4. Ensure all connections are secure before powering on your device.

5. OPERATING INSTRUCTIONS

Once the Kircuit AC Power Cord is correctly connected to your device and a live electrical outlet, it will supply the necessary power to operate your device. No further action is required for the power cord itself. Refer to your device's instruction manual for specific operating procedures.

6. MAINTENANCE

- **Cleaning:** Disconnect the power cord from both the device and the wall outlet before cleaning. Wipe the cord and plugs with a dry, soft cloth. Do not use liquid cleaners or abrasive materials.
- **Storage:** When not in use, store the power cord in a cool, dry place, away from direct sunlight and moisture. Avoid tightly coiling the cord to prevent damage.
- **Inspection:** Periodically inspect the power cord for any signs of damage, such as cuts, fraying, or bent prongs. If any damage is observed, discontinue use immediately and replace the cord.

7. TROUBLESHOOTING

If your device is not powering on after connecting the Kircuit AC Power Cord, consider the following:

- **Check Connections:** Ensure both ends of the power cord are securely plugged into the device and the wall outlet.
- **Verify Outlet:** Test the wall outlet with another known working appliance to confirm it is supplying power.
- **Inspect Cord:** Examine the power cord for any visible damage. If damaged, do not use it.
- **Device Power:** Confirm that the power switch on your GPX device is in the 'ON' position.

If the issue persists after these steps, consult the instruction manual for your GPX device or contact the device manufacturer for further assistance.
