Spigen AFL00906

Spigen NeoFlex Screen Protector Instruction Manual

Model: AFL00906 | For Samsung Galaxy S20 / S20 5G

INTRODUCTION

This manual provides detailed instructions for the proper installation and care of your Spigen NeoFlex Screen Protector for the Samsung Galaxy S20 and S20 5G. Please read all instructions carefully before proceeding with installation to ensure optimal performance and longevity of your screen protector.

COMPATIBILITY

The Spigen NeoFlex Screen Protector (Model AFL00906) is specifically designed for the **Samsung Galaxy S20** and **Samsung Galaxy S20 5G** models. It is not compatible with the Samsung Galaxy S20+ or S20 Ultra.

Touch response
**Unhindered interaction
for fingerprint sensor.**

This image illustrates that the screen protector is exclusively compatible with the Samsung Galaxy S20. Devices like the S20+ and S20 Ultra are not supported.

PRODUCT FEATURES

- **Curved Screen Solution:** Designed for edge-to-edge coverage on curved screens.
- **Wet Installation:** Ensures a bubble-free application and prevents lifting.
- **Optical Clarity:** Preserves a clear screen with no glares or rainbow effects.
- **Self-Healing Technology:** Helps keep the screen free from minor scratches and fingerprints.
- **Case Friendly:** Compatible with all Spigen cases.

PACKAGE CONTENTS

Your Spigen NeoFlex Screen Protector package includes the following items:

- 2x Spigen NeoFlex Screen Protectors
- 1x Spray Bottle (Installation Solution)
- 1x Squeegee
- 1x Microfiber Cloth

- Dust Removal Stickers
- Fingerprint Scanning Guide

This image displays the complete contents of the Spigen NeoFlex Screen Protector kit, including two screen protectors, spray, squeegee, cloth, and guides.

INSTALLATION GUIDE (WET APPLICATION)

For best results, perform the installation in a dust-free environment. Watch the official tutorial video for visual guidance.

Your browser does not support the video tag.

Official Spigen NeoFlex Screen Protector installation video. This video provides a step-by-step visual guide for applying the screen protector using the wet installation method.

Step-by-Step Instructions:

