1. INTRODUCTION

Thank you for choosing the Nashi Compact Pro Smart Bidet Toilet Seat. This manual provides detailed instructions for the safe and efficient installation, operation, and maintenance of your new bidet seat. Please read this manual thoroughly before use and keep it for future reference.

2. KEY FEATURES

- **Wash and Dry Function:** The Compact Pro bidet incorporates water wash and drying functions. The water jet, heated instantaneously, features 4 temperature levels and 4 pressure levels. The drying air has 4 temperature levels. Functions are controllable from the side control panel. For enhanced hygiene, an intimate hygiene filter is included, capable of removing organic matter from the water.
- **Self-Cleaning and Complete Hygiene:** The retractable stainless chrome injector (anti-bacterial and anti-corrosive) is detachable and self-cleans before and after use. The nozzle position is adjustable in 4 positions and offers 4 wash functions (anal, feminine, children, and massage). Additionally, it includes a presence sensor to prevent accidental activation.
- **Heated Seat and Built-in Deodorizer:** For greater comfort during use, the heated seat has 4 different temperature levels and an occupancy sensor. When not in use, an energy-saving mode can be configured to maintain the seat at a low constant temperature. It also includes a bamboo charcoal deodorizer to keep the bathroom fresh.
- **Durable and Quality Materials:** The lid and seat are manufactured from high-quality, resistant ABS. This equipment has an IPX4 protection rating, certified for high water resistance. The seat also includes adjustable LED courtesy lights.
- **Maximum Autonomy for Children and Seniors:** The Nashi toilet seat is ideal for maintaining proper hygiene in sensitive areas for the entire family, including children and seniors, who will gain greater independence. Both the toilet seat and lid feature soft-close functionality, eliminating slams and noise.
- **Easy Installation and Compatibility:** It fits toilets where the distance from the cistern to the tip of the closed lid is

50 cm or more. It only requires a water inlet and a power outlet for easy installation.

3. PACKAGE CONTENTS

The Nashi Compact Pro package includes the following items:

- Nashi Compact Pro Bidet Toilet Seat/Lid
- Complete Instruction Manual
- Hose (50 cm)
- T-connector
- Screws and installation hardware
- Power cable (1.5 m, Type F plug, 220V)

KIT DE MONTAJE

4. INSTALLATION GUIDE

Before starting the installation, ensure you have all the components listed in the Package Contents section. It is important to disconnect the power and close the main water supply valve before proceeding.

4.1. Compatibility Check

Measure the distance from the cistern to the front tip of your toilet bowl. The Nashi Compact Pro requires a minimum distance of 50 cm for proper fit. Refer to the diagram below for guidance.

Figure 4.1: Diagram illustrating how to measure your toilet for compatibility. Ensure the distance from the cistern to the front of the bowl is at least 50 cm.

4.2. Step-by-Step Installation

Follow these steps to install your Nashi Compact Pro bidet toilet seat:

1. **Prepare the Toilet:** Remove your existing toilet seat and clean the toilet bowl surface.
2. **Install Mounting Plate:** Place the mounting plate onto the toilet bowl, aligning the holes. Insert the rubber nuts, plastic panel, and flat gasket one by one into the toilet holes.

3. **Secure Mounting Plate:** Insert the screws and tighten them to secure the mounting plate.
4. **Attach Bidet Seat:** Slide the main bidet seat structure onto the mounting plate until you hear a "click," indicating it is securely in place.
5. **Connect Water Inlet:** Connect the water inlet hose to the bidet seat's water connection point.
6. **Install T-Valve:** Screw the T-shaped shut-off valve onto the wall water supply.
7. **Connect Filter:** Screw the water filter onto the T-shaped valve.
8. **Connect Hose to Filter:** Screw the connector joint of the hose to the filter.
9. **Connect Power:** Plug the power cable into a suitable 220V outlet.

5. OPERATING INSTRUCTIONS

The Nashi Compact Pro offers various functions for personalized hygiene. All functions are controlled via the side panel.

