ZINUS 2 Inch Copper Cooling Memory Foam Mattress Topper Instruction Manual

Brand: Zinus | Model: ZU-TMTCCS-02T

INTRODUCTION

The ZINUS 2 Inch Copper Cooling Memory Foam Mattress Topper is designed to enhance your existing mattress with an additional layer of supportive softness. Infused with copper, this topper helps resist moisture and draw excess heat away from the body, promoting a cooler and more comfortable sleep environment. Its contoured surface and pressure-relieving memory foam provide customized support, making it an effective solution for improving sleep quality.

FEATURES AND BENEFITS

- **Copper Infused Memory Foam:** Designed to resist moisture and conduct heat away from the body for a cooler sleep.
- **Softness & Support:** Cradles pressure points, providing customized support and added comfort to your mattress.
- **Airflow Design:** Contoured surface promotes air circulation, further enhancing cooling properties.
- **CertiPUR-US Certified:** Made with high-quality foam that meets rigorous standards for content, emissions, and durability.

Dual Structure

SETUP AND INSTALLATION

1. **Unpack the Topper:** Carefully remove the mattress topper from its packaging.
2. **Allow for Expansion:** Unroll the topper and lay it flat on a clean, dry surface. Allow 24-48 hours for the memory foam to fully expand and any initial odor to dissipate.
3. **Placement:** Once fully expanded, place the mattress topper directly on top of your existing mattress. Ensure it is centered and aligned with the mattress edges.
4. **Secure with Fitted Sheet:** Cover the mattress and topper with a fitted sheet to hold the topper securely in place.

OPERATING INSTRUCTIONS

The mattress topper is designed for immediate use once fully expanded and placed on your mattress. No special operation is required. Simply lay on the topper as you would your regular mattress. The memory foam will conform to your body's contours, providing pressure relief and enhanced comfort. The copper infusion and airflow design will work passively to regulate temperature throughout the night.

MAINTENANCE AND CARE

- **Cleaning:** The mattress topper is **Spot Clean Only**. Do not machine wash or dry the foam. For spills or stains, gently blot the affected area with a mild detergent and water solution. Allow to air dry completely before covering.

- **Protection:** Use a mattress protector or fitted sheet over the topper to shield it from spills, dust, and wear.
- **Ventilation:** Periodically air out the topper by removing bedding to allow for fresh air circulation, which helps maintain freshness and foam integrity.
- **Rotation:** To promote even wear and extend the life of the topper, rotate it head-to-foot every 3-6 months.

TROUBLESHOOTING

- **Initial Odor:** A new memory foam product may have a slight, harmless odor upon unpacking. This "new foam" scent typically dissipates within 24-72 hours in a well-ventilated area.
- **Incomplete Expansion:** If the topper does not fully expand within 48 hours, ensure it is laid flat in a warm room. Cooler temperatures can slow down the expansion process.
- **Topper Shifting:** Ensure the topper is covered by a snug-fitting fitted sheet. A mattress protector with deep pockets can also help keep the topper in place.
- **Feeling Too Warm:** While designed for cooling, individual temperature preferences vary. Ensure your bedding is breathable and your room temperature is comfortable. The copper infusion and airflow design work to mitigate heat, but external factors can influence perceived warmth.

SPECIFICATIONS

Brand	Zinus
Model Name	Copper Cooling Memory Foam Mattress Topper
Model Number	ZU-TMTCCS-02T
Size	Twin
Color	White
Material Type	Memory Foam
Fabric Type	Copper Infused Memory Foam
Special Feature	Cooling
