5. SETUP AND INSTALLATION

The AKDY KF0010 faucet is designed for single-hole, deck-mounted installation. All necessary mounting hardware and supply lines are included for a straightforward setup.

1. Ensure the mounting surface is clean and free of debris.
2. Insert the faucet body into the single mounting hole on your sink or countertop.
3. Secure the faucet from underneath the sink using the provided mounting hardware. Tighten securely but do not overtighten.
4. Connect the hot and cold supply lines to the corresponding water supply valves. Ensure a watertight seal.
5. Connect the sprayer hose to the main faucet body.
6. Once all connections are made, slowly turn on the main water supply and check for any leaks.

6. OPERATING INSTRUCTIONS

The AKDY KF0010 faucet offers versatile operation for various kitchen tasks.

6.1. Water Flow and Temperature Control

The single lever handle controls both water flow and temperature. Move the handle up to increase flow and down to decrease it. Swivel the handle left for hot water and right for cold water.

6.2. Sprayer Functionality

The pull-down sprayer features three distinct setting modes: Stream, Spray, and Pause. A rocker switch on the sprayer head allows for easy toggling between Stream and Spray modes. The Pause button temporarily stops water flow, useful for moving the sprayer between tasks without turning off the main handle.

7. MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and optimal performance of your AKDY faucet.

7.1. Cleaning the Faucet Surface

Clean the chrome finish with a soft, damp cloth and mild soap. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish.

7.2. Cleaning Rubber Nozzles

The sprayer head features easy-to-clean rubber nozzles. To remove mineral buildup or debris, simply wipe the nozzles with your finger or a soft brush. This helps maintain consistent spray performance.

8. TROUBLESHOOTING

If you encounter any issues with your faucet, refer to the following common troubleshooting steps:

- **Low Water Pressure:** Check if the main water supply valves are fully open. Inspect the aerator/nozzles for mineral buildup and clean if necessary.
- **Leaks:** Ensure all connections, especially the supply lines and mounting hardware, are securely tightened. Check O-rings and gaskets for proper seating and damage.

- **Difficulty Adjusting Temperature:** Verify that both hot and cold water supply lines are connected correctly and that the shut-off valves are open.
- **Sprayer Not Functioning:** Check the sprayer hose for kinks or obstructions. Ensure the rocker switch is operating correctly.
