the cable to prevent damage.
- Inspection:** Periodically inspect the adapter's cable and connectors for any signs of wear, fraying, or damage. If damage is observed, discontinue use and replace the adapter.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Massage cushion does not power on.	Adapter not fully inserted into vehicle outlet. Adapter not fully connected to massage cushion. Vehicle's DC outlet is not receiving power.	Ensure the adapter is firmly seated in both the vehicle outlet and the massage cushion. Check vehicle's fuse for the DC outlet. Consult your vehicle's manual.
Intermittent power to massage cushion.	Loose connection. Damaged cable or connector.	Ensure all connections are secure. Inspect the cable and connectors for damage. If damaged, replace the adapter.
Adapter feels unusually hot.	Overload or faulty unit.	Disconnect immediately. Ensure the massage cushion is compatible with the adapter's specifications. If overheating persists, discontinue use and replace.
