## INSTALLATION GUIDE

The PROHEAR FEP01 ear pads feature a snap-in design for quick and easy replacement. Follow these steps to install your new ear pads:

1. **Remove Existing Ear Pads:** Gently remove your existing ear pads from the headset. They typically detach by pulling them away from the ear cup.
2. **Clean Surface:** Clean the surface of your headset's ear cup where the new pads will attach. Ensure it is free of debris and old adhesive residue.
3. **Prepare New Pad:** If applicable, remove any protective backing or sticker from the new ear pad to expose the adhesive or attachment points.
4. **Attach New Pad:** Carefully align the new ear pad with the ear cup. Put the new one into the plastic adapter plates, ensuring all hooks or clips are properly seated on top. Press firmly around the edges to secure it.
5. **Repeat for Other Side:** Repeat the process for the other ear pad.

# EASY TO INSTALL

—Snap-in design

Maintain the original sound quality

100% compatible

Ergonomic design

Correct dimensions

1

Simply remove your existing ear pads from the headset.

2

Clean the surface of your headset.

3

Put the new one into the plastic adapter plates and sure all 8 hooks are on top

4

Repeat steps for the other side.

## MAINTENANCE

To ensure the longevity and hygiene of your ear pads, follow these maintenance guidelines:

- **Cleaning:** You can clean the outer surface of the ear pads with soapy water as necessary. Do not submerge the pads in water, as they have a pinhole-sized air vent on the side to allow proper functioning.
- **Replacement Recommendation:** For optimal performance and comfort, it is recommended to replace your ear pads every 6 months, or sooner if signs of wear and tear are visible.

## UPGRADE YOUR HEADSETS

(Friendly reminder: Regular replacement of ear pads can help extend the performance and lifespan of your earmuff. We recommend a replacement every 6 months.)