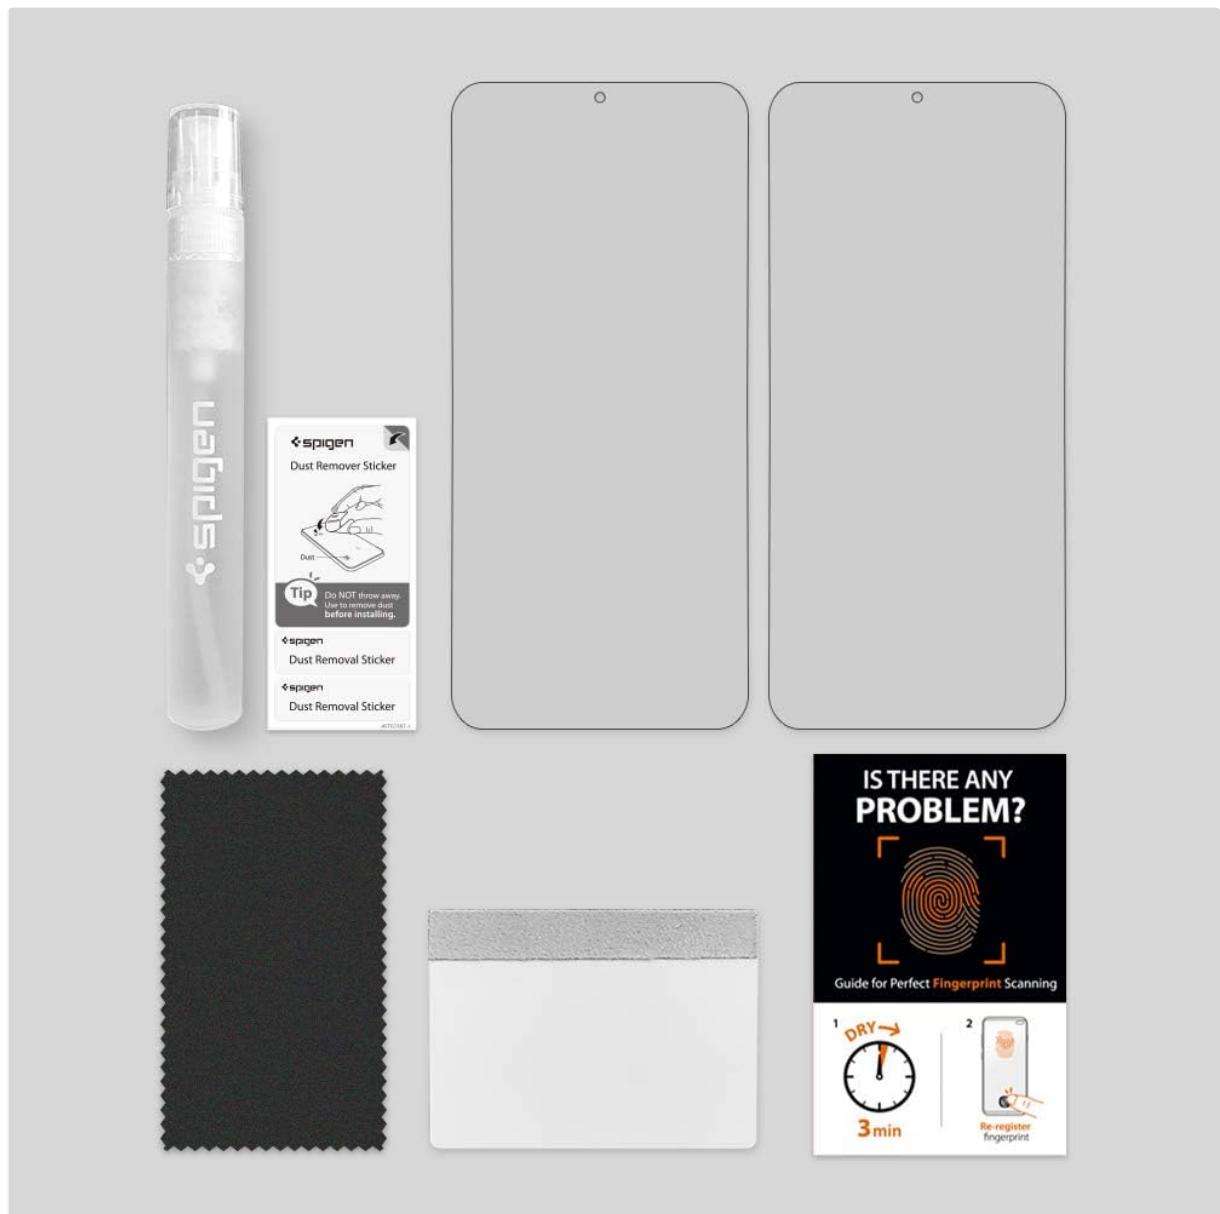

1. **Prepare Your Device:** Thoroughly clean your phone screen using the provided microfiber cloth to remove all dust, smudges, and fingerprints. Use dust removal stickers for any remaining particles.
2. **Prepare the Screen Protector:** Lightly spray both sides of the screen protector with the installation solution from the spray bottle (approximately 10 sprays per side). Ensure the protector is evenly coated.

3. **Align and Apply:** Carefully align the wet screen protector onto your phone screen. The wet solution allows for minor adjustments to achieve perfect alignment.
4. **Squeegee Out Bubbles:** Using the provided squeegee, gently push out any excess solution and air bubbles from the center towards the edges of the screen protector. Apply firm, even pressure.

This image shows the squeegee being used to smooth the screen protector onto the phone, with the phone case still on for accurate alignment.

5. **Edge Adhesion:** Pay special attention to the curved edges. Use the squeegee to firmly press down the edges until they adhere completely.
6. **Final Drying:** Allow the screen protector to dry for at least 12-24 hours. Small bubbles or haziness may disappear as the solution evaporates. Avoid touching or using the phone excessively during this period.

This image demonstrates the wet installation process, showing the screen protector being sprayed with the installation solution before application.

OPERATING AND USAGE

Touch Response and Fingerprint Sensor:

The NeoFlex screen protector is designed to maintain the original touch sensitivity of your Samsung Galaxy S20. For optimal performance of the in-display fingerprint sensor, it is recommended to re-register your fingerprints after the screen protector has fully cured (24 hours post-installation).

Instruction manual Easy installation with tutorial videos.