5.1. Control Panel Overview

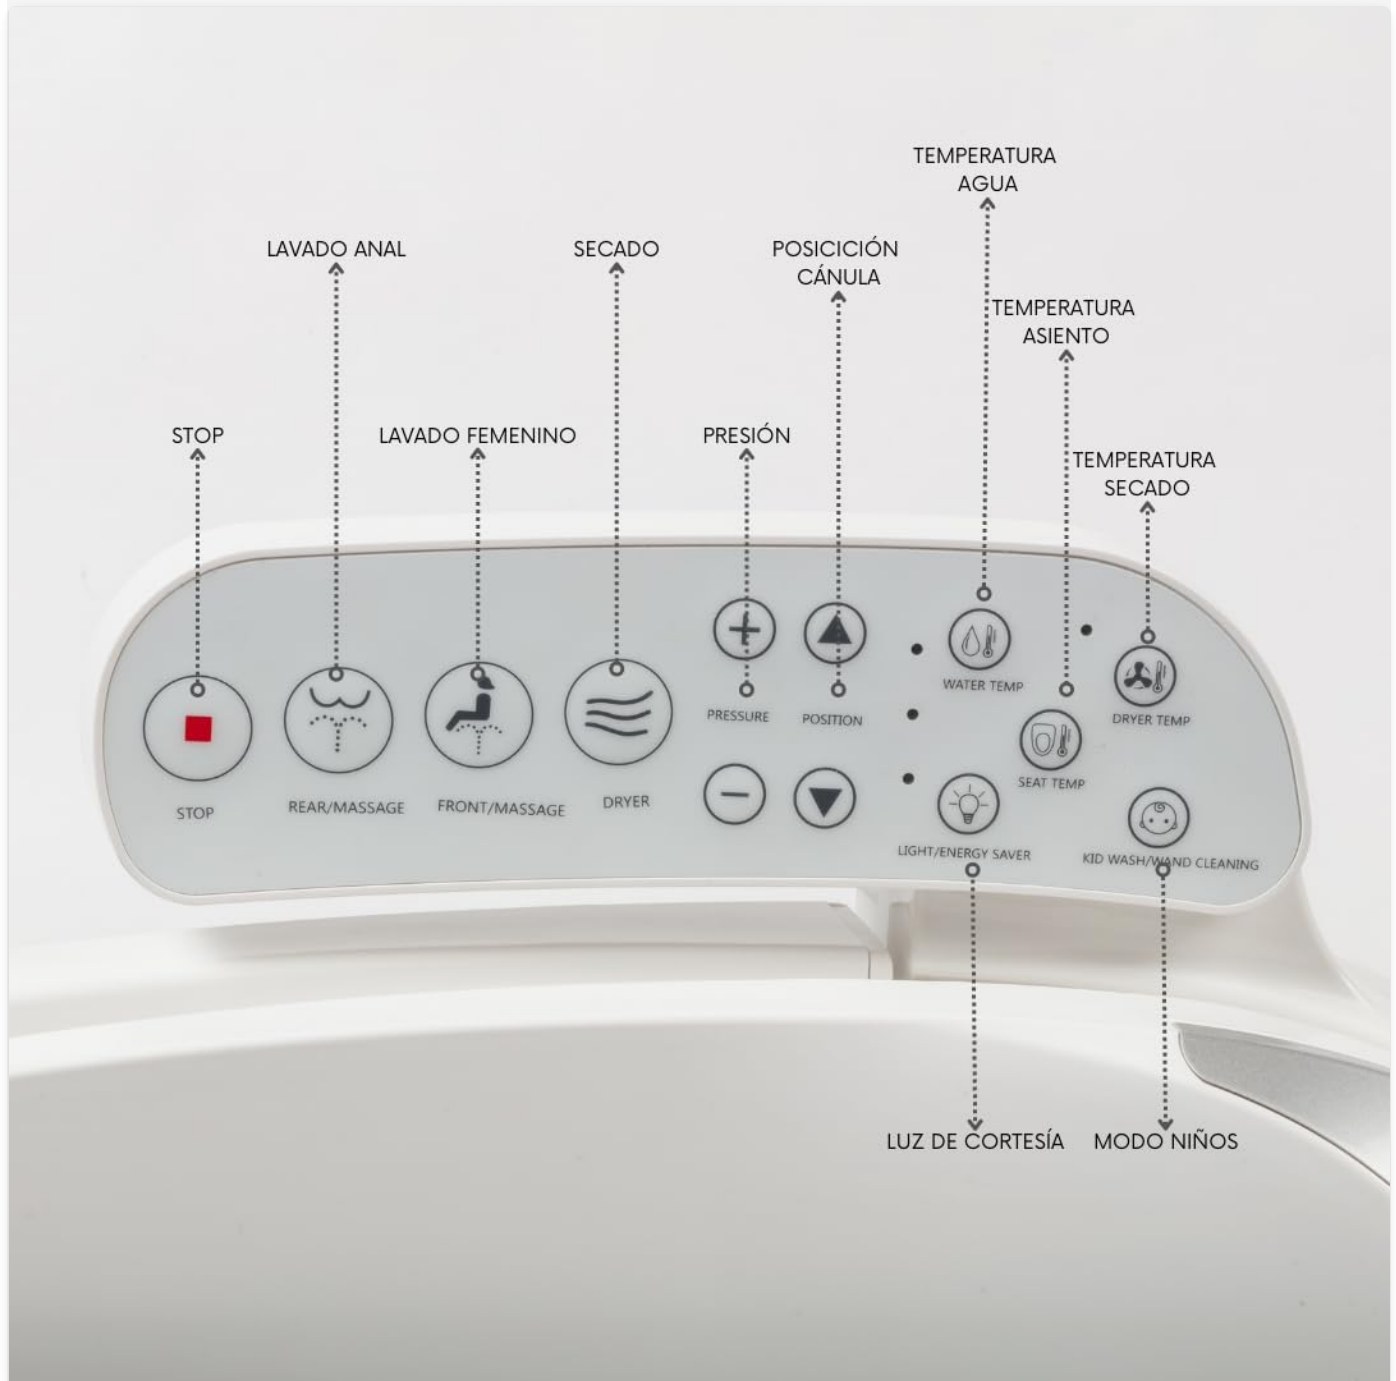

Figure 5.1: Detailed view of the Nashi Compact Pro control panel, showing buttons for Stop, Rear/Massage wash, Front/Massage wash, Dryer, Pressure adjustment, Nozzle Position, Water Temperature, Seat Temperature, Dryer Temperature, Courtesy Light/Energy Saver, and Kids Mode.

5.2. Core Functions

- **Heated Seat:** The seat automatically heats up when occupied. Use the "Seat Temp" buttons on the control panel to adjust between 4 temperature levels.
- **Washing Functions:**
 - **Rear Wash / Massage:** Activates the posterior wash. Press again for massage function.
 - **Feminine Wash / Massage:** Activates the feminine wash. Press again for massage function.

- **Kids Mode:** Provides a gentle wash suitable for children.
- **Water Temperature:** Adjust the water temperature using the "Water Temp" buttons (4 levels).
- **Water Pressure:** Adjust the water pressure using the "Pressure" buttons (4 levels).
- **Nozzle Position:** Adjust the nozzle's position using the "Position" buttons (4 positions).
- **Drying Function:** After washing, press the "Dryer" button to activate the warm air dryer. Adjust air temperature using the "Dryer Temp" buttons (4 levels).
- **Stop:** Press the "Stop" button to cease any active washing or drying function.
- **Presence Sensor:** The bidet seat features a sensor that detects occupancy, preventing accidental activation of functions when not in use.
- **Energy Saving Mode:** Activate this mode to maintain the heated seat at a lower, constant temperature when not in use, saving energy.
- **Courtesy Light:** The seat includes adjustable LED courtesy lights for nighttime use.

Figure 5.2: Visual representation of key operating features: heated seat, warm water wash, warm air drying, and the presence sensor.

