Eureka Forbes B07Y8LTTP4

Instruction Manual: Eureka Forbes Aquaguard Original Filter

Model: B07Y8LTTP4

1. PRODUCT OVERVIEW

The Eureka Forbes Aquaguard Original Filter is designed to enhance the quality of your drinking water. This pack includes a Smart UV Sediment Pre Carbon Filter, essential for multi-stage water purification systems. It is a crucial component for maintaining the efficiency and performance of compatible Aquaguard water purifiers.

Image 1.1: Eureka Forbes Aquaguard Original Filter cartridges in packaging. The blue cartridge is a sediment filter, and the black cartridge is a pre-carbon filter, both sealed for freshness and authenticity.

2. KEY FEATURES

- **Aquaguard Original Filter:** Ensures compatibility and optimal performance with Eureka Forbes Aquaguard

systems.

- **Pre Carbon Filter:** Effectively removes chlorine, organic chemicals, and other impurities that cause bad taste and odor from water.
- **SMART UV Sediment:** Designed to filter out suspended particles like sand, silt, and rust, protecting subsequent purification stages.
- **Material:** Constructed from durable plastic for longevity.
- **Product Benefits:** Improves water quality by reducing contaminants.

3. SETUP AND INSTALLATION

This filter is designed for use with compatible Eureka Forbes Aquaguard water purifiers. Installation should ideally be performed by a qualified service technician to ensure proper fitment and system integrity. Refer to your specific Aquaguard water purifier's manual for detailed installation steps.

1. **Preparation:** Ensure the water purifier is disconnected from the power supply and the water inlet valve is closed.
2. **Access Filter Compartment:** Open the filter housing or access panel of your Aquaguard purifier as per its specific design.
3. **Remove Old Filter:** Carefully remove the old sediment and pre-carbon filters. Be prepared for some water spillage.
4. **Insert New Filters:** Insert the new Eureka Forbes Aquaguard Original Sediment and Pre Carbon filters into their respective slots. Ensure they are seated correctly and securely.
5. **Secure Housing:** Close and secure the filter housing or access panel.
6. **Flush System:** Slowly open the water inlet valve and check for leaks. Allow water to run through the system for a few minutes to flush out any air or carbon fines before consuming.
7. **Power On:** Reconnect the power supply to the water purifier.

Note: Incorrect installation can lead to leaks or reduced purification efficiency.

4. OPERATING INSTRUCTIONS

Once installed, the filter operates automatically as part of your Aquaguard water purification system. No specific user interaction is required for the filter itself during normal operation. The water purifier will draw water through these filters as part of its purification cycle.

- Ensure your water purifier is always connected to a stable power supply and water source.
- Monitor the water flow rate. A significant decrease may indicate a clogged filter.
- Follow the indicator lights or alerts on your Aquaguard purifier for filter replacement reminders.

5. MAINTENANCE

Regular maintenance, primarily filter replacement, is crucial for the continued performance and safety of your water purifier. The lifespan of the sediment and pre-carbon filters depends on the quality of your incoming water and usage volume.

- **Filter Replacement:** It is recommended to replace these filters periodically, typically every 6-12 months, or as indicated by your Aquaguard water purifier's filter life indicator. Heavy sediment or chlorine in your water supply may necessitate more frequent replacement.
- **Cleaning:** These filters are not designed to be cleaned or reused. Attempting to clean them can damage the filter media and compromise purification effectiveness.

- **Genuine Parts:** Always use genuine Eureka Forbes Aquaguard replacement filters to ensure optimal performance and to maintain your purifier's warranty.

6. TROUBLESHOOTING

If you experience issues with your water purifier after filter installation, consider the following:

Problem	Possible Cause	Solution
Reduced Water Flow	Clogged sediment or carbon filter; airlock in the system.	Replace filters if due; flush the system to remove air.
Unpleasant Taste/Odor	Exhausted carbon filter; new filter carbon fines.	Replace carbon filter; flush new filter thoroughly.
Water Leakage	Improperly seated filter; damaged O-rings; loose connections.	Re-seat filters; check and replace O-rings; tighten connections.
Purifier Not Working	Power supply issue; filter not recognized (if smart system).	Check power connection; ensure genuine filter is used and correctly installed.

For persistent issues, contact Eureka Forbes customer support or a certified service technician.

7. SPECIFICATIONS

Brand: Eureka Forbes

Model Number: B07Y8LTTP4

ASIN: B083FWW48D

Material: Plastic

Item Weight: 0.85 Kilograms (850 g)

Item Dimensions (LxWxH): 8 x 8 x 8 Centimeters

Net Quantity: 1 Count

Product Benefits: Improves water quality

Manufacturer: oem

8. WARRANTY AND SUPPORT

For specific warranty information regarding the Eureka Forbes Aquaguard Original Filter, please refer to the documentation provided with your complete Aquaguard water purification system or contact Eureka Forbes customer service directly. Using genuine Eureka Forbes replacement parts is essential to maintain your product's warranty and ensure optimal performance.

Customer Support: For technical assistance, service requests, or to purchase genuine replacement parts, please visit the official Eureka Forbes website or contact their authorized service centers.
