5. OPERATING INSTRUCTIONS

5.1 Charging Your iPhone

Place your compatible iPhone on the vertical charging pad. The MagSafe compatible design ensures proper alignment. The phone can be charged in both vertical and horizontal orientations.

5.2 Charging Your Apple Watch

Place your Apple Watch on the dedicated magnetic charging module at the top of the station. The watch will magnetically attach and begin charging.

5.3 Charging Your AirPods

Place your AirPods (with wireless charging case) on the flat charging pad at the base of the station. Ensure the charging case is centered on the pad for effective charging.

5.4 LED Indicator Lights

- **Blue Breathing Light:** Indicates that a device is charging correctly.
- **Blue and Green Flashing Lights:** Indicates foreign object detection or device misalignment. Adjust the device placement or remove any foreign objects.
- **Green Light (Always On):** Indicates standby mode. (Note: If a common 5V adapter is used, the green light may flash in standby mode).

8. MAINTENANCE

- Keep the charging station away from water and other liquids.
- Do not disassemble the product.
- Avoid extreme temperatures.
- Clean the surface with a soft, dry cloth.

9. TROUBLESHOOTING

- **Device not charging or LED flashing blue/green:** Ensure your device is correctly aligned on the charging pad. Remove any foreign metal objects or overly thick phone cases (over 4mm). Verify that the power adapter is the Quick Charger 3.0 (9-12V) provided or a compatible high-wattage adapter.
- **Slow charging:** Confirm you are using the Quick Charger 3.0 adapter. Lower wattage adapters (e.g., standard 5V USB) will result in slower charging speeds, especially when charging multiple devices.
- **Apple Watch not charging:** Ensure the watch is properly seated on the magnetic module. Some watch bands might interfere with optimal placement.
- **AirPods not charging:** Ensure your AirPods case supports wireless charging and is correctly positioned on the base pad.
