SETUP INSTRUCTIONS

Setting up your Amazon Smart Plug is a straightforward process. No additional smart home hub is required.

- 1. Plug In:** Insert the Amazon Smart Plug into a standard electrical wall outlet. Ensure the outlet is functioning correctly.

2. **Open Alexa App:** Open the Amazon Alexa application on your smartphone or tablet. If you do not have the app, download it from your device's app store.
3. **Device Discovery:** The Alexa App should automatically detect the new Smart Plug. If not, navigate to the 'Devices' section in the app, tap the '+' icon, and select 'Add Device'. Choose 'Plug' and follow the on-screen instructions.
4. **Connect to Wi-Fi:** The app will guide you through connecting the Smart Plug to your home Wi-Fi network. Ensure your Wi-Fi network is 2.4 GHz, as the Smart Plug may not support 5 GHz networks.
5. **Name Your Plug:** Assign a descriptive name to your Smart Plug (e.g., "Living Room Lamp," "Coffee Maker"). This name will be used for voice commands.
6. **Activate with Voice:** Once configured, you can activate the plug using a voice command to your Alexa-enabled device (e.g., "Alexa, turn on Living Room Lamp").

OPERATING YOUR AMAZON SMART PLUG

The Amazon Smart Plug offers various methods for controlling your connected devices.

Voice Control with Alexa

Once set up, you can use simple voice commands with any Alexa-enabled device (e.g., Echo, Echo Dot) to control the Smart Plug.

- "Alexa, turn on [Plug Name]."
- "Alexa, turn off [Plug Name]."
- "Alexa, is [Plug Name] on?"

Scheduling and Routines

Automate your devices by setting schedules or creating routines within the Alexa App.

MAINTENANCE

The Amazon Smart Plug requires minimal maintenance to ensure optimal performance.

- **Cleaning:** Disconnect the Smart Plug from the wall outlet before cleaning. Wipe the exterior with a soft, dry cloth. Do not use liquid cleaners or abrasive materials.
- **Firmware Updates:** Ensure your Alexa App is up to date. The Smart Plug's firmware updates are typically managed automatically through the Alexa App to provide the latest features and security enhancements.
- **Environmental Conditions:** Use the Smart Plug indoors in dry conditions. Avoid exposure to moisture, extreme temperatures, or direct sunlight.

TROUBLESHOOTING

- Check if the connected appliance is powered on and functioning correctly when plugged directly into the wall.

- Restart the Smart Plug by unplugging it for 10 seconds and then plugging it back in.

- **Alexa Voice Commands Not Working:**

- Check the Alexa App to confirm the Smart Plug is listed and online.
