2. IMPORTANT SAFETY INFORMATION

WARNING:

- Exceeding the maximum load limits may cause damage to the cabinet and potential injury.
- Maximum load on top panel: 44 lb (20 kg).
- Maximum load per shelf: 51 lb (23 kg).
- Maximum load per drawer: 55 lb (25 kg).
- Always secure the cabinet to the wall using the provided anti-tip hardware to prevent tipping injuries, especially if children are present.

3. PRODUCT OVERVIEW

The Lommarp Cabinet features a classic design with practical storage solutions. It includes two upper doors that open to reveal internal shelving (one shelf included), and a spacious lower drawer for additional storage. The light beige finish and brass-colored knobs complement various interior styles.

5. SETUP AND ASSEMBLY

Assembly of the IKEA Lommarp Cabinet is required. Please follow the detailed instructions provided in the separate assembly guide that came with your product. Below are general steps to ensure a smooth assembly process:

1. **Unpack and Verify:** Carefully unpack all components and hardware. Compare them against the parts list in your assembly guide to ensure all pieces are present and undamaged.
2. **Prepare Workspace:** Choose a clean, flat, and spacious area for assembly. Lay down a blanket or cardboard to protect the cabinet parts and your floor.
3. **Follow Instructions:** Adhere strictly to the step-by-step diagrams and instructions in the assembly guide. Do not skip steps.
4. **Secure Connections:** Ensure all screws, dowels, and fasteners are tightened securely, but do not overtighten, which can strip threads or crack wood.
5. **Install Anti-Tip Hardware:** It is crucial to install the anti-tip hardware provided and secure the cabinet to a wall. This prevents the cabinet from tipping over, especially important in households with children.

6. **Check Stability:** Once assembled, gently shake the cabinet to ensure it is stable and level. Adjust feet or shims if necessary.

Note: If any parts are missing or damaged, do not proceed with assembly. Contact IKEA customer service for assistance.

6. OPERATING AND USAGE

The Lommarp Cabinet is designed for general storage. To operate, simply open the two upper doors or pull out the lower drawer using the provided knobs. Ensure items are placed evenly on shelves and within the drawer to maintain balance and prevent strain on the cabinet structure.

- **Load Distribution:** Distribute weight evenly across shelves and within the drawer. Avoid concentrating heavy items in one spot.
- **Weight Limits:** Adhere strictly to the maximum load limits: 44 lb on the top panel, 51 lb per shelf, and 55 lb per drawer. Overloading can cause structural damage.
- **Door and Drawer Operation:** Open and close doors and drawers gently. Avoid slamming them to prolong the life of hinges and runners.

7. MAINTENANCE AND CARE

Proper care will help maintain the appearance and longevity of your Lommarp Cabinet.

- **Cleaning:** Wipe clean with a damp cloth and a mild cleaner. Dry with a clean cloth. Avoid using abrasive cleaners, strong chemicals, or solvents, as these can damage the finish.
- **Dusting:** Regularly dust the surfaces with a soft, dry cloth.
- **Spills:** Immediately wipe up any spills to prevent staining or damage to the material.
- **Sunlight Exposure:** Avoid prolonged exposure to direct sunlight, which can cause fading or discoloration over time.
- **Humidity:** Maintain a stable room temperature and humidity level to prevent warping or cracking of the wood-based components.

8. TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Cabinet is Wobbly:**
 - Ensure all assembly screws and fasteners are tightened.
 - Check if the cabinet is on a level surface. Use shims under the legs if necessary to stabilize it.
 - Verify that the anti-tip hardware is securely installed and attached to the wall.
- **Doors or Drawer Do Not Close Properly:**
 - Check for obstructions inside the cabinet or drawer.
 - Inspect hinges and drawer runners for damage or misalignment. Adjust if possible according to the assembly guide.
 - Ensure the cabinet itself is level and square.
- **Knobs are Loose:**
 - Tighten the screws from the inside of the door or drawer that secure the knobs.