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your Nashi Compact Pro bidet toilet seat.

- **Nozzle Cleaning:** The retractable nozzle is self-cleaning before and after each use. For deeper cleaning, the nozzle can be detached.
- **Filter Replacement:** The intimate hygiene filter should be replaced periodically, typically every 6 months, depending on water quality and usage. To replace, close the water supply, unscrew the old filter, and screw in the new one.
- **General Cleaning:** Clean the exterior of the bidet seat with a soft, damp cloth and mild, non-abrasive cleaner. Avoid harsh chemicals that could damage the ABS material.
- **Deodorizer:** The built-in bamboo charcoal deodorizer helps maintain freshness. No specific maintenance is required for this component.

7. TROUBLESHOOTING

If you encounter any issues with your Nashi Compact Pro, please refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No power	Power cable unplugged, circuit breaker tripped, power outlet malfunction.	Check power connection, reset circuit breaker, test outlet with another device.
No water spray	Water supply valve closed, water filter clogged, hose kinked.	Open water supply valve, check/replace water filter, straighten hose.
Water temperature not adjusting	Incorrect settings, internal heating element issue.	Verify temperature settings on control panel. If issue persists, contact customer support.
Heated seat not working	Occupancy sensor not detecting user, seat temperature setting too low.	Ensure proper seating, adjust seat temperature settings.
Weak water pressure	Water pressure setting too low, water filter clogged, low household water pressure.	Adjust pressure setting, check/replace water filter, consult a plumber if household pressure is low.

If the problem persists after attempting these solutions, please contact Nashi customer support for assistance.

8. TECHNICAL SPECIFICATIONS
