Moen 87233SRS

Moen Adler Kitchen Faucet Instruction Manual

Model: 87233SRS

Brand: Moen

PRODUCT OVERVIEW

The Moen Adler 87233SRS Kitchen Faucet combines classic design with modern functionality. It features a single-handle for precise control, a retractable spray head with Power Clean™ spray technology for enhanced cleaning, and a Spot Resist™ Stainless finish to minimize fingerprints and water spots. This faucet is designed for versatile installation in 1- or 3-hole sinks.

SETUP AND INSTALLATION

For detailed installation instructions, please refer to the official Installation Manual PDF provided by Moen. A digital copy can be found [here](#).

The installation process typically involves the following steps:

1. **Unpack Components:** Verify all parts are present, including the faucet body, deck plate (if needed for 3-hole installation), rubber gasket, mounting bracket, mounting nut, hose protector, spray head, and water supply lines.
2. **Prepare for Installation:** Decide whether to use the deck plate for 3-hole sinks or the rubber gasket for 1-hole sinks.
3. **Install Faucet Body:** Insert the faucet body into the sink hole. From underneath the sink, slide the mounting bracket onto the main shaft, ensuring the water supply lines pass through the designated spaces. Secure it with the mounting nut.
4. **Attach Hose Protector:** Put on the hose protector and tighten it by hand until snug.
5. **Connect Spray Head Hose:** Connect the spray head to its hose. Push the hose all the way through the faucet body.
6. **Connect Main Water Line:** Connect the spray hose with the main water line using the quick connector.
7. **Attach Weight:** Clip the weight onto the hose at the yellow marker to ensure proper retraction of the spray head.
8. **Connect Water Supply Lines:** Use Teflon tape where necessary on the threads of your water supply connections. Connect the hot and cold water supply lines to the corresponding inlets on the faucet and tighten with a wrench.
9. **Test for Leaks:** Run water through the faucet and carefully check all connections for any leaks.

OPERATING INSTRUCTIONS

The Moen Adler faucet is designed for ease of use:

- **Water Flow and Temperature Control:** The single lever handle provides precise control over both water temperature and volume. Move the handle left for hot water, right for cold water, and up/down to adjust flow.
- **Pulldown Spray Head:** The spray head can be pulled down for extended reach and flexibility. It features the Reflex system for smooth operation and secure docking when not in use.
- **Spray Modes:** Easily switch between an aerated stream and a powerful rinse spray at the push of a button located on the spray head. The Power Clean™ spray technology delivers 50% more spray power for efficient cleaning.

Figure 4: The Moen Adler faucet seamlessly integrates into various kitchen décors, offering both style and functionality.

MAINTENANCE

To maintain the appearance and functionality of your Moen Adler faucet:

- **Cleaning the Finish:** The Spot Resist™ Stainless finish is designed to resist fingerprints and water spots. Clean regularly with a soft, damp cloth and mild soap. Avoid abrasive cleaners, polishes, or harsh chemicals as they can damage the finish.
- **Cleaning the Spray Head:** Periodically clean the spray head nozzles to remove mineral buildup. You can gently rub the rubber nozzles with your finger or a soft brush to dislodge deposits.
- **General Care:** Ensure the faucet is not subjected to extreme temperatures. Regularly check for any loose connections or drips and address them promptly to prevent further issues.

MOEN

Spot Resist™ Technology

Keep your faucet looking cleaner with a finish that resists fingerprints and water spots.

WITH SPOT RESIST

WITHOUT SPOT RESIST

Figure 5: Spot Resist™ Technology helps keep your faucet looking cleaner by resisting fingerprints and water spots.

TROUBLESHOOTING

If you encounter issues with your faucet, consider the following common solutions:

- **Low Water Flow:** Check if the aerator is clogged with debris. Unscrew the aerator from the spray head and clean it. Also, ensure that the water supply valves under the sink are fully open.
- **Leaking:** Inspect all connections for tightness. If leaks persist, the internal cartridges may need replacement. Refer to the installation manual or contact Moen customer support.
- **Spray Head Not Retracting:** Ensure the weight on the hose is properly positioned and not obstructed. The Reflex system relies on this weight for smooth retraction.

SPECIFICATIONS

Feature	Detail
Brand	Moen
Model Name	Adler
Model Number	87233SRS
Color	Spot Resist Stainless
Material	Zinc (Faucet Body), Stainless Steel (Handle)
Mounting Type	Deck Mount
Number of Handles	1
Hole Count	1 (Optional deck plate for 3-hole installation)
Maximum Flow Rate	1.5 Gallons Per Minute
