### XREXS 3039 No Backlight or Remote White

# XREXS Large Digital Wall Clock Instruction Manual

Model: 3039 No Backlight or Remote White

Brand: XREXS

## OVERVIEW

The XREXS Large Digital Wall Clock is a versatile electronic alarm clock designed for bedrooms, offices, and kitchens. Featuring a 14.17-inch large LCD screen with high-contrast jumbo digits, it provides clear time, date, and temperature display visible from a distance. This battery-operated clock offers three modes: Clock, Alarm, and Timer, with user-friendly controls for easy operation. It includes a 5-minute snooze function for the alarm and count-up/count-down timer functions (0-29 hr 59 min 59 sec) with memory. The clock can be wall-mounted or stand on a table, blending seamlessly into various environments. It operates silently, ensuring a quiet night, and comes with included batteries for immediate use. Its modern design makes it not just a functional timepiece but also a decorative element for any room.

## SETUP

## Unboxing & Components

Upon unboxing, you will find the XREXS Large Digital Wall Clock unit, a mounting template for wall installation, and a user manual. The clock is designed for straightforward setup.

Video 1: Unboxing and Overview of the XREXS Large Digital Wall Clock. This video demonstrates the contents of the product packaging and provides a brief overview of the clock's features and physical design.

## Battery Installation

The XREXS Large Digital Wall Clock is battery-operated. To power the device, open the battery compartment located on the back of the clock. Insert four (4) AA batteries and two (2) AAA batteries, ensuring correct polarity. Please remove any insulating plastic tabs from the batteries before insertion. The clock will power on automatically once batteries are correctly installed.

## Setting Time and Date

To set the time, date, and other preferences, refer to the detailed instructions in the included user manual. The clock supports 12-hour or 24-hour display formats and allows switching between Celsius and Fahrenheit for temperature display.

## Alarm Function

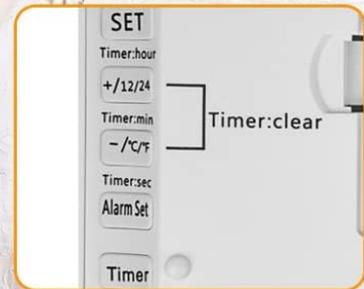

The clock features an alarm with a 5-minute snooze function. To activate snooze, press the SNOOZE button when the alarm sounds. To turn off the alarm, press any other button. The alarm can be set for specific days of the week (e.g., Monday-Friday, weekends only, or daily).

# 5 Min Snooze Function

Smart One-key Turn Off Alarm

Press SNOOZE button, the alarm stop and ring after 5 min.

Press any one of these 5 buttons to turn off the alarm
