Cutex BB-28-40264-NS

Cutex Metal Bobbins & Storage Case User Manual

Model: BB-28-40264-NS

1. Introduction

This manual provides essential information for the proper use and care of your Cutex Pack of 28 Metal Bobbins with Storage Case. These high-quality bobbins are designed for various Juki industrial sewing machine models, ensuring smooth operation and organized storage.

2. Product Overview

The Cutex bobbin set includes 28 metal bobbins and a durable storage case. The case features a clear top for easy visibility of thread colors and a hinged lid with a latch for secure closure. A foam insert gently holds the bobbins in place.

2.1 Key Features

- Set of 28 high-quality metal bobbins.
- Compatible with numerous Juki industrial sewing machine models.
- Clear bobbin storage box with foam insert.
- Hinged lid with latch for secure storage.

2.2 Product Components

Figure 1: Cutex Metal Bobbins with Storage Case.

This image displays the complete set of 28 metal bobbins neatly organized within their transparent storage case, featuring a protective foam insert.

Figure 2: Individual Bobbins and Storage Case.

This image shows several individual metal bobbins alongside the open storage case, highlighting their design and the case's interior layout.

Figure 3: Top View of the Bobbin Storage Case.

This image provides a top-down view of the bobbin storage case, clearly showing the transparent lid and the Cutex branding.

3. Setup and Preparation

Before using the bobbins, ensure they are wound with the desired thread. The storage case is designed for immediate use to organize your bobbins.

3.1 Winding Bobbins

1. Place an empty Cutex metal bobbin onto your Juki industrial sewing machine's bobbin winder spindle.
2. Follow your sewing machine's specific instructions for threading the bobbin winder and winding the bobbin with your chosen thread.
3. Ensure the bobbin is wound evenly and to the appropriate capacity to prevent tangling or machine issues.

3.2 Using the Storage Case

- Open the hinged lid of the storage case by releasing the latch.
- Place wound bobbins into the individual slots within the foam insert. The foam is designed to hold bobbins gently and securely.
- Close the lid securely to protect your bobbins from dust and keep them organized.

4. Operating Instructions

These bobbins are designed for use with a wide range of Juki industrial sewing machines. Always refer to your specific sewing machine's manual for detailed instructions on installing and using bobbins.

4.1 Compatible Juki Models

The Cutex metal bobbins are compatible with Juki models including, but not limited to:

- DDL-105, DDL-115, DDL-227, DDL-555, DDL-5550
- DDL-8300, DDL-8500, DDL-8700, DDL-8900
- DLD-432, DLM-522, DLM-5200, DLM-5400
- DLN-412, DLN-415, DLN-5410, DLU-450
- And many more industrial Juki models.

4.2 Bobbin Installation

1. Ensure your sewing machine is turned off and unplugged before handling internal components.
2. Open the bobbin case area of your Juki machine.
3. Insert a wound Cutex bobbin into the bobbin case, ensuring the thread unwinds in the correct direction as specified by your machine's manual.
4. Close the bobbin case and reassemble any covers.
5. Perform a test stitch on scrap fabric to verify proper tension and thread delivery.

5. Maintenance

5.1 Bobbin Care

- Keep bobbins clean and free of lint and thread residue.
- Store bobbins in the provided case to prevent damage and tangling.
- Avoid dropping bobbins, as this can deform them and affect machine performance.

5.2 Storage Case Care

- Wipe the case with a soft, damp cloth to clean. Avoid harsh chemicals.
- Ensure the case is dry before closing to prevent moisture buildup.

6. Troubleshooting

Problem	Possible Cause	Solution
Bobbin does not fit or is too tight on winder spindle.	Slight manufacturing variation in bobbin inner diameter.	Try a different bobbin from the set. While all bobbins are designed to fit, minor variations can occur. If multiple bobbins exhibit this issue, contact customer support.

Problem	Possible Cause	Solution
Bobbin is too loose on winder spindle.	Slight manufacturing variation in bobbin inner diameter.	Try a different bobbin from the set. Ensure the bobbin winder spindle is clean and free of debris.
Thread tangling or uneven winding.	Incorrect bobbin winding technique or machine tension.	Refer to your sewing machine's manual for proper bobbin winding and tension adjustment. Ensure the thread path is clear.
