# UiiSii GM-7 Rainbow LED Gaming Headset User Manual

Model: GM-7 | Brand: UiiSii

## 1. Introduction

The UiiSii GM-7 Rainbow LED Gaming Headset is designed to provide an immersive audio experience for gaming across multiple platforms. Featuring a high-sensitivity microphone, active noise cancellation, and vibrant LED lighting, this wired headset offers comfort and clear communication for extended gaming sessions. It is compatible with various devices including PC, PlayStation 4, and Xbox One.

## 2. Setup Instructions

Follow these steps to connect your UiiSii GM-7 Gaming Headset to your device.

### 2.1 Connecting to PC

1. Connect the 3.5mm audio jack from the headset to the audio output port on your PC.
2. If your PC has separate microphone and headphone jacks, use the included Y-splitter adapter to connect both the headphone and microphone plugs to the corresponding ports on your PC.
3. Plug the USB connector into an available USB port on your PC to power the LED lighting.

## 2.2 Connecting to PS4 / Nintendo Switch

1. Connect the 3.5mm audio jack directly into the controller's 3.5mm port.
2. Plug the USB connector into an available USB port on your console (or a USB power adapter) to power the LED lighting.
3. For Nintendo Switch, only audio is supported via the 3.5mm jack.

## 2.3 Connecting to Xbox One

1. For newer Xbox One controllers with a 3.5mm jack, connect the headset's 3.5mm audio jack directly to the controller.
2. For older Xbox One controllers without a 3.5mm jack, an Xbox One Stereo Headset Adapter (not included) is required. Connect the headset to the adapter, then plug the adapter into the controller.
3. Plug the USB connector into an available USB port on your console (or a USB power adapter) to power the LED lighting.

## 2.4 Connecting to Laptops / iPads / Smartphones

1. Connect the 3.5mm audio jack directly into the device's 3.5mm port.
2. The USB connection is only for LED lighting and is optional for these devices.

**Note: This headset is not compatible with older Xbox One models, Xbox 360, or PlayStation 3.**

Image 2.2: Headset connectors (USB for LED, 3.5mm for audio) and inline control unit.

## 3. Operating Instructions

### 3.1 Microphone Usage

The headset features a 360-degree adjustable microphone. You can rotate the microphone arm up or down to position it optimally for clear voice capture. When not in use, the microphone arm can be rotated upwards to keep it out of the way.

Image 3.1: The microphone can be adjusted 120 degrees vertically. The image also illustrates noise cancellation.

## 3.2 Volume Control and Mute Function

An inline control unit on the cable allows for easy adjustment of volume and microphone muting.

- **Volume Adjustment:** Use the scroll wheel or '+' and '-' buttons on the inline control to increase or decrease the audio volume.
- **Microphone Mute:** Flip the switch on the inline control to mute or unmute the microphone. This is useful when you need privacy or do not wish to transmit your voice.

### 3.3 LED Lighting

The headset features rainbow LED lighting. To activate the lighting, ensure the USB connector is plugged into a powered USB port. The LED lighting is for aesthetic purposes only and does not affect audio performance.

## 4. Maintenance

Proper maintenance ensures the longevity and optimal performance of your headset.

- **Cleaning:** Gently wipe the earcups and headband with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Cable Care:** The headset features a durable, braided cable. Avoid sharp bends, twists, or excessive pulling on the cable to prevent internal damage.
- **Storage:** Store the headset in a clean, dry place away from extreme temperatures and direct sunlight.
- **Earpad Longevity:** Over time, earpads may show signs of wear. While durable, regular cleaning and careful handling can extend their lifespan.

## 5. Troubleshooting

If you encounter issues with your headset, refer to the following common solutions:

### 5.1 No Sound or Low Volume

- Ensure the 3.5mm audio jack is fully inserted into the device's audio port.
- Check the volume control on the headset's inline unit and your device's system volume.
- Verify that the correct audio output device is selected in your computer's sound settings.

### 5.2 Microphone Not Working

- Ensure the microphone mute switch on the inline control is in the 'unmute' position.
- Check that the microphone arm is properly positioned and not fully retracted.
- For PS4: Press and hold the PlayStation button on your controller, then navigate to 'Sound and Peripherals' and ensure 'Mute All Microphones' is not selected. Also, check the input device settings.
- Verify that the correct microphone input device is selected in your device's sound settings.
- If using a PC with separate audio/mic jacks, ensure the Y-splitter adapter is correctly connected.

### 5.3 Static or Unwanted Noise

- Try unplugging and re-plugging the 3.5mm audio jack and USB connector.
- Ensure the cable is not tangled or near other electronic devices that might cause interference.
- Test the headset with a different device to determine if the issue is with the headset or the connected device.

## 6. Product Specifications

| Feature | Specification |
|---|---|
| Brand | UiiSii |
| Model Number | GM-7 |
| Color | Blue |