This image illustrates the unhindered touch response and interaction with the fingerprint sensor after applying the screen protector.

Case Compatibility:

The Spigen NeoFlex screen protector is engineered to be case-friendly, ensuring a flawless fit with all Spigen cases without lifting or peeling at the edges.

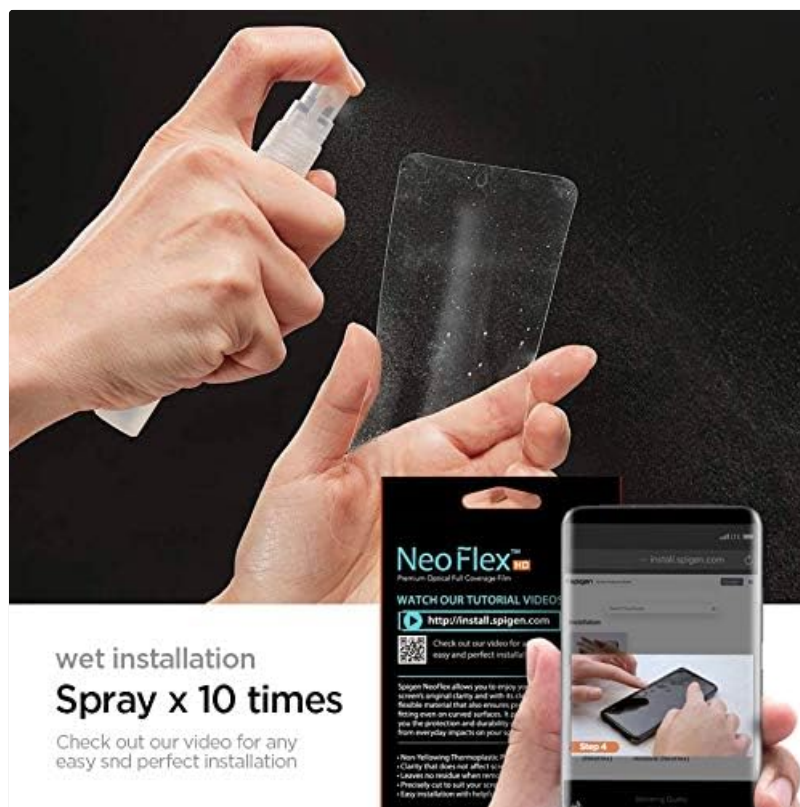

Crystal clarity
**Enjoy original display
without bubble or rainbow.**

This image demonstrates the seamless fit of the screen protector with a Spigen phone case, highlighting its case-friendly design.

Crystal Clarity:

Enjoy the original display quality of your device. The NeoFlex protector is designed to provide crystal clarity without introducing bubbles or rainbow effects.

This image showcases the crystal clarity of the screen protector, allowing the phone's display to be viewed without distortion or visual artifacts.

MAINTENANCE

Cleaning:

To clean your screen protector, gently wipe it with a soft, lint-free cloth, such as the microfiber cloth provided. For stubborn smudges, slightly dampen the cloth with water or a screen-safe cleaning solution. Avoid harsh chemicals or abrasive materials.

Self-Healing Properties:

The NeoFlex screen protector features self-healing technology, which can help minor scratches disappear over time. This property contributes to maintaining a smooth and clear screen surface.

TROUBLESHOOTING

- **Bubbles or Haze After Installation:** Small bubbles or haziness are normal immediately after wet installation. These should disappear within 12-24 hours as the installation solution fully evaporates. If large bubbles persist, gently try to push them out with the squeegee towards the nearest edge.
- **Edges Not Sticking:** Ensure sufficient solution was applied to the edges during installation and that firm pressure was used with the squeegee to secure them. Allow adequate drying time.
- **Fingerprint Sensor Issues:** If the fingerprint sensor is not responding accurately, ensure you have re-registered your fingerprints after the screen protector has fully dried.

If you encounter persistent issues, please refer to the official Spigen support resources or contact customer service.

SPECIFICATIONS

Brand	Spigen
-------	--------

Model Number	AFL00906
Compatible Devices	Samsung Galaxy S20, Samsung Galaxy S20 5G
Material	Crystal (Thermoplastic Polyurethane Film)
Item Hardness	9H (film equivalent)
Product Dimensions	5.76"L x 2.6"W
