SETUP

Unpacking

Carefully remove the wet grinder from its packaging. Inspect the appliance for any signs of damage. Retain the packaging for future storage or transport.

Placement

Place the wet grinder on a stable, flat, and dry surface, away from direct heat sources or water. Ensure there is adequate ventilation around the motor unit.

Initial Cleaning

Before first use, clean the stainless steel drum, grinding stones, and lid with mild soap and water. Rinse thoroughly and dry completely. Do not immerse the motor unit in water.

OPERATING INSTRUCTIONS

Preparation of Ingredients

Soak ingredients like rice and lentils as per recipe requirements. Drain excess water before adding them to the grinder. For best results, add ingredients in small batches.

Assembly

1. Place the grinding stones assembly inside the stainless steel drum.
2. Position the drum securely on the motor unit base.
3. Ensure the interlocking mechanism is engaged correctly.

Grinding Process

1. Add the prepared ingredients to the drum.
2. Secure the transparent lid on top of the drum.
3. Plug the appliance into a suitable power outlet.
4. Switch on the grinder.
5. Gradually add water through the lid opening as needed to achieve the desired consistency. Avoid adding too much water at once.
6. Allow the grinder to operate until the ingredients are finely ground. The grinding time will vary depending on the ingredients and desired texture.
7. Once grinding is complete, switch off the appliance and unplug it from the power outlet.

Removing Batter

Carefully remove the lid, then lift out the grinding stone assembly. Scrape the batter from the stones and drum using a spatula.

MAINTENANCE

Cleaning

- Always unplug the grinder before cleaning.
- Wash the stainless steel drum, grinding stones, and lid immediately after use with mild detergent and water.
- Wipe the motor unit with a damp cloth. Do not use abrasive cleaners or immerse the motor unit in water.
- Ensure all parts are thoroughly dry before reassembling or storing.

Storage

Store the wet grinder in a clean, dry place when not in use. Keep it away from children.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Grinder does not start	Not plugged in; Power outage; Interlocking mechanism not engaged.	Check power connection; Verify power supply; Ensure drum and lid are correctly placed and locked.
Slow grinding or motor struggling	Overloading with ingredients; Insufficient water; Ingredients not soaked properly.	Reduce quantity of ingredients; Add water gradually; Ensure ingredients are adequately soaked.
Excessive noise during operation	Improper assembly of grinding stones; Dry grinding; Foreign object in drum.	Reassemble stones correctly; Ensure sufficient water is added; Check for and remove any foreign objects.
Motor heating up	Prolonged continuous operation; Overloading.	Allow the motor to cool down between grinding sessions; Do not overload the grinder.

If the problem persists after attempting these solutions, please contact customer service.

SPECIFICATIONS

Model: PWG08

Capacity: 2 Litres

Wattage: 200 Watts

Drum Material: Stainless Steel

Body Material: Plastic

Item Weight: 12.3 Kilograms

Dimensions (L x W x H): 49L x 30W x 31H Centimeters

Power Source: AC adapter

Country of Origin: India
