

Fossil BQ2491

Fossil Bannon Multifunction Smoke Stainless Steel Watch BQ2491 User Manual

Model: BQ2491

1. INTRODUCTION

Thank you for choosing the Fossil Bannon Multifunction Smoke Stainless Steel Watch. This manual provides detailed instructions for the proper setup, operation, and maintenance of your timepiece. Please read this manual thoroughly to ensure optimal performance and longevity of your watch.

2. PRODUCT OVERVIEW

The Fossil Bannon BQ2491 is a multifunction watch featuring a durable stainless steel case and bracelet, an analog display, and multiple sub-dials for enhanced functionality. Familiarize yourself with the key components:

- **Crown:** Used for setting the time and date.
- **Pushers (A & B):** Used for adjusting the multifunction sub-dials.
- **Main Dial:** Displays hours, minutes, and seconds.
- **Sub-dials:** Typically display day of the week, date, and 24-hour time.
- **Foldover Clasp:** Secures the watch to your wrist.

Figure 2.2: Rear view of the watch bracelet, showing the Fossil-branded foldover clasp.

3. SETUP

3.1. Setting the Time

1. Pull the crown out to position 2 (the outermost position).
2. Turn the crown clockwise or counter-clockwise to move the hour and minute hands to the desired time. Ensure the AM/PM is correctly set if your watch has a 24-hour indicator or date changes at midnight.
3. Once the time is set, push the crown back into position 0 (normal operating position).

3.2. Setting the Date and Day (Multifunction Dials)

The BQ2491 features sub-dials for day and date. These are typically adjusted using the pushers.

1. **Date Sub-dial:** Gently press Pusher A (top pusher) repeatedly to advance the date hand to the correct date.
2. **Day Sub-dial:** Gently press Pusher B (bottom pusher) repeatedly to advance the day hand to the correct

day of the week.

3. If your watch has a 24-hour sub-dial, it usually synchronizes with the main time setting and does not require separate adjustment.
4. Avoid setting the date or day between 9 PM and 3 AM, as this can interfere with the automatic date change mechanism and potentially damage the movement.

4. OPERATING YOUR WATCH

Once the time, date, and day are set, your Fossil Bannon watch will operate continuously. The main hands display the current time, while the sub-dials provide additional information at a glance.

5. MAINTENANCE

5.1. Cleaning Your Watch

- Wipe the watch case and stainless steel bracelet regularly with a soft, dry cloth to remove dust and fingerprints.
- For more thorough cleaning, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials.

5.2. Battery Replacement

Your watch is powered by one LR44 battery. When the watch stops running, the battery needs to be replaced. It is recommended to have the battery replaced by a qualified watch technician to ensure the water resistance seal is properly maintained.

5.3. Water Resistance

The Fossil Bannon BQ2491 has a water resistance rating of 50 meters (5 ATM). This means it is suitable for short periods of recreational swimming, showering, or washing hands. It is **not** suitable for diving, snorkeling, or high-impact water sports. Always ensure the crown is fully pushed in before any contact with water.

6. TROUBLESHOOTING

- **Watch not running:**
 - Check if the crown is fully pushed in.
 - The battery may need replacement. Consult a professional watch technician.
- **Time or date incorrect:**
 - Refer to Section 3: Setup, to reset the time, date, and day.
 - Ensure you are not attempting to set the date/day between 9 PM and 3 AM.
- **Condensation inside the crystal:**
 - This may indicate a breach in the water resistance seal. Avoid further contact with water and seek professional service immediately.

7. SPECIFICATIONS

Figure 7.1: Key dimensions of the Fossil Bannon BQ2491 watch.

Feature	Detail
Model Number	BQ2491
Movement Type	Multifunction Quartz
